## How to connect gpx mini projector to phone

You have to show a presentation, but you have no laptop? No need to worry at all if you have an iPhone in your hand. You can use a projector with your phone to easily display files, videos, or pictures. Mini projectors are often connected to laptops or computers. However, if you don't have any of these, just use your iPhone to get the job done. There are basically two ways you can connect an iPhone to the mini projector. If the projector is wireless, you can connect your phone via wireless connection, there are different types of projectors on the market. Some include a pocket projector or a blue dental projector. There are several options available there. However, in this article, we'll look at why connect the iPhone to a mini projector wirelessly. Follow these steps as directed and you'll be able to easily get the link. You can get the best portable projector online in case you don't have one. There are a number of best mini projector supports wireless connectivity. If this happens, the projector must have a similar network as the iPhone. If you don't know how to connect your iPhone to the same network, consult the user guide. Please note that the streaming range depends on the capacity of the projector. Step 2: The second step requires you to find and tap the wifi-Doc app on your iPhone. The icon is similar to Wi-Fi. The symbol has additional Word Excel, MS Powerpoint, and PDF Reader logos. If you don't have Wifi-Doc installed on iPhone, you can easily download it from the App Store for free. Step 3: After you open the app, you will be able to scan the nearby devices that the iPhone can connect to. Find the projector and tap it to connect. If you have set a password for the projector, you must first enter the password. In others, you can easily tap Connect. Step 4: After finishing linking to the projector, the app will show you the file type of your presentation is a document, or if it is a PDF, select PDF. Step 5: After selecting the file type, Wifi-Doc will open all files of the specific type. Then you need to scroll down to find your file and tap it. When you tap the file, it will be opened and displayed on the projector. It should be noted that button until you press the return button on the iPhone. However, if you press the back button, the files will appear on your iPhone, not the projector. If you want to continue projector. If you don't accidentally own one, you can easily buy it from a store nearby. You should also note that the VGA cable cannot be used directly with your iPhone. You'll need a VGA adapter to lightening Apple. This is available in Apple stores. Make sure you purchased the correct adapter for your iPhone. Each iPhone model has a different adapter designed for it. So make sure you get what you get. Step 2: The next step requires you to connect the VGA cable to the adapter. The projector cable to the adapter to make sure you tighten the ends of the VGA cable to secure the connect the connect the connect the end of the VGA cable is the one that is connect the view of the the adapter to your iPhone. The cable must be loaded into the iPhone charging socket. Once the process is complete, the iPhone will be connected to the projector. Step 4: If your presentation has audio, you'll need to connect the projector audio cable to your iPhone. This cable will fit into the iPhone's headphone jack. This will allow you to listen to the audio of the file you selected. Step 5: Switch the projector to the correct input, and you'll notice that the iPhone screen is a projection of the display. Additionally, if you have a presentation, you can open the file and get a screen projected. Before you turn on the correct input, you must open the first slide of the presentation. This will ensure that people will only see what you have a smart projector that this feature is not available on any other projector. With this method, we'll use the Wi-Fi feature to connect your iPhone to the best mini projector. Step 1: Make sure the projector is detectable on the Wi-Fi network. Step 2: Take your finger up to access this option. If you have an iPhone X, you can swipe from the right Step 3: Tap the Airplay option, and then select screen mirroring. You'll immediately see that the iPhone to a mini projector. How to connect an iPhone to a mini projector with a cable, one of the easiest and simplest ways to connect your iPhone to a mini projector is to use an adapter cable. The best mini projectors come with a video cable that can be attached to the phone, laptop, or tablet whose files they need to project. We're talking about this cable. However, the iPhone does not have a standard video port. This is the reason why you will need an adapter for the same. Now there are two different types of adapters that will help you connect your iPhone to a mini projector. This type of adapter connects to the Lightning port of the modern iPhone. It is located at the bottom of the phone and connects to standard VGA cables. Digital video adapter Flash This does not connect to the VGA cable. However, this adapter allows you to connect your iPhone to an HDMI cable. Projectors usually have an HDMI or VGA port. While the VGA only supports video and no sound, it is recommended that you get HDMI. HDMI is known to support both audio and video. If you're going to use the projector to watch movies or live streaming games, it's best to get an HDMI adapter as it will give you the best experience. If you're using an older version of the iPhone with the 30 PIN dock connector, there are several variants of video cable adapters for these models as well. If it happens to use the mini projector regularly, then it is best to purchase these cables. If you are still confused about which cable you need to go, it would be advisable to get both of them. This allows flexibility and can be used at a later stage. How to connect the Bluetooth projector to the iPhone If you want to connect your iPhone to the mini projector using Bluetooth projectors that are specially designed for the iPhone. You can connect the iPhone to the projector via Bluetooth in such special projectors. In addition, the procedure for connecting the iPhone to projectors varies depending on its properties and specifications. They also depend on the marks of the projector to your iPhone. The benefits of portable projectors not only allow you to show presentations or images, but you can also stream media segments and videos to them. If you regularly use projectors, it is best to consider buying one. They can be used in many ways than One of the most important advantages of portable projectors is the small and compact size. It is suitable for both educational and business purposes. Portable projectors can be easily transferred from one place to another. In addition, they also do not have much weight. They are super light and can be carried anywhere you go. You can simply buy one of the best portable projectors for an organization and use it in different rooms and places. This kind of projectors are simply seamless and are free from the mess of wires. Cable projectors can be a lot of work due to multiple cables and wires. You constantly need to install and set them up and remove and pack again when you're done. However, with portable projectors, you can rest with ease. You can just put them anywhere. In addition, you do not need to worry about connecting or disconnecting from them. If you need to attend a business meeting away, you can carry the mini projector with you. Portable projectors are easier to navigate. They can be easily packed in the bag or placed in your car. You don't have to worry about wanting someone else to wear it or make extra room for the same. They come in different sizes, allowing you to choose your preferred. Portable projectors are more practical and applicable in the current global scenario. They make a good impression and are modern devices that make your life simpler. The best part about portable projectors is that there is a wide range of products to choose from. In addition, they save you from the mess of cables and are quite on the accessible side. Be sure to check out the options online to get the best deals by hand. Portable projectors are worth the investment. Conclusion iPads are amazing devices on which to work, while with it you can do a lot of other things. However, the iPad screen is not close to the size of the projector display. When you need to give a presentation or view files on a larger display, mini projectors or pocket projectors are the best bet. Customer meetings or live game streaming on the projectors is an excellent choice. Follow these easy steps to connect your iPhone to projectors and see life on a larger scale. Scale.
