The wallpaper or background (also known as desktop wallpaper, desktop background, desktop or desktop image on computers) represents the use of a digital image (photo, picture, etc.) used as a decorative background of the graphical user interface on a computer screen, mobile device or other electronic device. On a computer it is usually for a desktop, while on a mobile phone it is usually a background for a home or idle screen. While most devices come with the default image, users can usually change it to custom files of their choice. Mobile wallpapers are computer wallpapers the size of mobile devices, such as a mobile phone, a personal digital assistant or a digital audio player. The height is often larger or equal to the width. Wallpapers can usually be downloaded at free cost from various websites for modern phones (such as those that run Android, iOS, or Windows Phone operating systems). Modern smartphones allow users to use photos from the Internet; or photos taken with your phone's camera can be installed as wallpaper. Image wallpapers are usually copyrighted, as are many other digital images found on the Internet 1920x1440 Toshiro Hitsugaya wallpapers of the 1440x900 bleach Toshiro Hitsugaya wallpapers. Just below the image you will see a button that says: Download. You'll also see the screen resolution we found out for you. When you press the button, download the image of the wallpaper will probably be saved in the download folder. Find the image on your computer right, click on it and then click the set button as a desktop background. Now the only thing left to do is to enjoy the new wallpaper! Mac: Find the wallpaper you love and click on the blue download button just below. Then tap the Apple Menu and System Preferences of the Desktop and Screen Saver's Desktop. On your computer, find a uploaded image and click on the photo. Now go back to your desktop and admire the new wallpaper! iPhone/iPad: Choose beautiful wallpaper and press the yellow download button under the image. Then click on the image and hold for a few seconds. Next, select save the image from the options below, go to the photo and find the image you just downloaded. Use the share button (looks like an arrow curved out of the box) and then choose to use as a wallpaper button. Now you can crop or organize the image to your liking; when it looks perfect, click the set. The only thing left to do is choose whether you want the image to be your lock screen, home screen or both . . . And enjoy! Android: Choose one of our many exquisite wallpapers and download it by clicking on the yellow button to upload just below the image. Then open your gallery/photography app and from there open the download folder where you will see the image you just downloaded. Click on the image, then look at the top right corner and press the menu button (three vertical points). From menu options, choose to set as wallpaper. Now decide whether you want to use your new wallpaper as a home screen background, lock screen or both, and choose the right option. You will be able to manipulate the image to your liking; when you're 100 percent happy with how it's Click set as wallpaper, go back to your home screen and and Dazzled! Dazzled!
