New4Mob - MX Player MX Player is one of those programs. Which differs significantly from such video applications with a number of interesting innovations. It is worth noting not only the functional minimalism of the program, which will be dealt with in a couple of minutes even a first-grader (in fact, there are two large menus - menus with folders, where the video files are located, and the actual menu of the screen of the video file itself), but also a smart intuitive way to control the application. Which is done by touching your fingers to the screens: so you can adjust the volume level, and play a light tap to translate at the right moment ... A special MX Player feature in a special blocking of extraneous processes when playing a movie. After clicking on a special lock in the corner of the screen, you can forget that some extraneous process or accidental touch to the exit button can prevent you from watching the movie. MX Player is a good and high-quality alternative to a lot of all kinds of video applications on Android. The program supports hardware and multi-core decoding, a lot of formats of popular video files and subtitles - in general, for a moviegoer the program is quite suitable. Download MX Player.apk Tags: MX Player, player, video, Video Player Page 2 Opera Mini has long gained popularity on mobile devices based on Symbian and Java. It is this browser that can save as much money and compress the web pages you view. Despite its small weight, the browser is characterized by a lot of settings and features. A version of the Opera Mobile browser was previously published. But this version of the browser is similar not to the computer version, but to the version mobile phones. So you won't have to get used to the new Android features using the Opera Mini browser. In addition, you are given the opportunity to download free Opera Mini. The browser uses a special cloud technology that allows you to compress web pages as much as possible, while speeding up their download. Traffic consumption here is reduced up to ten times, which means that you can save a lot of money on mobile internet. Possible to maximise compression of popular sites such as Yandex, Mail.ru, Classmates, Vkontakte, Livejournal. You'll immediately feel how fast the pages are loading. And as fast as it was not on the computer or tablet. The new version of the browser has transformed the interface, which has a more attractive and modern look. You can zoom in with two fingers. You can control intuitively, thanks to full framing. There are express panels, as well as Opera Link, which is designed to synchronize bookmarks. This browser is great for slow Internet, as well as for data plans, where there is a megabyte payment of traffic. Download Opera Mini 6.5.2.apk Page 3 New4Mob - Programs - YouTube 2.3.4 YouTube Video Hosting has a huge number of videos. Behind clips, movies all people climb into YouTube. The company was able to successfully implement itself in the field of Internet services. People, to become famous, upload their videos on YouTube. And it must be said that some people are even good at it. And not only ordinary people, but also the artists themselves download their music videos, as people watching clips on YouTube. Google agreed with YouTube, decided to create its official application for mobile devices under the Android operating system called YouTube. We have already used this app. A new version of YouTube 2.3.4 was recently released. Some bugs have been corrected here, as well as improvements. For example, when you upload videos, you can change your privacy settings, as well as edit the description and title. The download interface has been updated, which has become not only convenient, but also beautiful. It's a very nice and convenient feature that you can create, edit, and delete playlists. This feature will be useful for those who frequently use streaming radio. Note that previous versions of the YouTube 2.3.4 app did not have such a feature. By the way, you can download you for free YouTube 2.3.4. The new version of the app allows you to read new comments when you watch the video openly. If you turn the screen into a landscape size, the video will automatically be translated into full size. Updated 04.09.2016, Voice Control Find unofficial analogues, You can in our new official group in Download YouTube 2.3.4.apk 32178 Powerful video player with advanced hardware acceleration and subtitle support.a) HARDWARE ACCELERATION Hardware - acceleration can be applied to more videos with the help of the new HW's decoder.b) MULTI-CORE DECODING - MX Player is the first Android player Test result proved that multi-core device's performance is up to 70% better than single-core devices.c) PINCH TO ZOOM, ZOOM AND PAN - Easily zoom in and out by pinching and swiping across the screen.
