Website: Notes: Patient online site for independent doctors of optometry provided to: SearsOptical.com, TargetOptical.com, and Lenscrafters.com, PearleVision.com TAB is the backend database to the PearleVision.com patient online planner via the TAB web services. If you use both TAB and My Vision Express to schedule appointments, you take a few steps so that My Vision Express can communicate with TAB. First, you need to set up your services that you choose for appointments in both TAB and My Vision Express. For this, in My Vision Express, go to File&gt;Inventory&gt;Services. Then click add. When you add or change a service, choose to create a TAB appointment type simply a service from the Assignment type mapping list type instructions for the appointment book. appointment book. Then make sure you set up all your TAB providers in My Vision Express with corresponding NPI numbers in File&gt;Setup&gt;Physician/Resource. Make sure NPI numbers are the same in both TAB and My Vision Express. If you already have patients in TAB or My Vision Express, you'll need to update their data to match tab and My Vision Express records. Any discrepancies in data between TAB and My Vision Express may result in data loss or patient duplicate. Finally, you'll need to set up each store with the TAB store number, userid, and password. To do this, in My Vision, go to File&gt;Setup&gt;Company Information, and under the Calendar tab, fill in the text boxes in the The Appointment Book (TAB) group box. Note: Store numbers must be entered by 11 digits, including brand IDs and leading zeros if necessary (i.e. 0000000879 (LC); PV000006364 (Pearle Corp); PF00008088 (Pearle Franchise); SR000001442 (Sears Optical); or TG000004114 (Target Optical). If there are errors in the My Vision Express tab or vice versa, view them in My Vision Express by going to Tools&gt;Interface Exceptions and viewing the exceptions under the interface name The Appointment Book. If there is a difference of data between TAB and My Vision Express you fix it and then check it recognized in the Interface Exceptions window. Until you do this, the appointment or patient with the error will not be transferred between TAB and My Vision Express. EXAMPLE Here's an example of making an appointment on My Vision Express and the same appointment displayed on TAB. First we make the appointment on My Vision Express. Then wait at least 30 seconds and check TAB for the new appointment. You may need to click the Refresh button in TAB. If you choose now, check in the appointment in TAB. Then wait at least thirty seconds and check the change on My Vision Express. If you choose now, check out the appointment in My Vision Express. Then wait at least 30 seconds and check TAB for changes to the appointment. You make other changes to the appointments, such as confirming, re scheduling, canceling and leaving a message, and with each change or making an appointment just wait two minutes and check the receiving interface for changes to appointments. If an appointment change or creation doesn't appear in the receiving interface, see the Interface Exceptions window in My Vision Express for errors. ADD AVAILABLE TRANSACTIONS Add

Appointment Notice (status went to cancelled or rescheduled) Check-in appointment (status went to check-in) Cancel Check-in appointment (status went from check-in to regular) Check-in adjustment (status went to check-out) Check-in appointment (status went from check-out to regular) Confirm appointment went to confirmed) Message left for appointment (status went to 'left message') Reschedule Appointment (changed the date of the appointment or changed provider) Update Appointment (one/many of the following changed: appointment type (appointment service), appointment duration, Notes on appointment, insurance status, physician assigned to appointment Confirm appointment in advance (convert an appointment to a confirmed appointment) Add patient update to patient activation (change patient status)Note: All My Vision Express patient transactions only take place during an appointment transaction. However, patient updates that run in TAB are sent even without an appointment transaction. Transaction.
