The title is the sequel to a renowned survival horror game that has convinced players around the world. The game has some differences to the first title. The first is the design: the graphics of the game are more realistic. This can be seen in the new effects of water, in the movement of plants and also in deaths. Exceptional graphicsIt is clear that this look is not yet at the level of the blockbusters of the games, but this path is being reached more and more. Nevertheless, it is surprising by the quality and depth of the scenarios and the details of objects and characters. The sound effects are also fantastic and to enjoy this experience better, you should enjoy the game with your headphones. Tension songs keep you connected to the experience and sound effects bring more vibrancy to the title. Focus on the crosshairs of dead trigger 2's most important novelties is its game mechanics. Now the shots are fired automatically, which makes the game a little easier. In this way, you focus primarily on aiming and panning zombies that some players like and others may dislike. One detail that is also new is the participation of female zombies, something that did not exist in the first version of the game. In addition, the game also has a number of characters that interact with the player, which makes the game much more fun. An amazing story Just like in the first game, Dead Trigger 2 has a huge amount of weapons enjoyed by players. And for the first time, you'll be able to encounter monstrous zombie bosses and even shoot with machine guns attached to it. One of the main points of Dead Trigger 2 is the new story mode. Instead of completing side missions, you can face a unique storyline with specific actions. The game got much better, with exceptional graphics, simple gameplay, amazing storyline and should surely please most fans of the first version and conquer many others. If you like FPS, Zombie and Survival Horror, Dead Trigger 2 is a game that deserves to be on your smartphone. Smartphone.
