Schumacher's SE-1052 is a manual car charger/starter. In two amps manual mode charge trickle, it can charge a 12-volt automatic battery in 12 hours or less. The manual 10 amplifiers charge a 12-volt automatic battery in three to five hours. The 50-amp engine will start to start a dead battery in an emergency. The charger has a solid state scheme, a heat switch and three charger functions. The power cord for the SE-1052 is six feet long and the battery charging cables with clamps is also six feet long. Set the Charge Rate switch to two amplifier trickle modes or 10 fast charging amps. Attach the charger cables to the battery, following the correct polarity: a red cable to a positive battery terminal and a black cable to the negative battery terminal. Connect the charger's power cord to the AC wall socket. Monitor the charging process by checking the ammeter on the front. Stop charging when the ammeter reaches 100 percent on the Charge scale. Don't recharge the battery. Disconnect the charger from the AC socket. Connect the charger cables to the battery by observing the correct polarity: a red cable to a positive battery terminal, a black cable to a negative battery terminal. Connect the charger to the AC socket. Set a charging speed selector on Engine Start. Start the engine. If it doesn't start within five seconds, stop cranking and wait four minutes before cranking again. If it can't start after the second attempt, charge the battery for five minutes before trying to start the engine again. Disconnect the power cord from the AC socket before disabling the charger's cables once the engine starts. Advertising - Scroll through page 2 of 8 advertising Thank you for your participation! Your assessment is very important to improve the artificial intelligence that shapes the content of this MPN project: SE1052 SKU: SE1052 UPC: 026666510523 Delivery: Calculated at the registration see sale price in the basket (why?) Manufacturers from time to time offer tout products at their suggested retail price. When we decide to sell items at a price below the price offered, the sale price can only be shown in your shopping cart.
