If you're a fan of racing games, you're definitely familiar with EA Games, a game developer known for the Real Racing series. And recently EA Games launched a completely new game called - Need for Speed Most Wanted. Coming to this game, players will be free to travel anywhere, explore the beautiful lands of Europe, meet friends or even tease the police. Let burn nitro, hit the gas and stir in the streets! GameplayLike other versions in the Need for Speed series, this game has the same gameplay and design. The only thing that made him released into an independent game was aggression with the police in ambush mode. You will default to be a criminal in violation of speed laws. From the beginning, there were police cars chasing you and they were constantly replenishing their strength for this endless pursuit. At some point there were helicopters. They provide your location to the police, so you need to be alert and control the car more skillfully. CompetitionOf course, if the racing game has no competition, it will be boring. Need for Speed Most Wanted organizes quite a few races not only for you, but also for other anonymous riders around the world. They will do all the tricks to get to the finish line first, including aggression and push you off the road. So be more active if you don't want to be the one left behind. If someone tries to burn Nitro to pass or hit the back of your car, feel free to take revenge. In addition, in this version, the developer added five opponents to the Blacklist. This is a list of the best riders who are likely to win your championship in the future. Defeat them and steal the car they have. Control For navigation, EA Sport integrates both on-screen and sloping interactions to control the car with sensors. You can customize it as you wish in the settings. For myself, I prefer to control the left/right arrow buttons on the screen. The first reason is that it's pretty easy. I don't need to keep the device in balance and can even experience the game even while lying down. Secondly, it is not too sensitive and does not require high accuracy. Ngochi ra, tzatz chức nyung như tang tốc độ, sử dụng fan tha bạn chỉ cần chạm wao meng han han han phải wa bin trei tương ứng. Một đứa trẻ cũng with thể dễ-th'nh thạo những tao thak nei. CarsNeed for Most Wanted provides a great big cars up to 40 units with many models from the world's leading brands. However, most of them are not available. Players are only given the default car to use for the first time, other cars will be purchased with gold or unlocked when the player wins the event. Some of them are more special, they are limited edition, more powerful than cars that you can buy in the garage. In races, collisions with cars of other competitors are inevitable. This will cause your car to malfunction, so please service them regularly to make them work in the best possible way. GraphicsEA Sport has never provided players with products that are poor in terms of graphics. Need for Speed Most Wanted is such a product, even it is difficult to find another game with the best rating. Although only a mobile version, it turned out to be not inferior to the racing game on the PC. As long as you have an Android device with a good enough resolution, it's easy to see what I just mean.
