The new flight routes (mostly non-stop) make it much easier to relax in the Caribbean this year. In particular, the world's largest airline, American Airlines, has launched several routes until 2020, including new services to St. Thomas and St. Lucia, and JetBlue is offering access to the little-known Guadeloupe island in the French Caribbean with a service three times a week. This is the best new flight route and destination to consider when you plan your tropical escape. New York to Guadeloupe on JetBlue The flight Last summer, JetBlue announced a new direct service from New York's John F. Kennedy Airport (JFK) to the French Caribbean, specifically to Pointe-à-Pitre Airport (PTP) in Guadeloupe, flights departing from JFK at 7.m. and landing in Guadeloupe after noon so you can soak up the sun's rush hour one day in the sun. The service starts on February 1, 2020 and is a one-way service to Guadeloupe from the United States outside Miami, where both American Airlines and Air France offer flights to the island. Looking forward to both adventure and beachside pleasure. Immerse yourself in the unfinished nature of Basse-Terre, which settled in a brightly decorated tree house at Tendacayou Ecolodge & Spa and hiked one of the many trails through the rainforest in the 74,100-acre Parc Nacional de Guadeloupe, a boutique reserve announced by UNESCO, or enjoy the en suite sea, beach access, and the glory of the Toubana Hotel & Spa pool, the modern boutique hotel in Saint Anne's village. Guadeloupe is the main gateway to the island of Dominica, a short commuter plane or a ferry ride from Pointe-à-Pitre (30 minutes on Win-Air or slightly less. Hours in L'Express des Îles, respectively) on Dominica, visit the world's second-largest boiling lake in the Morne Trois Pitons National Park, snorkel at Champagne Reef (hence the name for the twitchy water) and disconnect from the world at the secret, environmentally conscious, sleek cliff retreat and six units on the northwest of Dominica. A look at the Secret Bay resort of Dominica Courtesy Secret Bay Charlotte to Grenada on American Airlines this year, American Airlines added a new flight Saturday from Charlotte Douglas Airport (CLT) to Morris Bishop International Airport (GND) on Grenada Island. This weekly flight opens grenada access for a small U.S. airport offering fast flights to Charlotte. Why you should book While on the 133 square miles Spice Island Moniger Grenada has been thanks to its abundant production of nutmeg, mack and cinnamon, the perfect postcard, Grand Annes Bay Beach at Spice Island Beach Resort. The all-inclusive luxury resort, which combines fine dining, top-tier drinks and one-price activities, recently expanded to 64 beach suites, skipped the beach one morning for an amble through the historic capital of St. George and discovered a 300-year-old fortress with a cannon, work, beautiful Georgian architecture and, of course, an amazing spice market. Chicago, Dallas, and Miami to St. Thomas, USVI. On American Airlines, St. Thomas' flight is still recovering from the hurricane season. Pummeling of 2017, American Airlines has another eye on the U.S. Virgin Islands. In late December 2019, the airline launched a new weekly winter service from Chicago O'Hare Airport (ORD), a New Year's weekly service from Dallas-Fort Worth Airport (DFW) and a third daily flight from Miami Airport (MIA) to St. Thomas Cyril Airport. Americans have permanently added a third daily flight from Miami to St. Thomas, why should you book a plane that rises for a good time by opening one of st. Thomas' most revered resorts, the Ritz-Carlton St. Thomas? The resort unveiled a fresh and contemporary look in November 2019 after hurricane formation. In addition, since St. Thomas serves as the main starting point for both the United States and the British Virgin Islands, these new flights are good news for those who want to experience St. John's snorkelling paradise to sail BVis on a deceed yacht or enjoy the secluded beach at the recently renovated Rosewood Little Dix Bay. United Airlines kicked off the trend, announcing on August 30 that going forward it would not charge change fees for all standard economy and premium cabin tickets for travel within the United States in effect immediately. Delta Nickel charges for domestic flights shortly afterwards, and American Airlines joins the fray as well, eliminating change fees for domestic flights and some short-haul flights to the Caribbean, Mexico and Canada. Shortly after, Hawaii and Alaska announced a similar domestic policy, making JetBlue the only major airline to keep the change fee. Now United are back two weeks later, all but straight to the Americans, which has the most benign policies. The airline announced last week that the fight against Mexico and the Caribbean would be exempt from the change fee. The change fee - which can run up to \$200 depending on the airline and flight - is an extra fee charged when a flyer needs to change their itinerary, generally on top of any difference. For example, Southwest Airlines is beloved by customers, mostly because it has no change fees, and flyers have the ability to change plans as needed for free. Under the new U.N. domestic policy, which also applies to travel to Puerto Rico and the U.S. Virgin Islands, the u.S. economy is in the middle of a new - United are not limited. Number of times a passenger can adjust a flight (applicable to all classes except Basic Economy) The airline also extended the fee exemption period for new tickets purchased until December 31, which means that all tickets (including the basic economy) purchased from March 3 to the end of 2020, both domestic and international, will be allowed no free changes. Limited The change fee will remain on international flights, which are up to \$400 depending on the destination, as well as the U.S., the New American Change Fee Policy, which covers domestic flights and flights to short-haul international destinations such as Canada, Mexico and the Caribbean, applies to all tiers except basic economy. Like others, it doesn't extend to basic economy fares, alaska Airlines's policy reduces the \$125 change fee for all flights except basic low-cost tickets. In addition, United announced that from January 1, 2021, it will be the first airline in the United States to allow all passengers to fly on standby for free on all same-day flights, regardless of ticket type or service class. Maximum fare or status Americans also introduced a similar policy the next day that is set to come into force on October 1, 2020, and american charging \$75 for same-day flight changes, amid a major outbreak, most airlines temporarily waived change fees, not only to help customers who want to adapt to the ever-changing web of health regulations and clauses. Limited Travel, but also attract passengers to book tickets again. American, Delta and United are part of the U.S. Travel Association's latest Let's Go There campaign, which encourages Americans to book future trips both to support the industry and improve the mental health of travelers at home, the USTA said, eliminating good change fees, a good example of how the company may get travelers seeking travel by the end of 2020 or 2021. When it comes to the airline's bottom line: In 2019, U.S. airlines have pulled \$8.6 billion in baggage and change fees, according to the Bureau of Labor Statistics. After a difficult period earlier, the airline decided it was difficult to survive, sometimes at the expense of customer service, Kirby United Airlines would not follow the same playbook as we came out of this crisis.
