Small cars with high run show the greatest interest for the company. 4 interesting facts about Suzuki Suzuki appeared in 1909 and mainly produced looms. Later, when the demand for them fell, the company's founder Michio Suzuki began to look for a solution that could save the company from bankruptcy. His son, Shunzo Suzuki, came to the rescue; he advised his father to install a small engine on his bicycle. And even drew a sketch of the car. The inventor took his son's idea seriously, and in 1951 the first motorized bicycle called Power Free was created. The car involves three modes of driving: only on the engine and on both at the same time. The company's first car - Suzuki Suzulight - is practically a new class of car in Japan, which took the name Of Kei car or K-car. At the time of release, the car could impress with a whole set of innovative solutions: independent front and pinion, the location of the front engine and other novelties. The car was 2,990 mm long, 1,295 mm wide, 1,400 mm high. In 1970, the company's first full-range car, the Suzuki Jimny, was released. Its name is combined with two words: jeep and mini. First, the mini-jeep was sold only in Japan, as its 0.36-liter engine had only 24 hp. after that it gained worldwide popularity. Suzuki Jimny is still manufactured One of the most famous cars of the brand was Suzuki Liana, which entered the market in 2001. The model's name is an acronym for life in a New Age. The debut of the model took place at the Motor Show in 2001. Despite its simple appearance, small price and unremarkable specifications, the car has gained popularity among celebrities. All because three years in a row, 2002-2005, Suzuki Liana was the only star of the show Top Gear in the category Best car for reasonable money. During all the years of participation in the exhibition, the car made 1,600 test tracks, and its tires and brakes were replaced at least 100 times. In general, the model withstood the tests worthy: the clutch had to be replaced only 6 times, and the wheel hub - twice. Also, drive shafts, cross-arms, percussion racks, jagged racks and rear-view mirror required replacement. Features of Suzuki cars The distinctive feature of the cars of the brand itself is the compact size, simple but ergonomic design, affordable price and excellent cross-country ability. The embodiment of these principles of the company was Suzuki Ignis, presented at the Tokyo Motor Show in 2015. Minimalistic design, increased road clearance and excellent all-wheel drive technologies make it suitable for both city roads and off-road trips. And the SHVS hybrid system can significantly reduce fuel costs. The safety of Suzuki models is also at the top level. For example, the Suzuki Vitara and SX4 are equipped with 7 airbags, a dynamic stabilization system even in the basic configuration, and their bodies are made of special varieties of high-traction steel. High levels of passive and active security are approved by independent studies: Suzuki Swift '10, SX4 '13 and Vitara '15 were awarded the highest rating of 5 stars in EuroNCAP tests. The interior of the cars is also worth mentioning. It is simple and moderate, at the same time looks stylish and expensive. The passenger compartment has comfortable seats that provide good support and the appliances readings are easy to use. You can buy spare parts for Suzuki here.
