Help Center Downloads MantraLite Mantraet is simple – makes control of LED luminaires easy and intuitive, while giving control over moving lights and conventional ones. Mantra Lite, and Mantra Expansion Wings combine the ease of use of a fader-based console, with the power of a touchscreen graphical user interface. The software shows the user what to do next, ensuring a very simple learning curve for even beginners. Power users are also taken care of with many advanced features and the ability to record up to 1,000 memories, across 100 cuepoints or chases, and playback 10 simultaneously on the console. Each optional wing increases this by 10 views and 100 cuepoints. The DMX output is also available as sACN and/or Art-Net via an RJ45 connector on the console. Control of 24 individual matches is given on the Mantra Lite console, each with a physical fader for intensity. The optional provides each additional 12 fixtures, 10 views and a universe of DMX. Connect up to two wings wings a total of 48 fixtures, 30 views and 3 universes of DMX. A large 18cm (7.2) color capacitive touchscreen provides a powerful user interface, similar in operation to modern smartphones, giving the user the feeling of familiarity and comfort. Colors (e.g. RGB, RGBAWUV, CMY and color wheels) are all controlled via a simple color picker app, Pan and Tilt via a trackpad and other parameters of virtual sliders.
