ALL POSTSGacha Rolls Simulatorseverything is just based on luck and speculation! just try this gacha roll simulator.. Based on my stats, I think the 300 SQ is still a 50-50 chances to get an SSR.. 1000 SQ, I think there will always one.. But I found out the trend if there is no gold serving in your 1st 5 sample, consider scrolling later. If your first roll is already gold earner, I think the rate up is good the time.. (or your luck) gamepress.gg/grandorder/summon-simulator2In world of probability, you can't really take anything for granted. I have previous experience that both supports and opposes your theory. (edited by LifiHueHue) 1Hahahaha... Yupp, it's true. 1Semer as if you are not aware of how Probability of Independent Event works. No matter how much you roll.. the rate will never rise.. you could be lucky and get the SSR you want in one roll, or you can never get the SSR you want in like 1.5K SQ used (speaking from experience).1Search for FGO Tips' videos on YouTube. Multis vs singles or something like that. He will give you a minimum probability theory to understand how this game's casino works.1Interesting. But how can you be sure that simulation coding works in exactly the same way as ingame coding? 1@Adam Luthfie I ended up trying to use a fgo gacha simulator for a very long time now. im too afraid to use it because I believe in that stupid superstition that it drains all your good gacha fortuneDude, I got the nightingale in my first 10 draw on the simulator but in the game used 350 quartz but still no eresh. Brahhhhhh what is this..... Last Updated: 2019/3/18 23:32 Hot Topic Check Out Servant Tier List! Welcome to our guide to Rerolling (Reset Marathons) in FGO (Fate/Grand Order). Here you will find all the information on how to perform a Rerolling - and which Servants and Craft Essences you should be aiming for. If you are thinking of rewriting your original Saint Quartz Subpoena and want to know more, read on! Press to play Reroll You can never get a 5 star waiter with the first 10-roll Subpoenas (You are instead guaranteed to get a 4 star waiter)If you are aiming for 5 stars this is possible on the individual subpoenas after tutorial Essential Craft Essences is never a great gain, even a 5 star cardfall rate for 5-star waiters is 1%The time required for a Rerolling is about 15 minutesTime takes for a complete rerolling in FGO is 15 minutes and you only have a 1% chance of pulling a 5 star waiter in the call after the tutorial. while you can aim for the lucky 5 star device, if you are happy with the 4 star you are pulling, there is no to keep signing up again. To start the game with a 5 star waiter you really need to have itThere is always the option to keep rerolling if you are so desperate to start the game with a 5 star device. But you're going to need a lot of luck and lots of time. For this list we have evaluated more highly the waiters who are useful in the early Some servants have a large part of the later, but if they are not so important early games, we have given them a lower evaluation. The availability of goods is factored into our evaluation criteriaDifferent elements are needed to level up Servants. So although a serve in many ways can be better than others, if they are hard to level up early games they also get a lower evaluation here. Craft Essences should not be considered in RerollingsCraft Essences are cards you can equip your waiters with. By having them equipped, a waiter can demonstrate certain special effects, as well as having their stats improve. Rerolling for Craft Essences is not recommended as it is more important what Servants you have in your deck. FGO (Fate/GrandOrder) Related Article Note that this thing makes some minor approximations in different places and is not a 100% accurate (but very close) Especially master missions count full 7 day periods instead of actual weeks, daily login is based on an average and of course, part of it is based on predictions aside, the margin of error is at best +/- 5 quarts on calculations When you make a 10x subpoena, you get a guaranteed 3* waiter and a guaranteed 4* Percentage does not reflect this and your actual chances of getting 3*s and 4*s are slightly higher The calculation actually assumes all subpoenas are single/ticket subpoena Note that banners with multiple employees at the rate-up of the same rarity don't always have equal percentages Some 5* banners will have 0.4% for a 5* and 0.4% for another , but another banner could have 0.5% for one and 0.4% for the other Since we don't know these exact rates in advance, it assumes evenly distributed prices Topic Response Views Activity FGO Friend/Support list megathread part 2 This is a continuation of @BBxDiscostu93's thread that finally reached 3000 posts and got locked to reach the post cap. congratulations on making such a popular thread! ... 1392 23867 December 11, 2020 .bangbang.
