Add my Review Be the first to review this product *LIQUID* Rit Liquid Dye Royal Blue Rit Dye Use these liquid dyes to paint your fabric Here's what Rit Will & Will > Dye Choose your Fabric and Materials Rit best for many natural, washable fabrics and materials like... 100% cotton, linen, silk, wool, frame Synthesized such as rayon and nylon Fiber blends with at least 60% cotton or other dye fibers (Blends will tone evenly but will not achieve full color) Nylon-based plastics such as those found in buttons, fasteners, golf balls and lacrosse sticks Natural materials such as wood, braided paper, leathers and cork ... but there are fabrics and materials that will not accept paint, such as ... 100% polyester, acrylic, acetate, fiberglass, spandex and metal fibre Fabrics with rubber backing (bath mats or throw mats) Fabrics with special e.g. water repellent Fabrics with bleach damage or extensive staining Fabrics washable only in cold water or labeled dry pure polyethylene plastic, such as golf discs discs plastic, such as spectacle frames If you have doubts about whether your fabric will accept color, check the sample. Achieving True Color Always follow the manufacturer's instructions for your fabric, as well as rit dye packaging or bottle instructions. Before painting, remove the stains on the fabric with a Rit Super Stain Remover or Rit Color Remover to achieve the same color results. Choose your colors. You can use one, two, three or as many colors as you want on one garment. However, if you use more than one color, it's usually a good idea to start with the lightest color. Be sure to use enough colors to weight or size the project. For example, for a pound of dry fabric (about 3 yards), use a single package of Rit powder or a 1/2 bottle of Rit liquid 3 gallons of water. Dissolve the powder color in 2 cups of very hot water first to avoid spotting the dye. Mix the dissolving powder colour or shake the liquid dye in the dyes in the bath until evenly distributed. Never put liquid or powdered paint directly on the fabric. Use a water temperature of 140 F/60 C in the deepest colour. When painting 1 pound of dry fabric in dark or bright colors such as Black, Dark Brown, Cocoa Brown, Navy, Purple, Wine, and Dark Green, use twice as much color (2 packs rit powder or 1 bottle of Rit liquid) 3 gallons of water. For more intense color, when painting fabrics containing cotton, rayon, ramin or linen, add 1 cup of salt dyebath. When painting nylon, silk and wool, add 1 cup of white vinegar dyebath. If possible, delay adding salt or vinegar for up to 5 minutes after the fabric has been in the paint bath. The delay will help promote the level of painting. Add 1 tablespoon of laundry detergent to all the color baths to help promote the level of coloring. The longer the outfit is immersed in the paint bath, the deeper the color is. Items can stay in the paint bath for up to 1 hour, while the water remains hot. You will also have to make sure that the item receives constant stirring or stirring. Clothes will also look darker and wet before washing. When you remove the clothes from the color bath, rinse warm, then cool water until the water goes clear. (Warm water helps to rinse surface paint more effectively.) Wash the cloth/clothing in warm water with a gentle detergent and then rinse thoroughly in cool water. The machine will dry or hang dry. Fiber Content affects the color of color clothing and fabrics will carry color differently because of their fiber content and weight. With the new Rit color formula, these swatches painted in the Scarlet are lighter, vibrant and show improved color continuity. Tips for painting Special Fabrics Silk Colour: Royal Blue This versatile, easy-to-use and non-toxic color is ready to provide vibrant colors almost type of fabric or fabric mixture. Ideal for restoring faded clothing, wearing, footwear or coordinating the décor of the house, hiding laundry accidents and so much more. Are you in a neat way? Follow one of our easy-to-use tutorials on how to create a tie color, ombré, dip painted, marble or shibori pattern. Or see for yourself how beautifully Rit dye wood, wicker, paper and cork. Whatever your goal, all you need is a washing machine, plastic container or stainless steel sink to start. Cotton, linen, silk, wool, ramie, rayon, viscose, nylon, modal, tulle, wood, paper, cork, hemp Saving the four shirts you like with our non-toxic color versus buying new ones reduces your CO2 emissions by 74%. CO2 is the primary gas responsible for trapping heat in the atmosphere and is a major contributor to climate change. Rit ColorStay Dye Fixation reduces bleeding, fading and even improves the color of your project. Use after painting to make your clothes stay as vibrant as you are. ColorStay Color Fixation Use Rit Color Remover to remove existing color from yet-to-be painted fabric, giving you a color ready canvas for impressive results and true color. Color Removal [{{partial.t4JM.headline}}](#) Using our color formula library, you can choose more than 1,000 colors from. Here are some similar tones to consider. Blue Uniform Blue Nebula Moody Blue Poseidon's Call ignite your inner creativity by trying out the color technique. Step 1: Remove color (optional) If your fabric is already white, you are good to go! If your fabric has an existing color, remove it with rit color remover. Step 2: Select Tone you can go with an already bottled tone or one of our thousand color formulas. The bottom line is you have options. Step 3: Pick the Color Method you can paint in the sink, bucket or even with your washing machine! Step 4: Create a Color Bath We usually recommend mixing 4 ounces of color with three gallons of hot water per pound of fabric. The main thing is to make sure that your color bath is large enough for the fabric to move freely. Step 5: Paint your fabric Depending on how bold the color you are trying to achieve, it can last anywhere from 10 to 30 minutes. Step 6: Use ColorStay Dye Fixation (Optional) After painting the fabric, consider using ColorStay Dye Fixation. It reduces bleeding, fading and even improves the color of your clothing! Step 7: Wash and enjoy! We are sure you will enjoy (♥️) your new one-of-a-kind clothing. By continuing to use this site, you agree to the use of cookies.
