This story appears in the March 1997 issue of . Subscribe Vanessa Singer found a kick in another strum. When Vanessa Singer discovered that she needed surgery as a result of a brain haemorrhage, she began playing guitar to help her cope with the upcoming surgery. With practice, the singer found that her creativity increased, encouraging her to continue dabbling in the game and writing songs. When one of her new tracks called for the sound of passion fruit - a shock instrument like a shaker used to create a rhythmic rhythm - the singer tried to shake the passion fruit by strumming the guitar. Unable to fit the passion fruit in her hand and at the same time play the guitar, singer creatively approached: went to the kitchen for a small knife, cut a gap in the passion fruit and shoved into it a guitar pickup truck. Her new homemade invention allowed her to easily provide her own drum accompaniment. The rest, as they say, is a musical story. I knew for sure right there, recalls Woodland Hills, California, the inventor, that I have something on every music store counter in the world. A commercial version of Singer's invention, The Rhythm Pick, a hand-held percussion instrument in With two guitar picks, it is now sold in more than 40 countries, and generated sales of about \$15 million worldwide. The singer's company, Take Your Pick Inc., has also developed two new products: Rhythm Thang, a shock shaker with the same body as Rhythm Pick, but with an elastic Velcro attachment to match the outside of your hand, and a rhythm bag, suede and leather-like shaker bag that offers two tones that allows the user to shake it as a maraca or as a tambourine. But the singer's success didn't happen overnight, and it didn't come beating her door. After submitting her product to potential investors and obtaining a patent, Singer began her research. First, it test-marketing the product in music stores across California, shooting staffs and allowing customers to try out the product by collecting opinions about its pick. Within three months, Singer has amassed 2,500 opinions on how to develop and improve her product. When I first gave it to people in music stores, they looked at me like I was crazy, the 28-year-old singer explains. Then when they actually tried it and heard the demonstration, they got excited. The next task of the singer was to study various aspects, such as advertising, promotion and accounting, - the creation of her business. She estimated that it took about \$50,000 generated by investor loans to start her own business, which covers patent costs, computer design, and mold production for her product. With a variety of acclaim from such well-known movers and shakers as Wolf Marshall, one of the most respected guitar instructors in the world, and Paul Stanley of KISS, Rhythm Pick has definitely created a riff in the music world. Says Singer: If you have something that you believe in and you get a good, exciting response from other people, it's inspiration enough to accomplish everything you want to achieve. I have a very, very good time. Allyssa Lee, a freelance writer living in Los Angeles, knows only three chords on the guitar. Contact SourceTake Your Choice Inc., (818) 710-8945. Randy Bachmann (he was great in Canada-look it) visited Abbey Road Studios and was presented with a crazy choice: he could hear anything at all from the masters of the Beatles catalog. He chose the first chord of Night of the Hard Day. Here he explains the process behind this iconic sound. For those who are not musicians or who are not familiar with the theory of music, the chord is just two or more notes that play together at the same time. For example, if someone had to place one hand on the piano and hit two keys at the same time, that would be a chord. A chord or grouping of notes played at the same time can create harmony when two or more notes complement each other. Chords add texture to the melody, and can even provide the rhythm of the song. Most often played triads, triads, of the three, so-called, because they consist of three different notes: the root note, and the intervals of the third and fifth above the root note. There are many kinds of chords. Some sound is dissonant, that is not harmonious. Some have two notes of chords, others more than three notes, and some chords can be broken. Let's look at the different musical chords. Two-volume chords are called intervals. In music theory, the interval is the difference between two pitches. The interval is called depending on its quantity and quality. For example, the main third is the interval name, in which the term basic describes the quality of the interval and the third indicates its number. The number of intervals is the number of notes it covers. Both the lines and spaces of the musical staff are taken into account, including the positions of both notes that form the interval. For example, the C to G note is the fifth, as the number of notes from C to G is five (C, D, E, F, G) that occupy five consecutive staff positions, including posts C and G. The name of any interval is additionally qualified using terms perfect, large, minor, supplemented and reduced. Some chords have different qualities to their sound, which may not sound in perfect harmony, and these qualities are known as reduced and supplemented chords. They may seem strange or unbalanced. It's dissonance, and while these chords tend not to be pleasantly ear-pleasing in the traditional sense, they're quite fascinating when placed strategically in music. Chords can have more than three notes, these chords are known as tetrad or Grated chords. These can include seventh chords, added tone chords, extended chords, altered tone chords, and tone clusters. Notes in a broken chord are not played at the same time, just as it sounds, it is broken into a sequence of notes. A broken chord can repeat some notes from the chord, too. The musical term arpeggio means playing a broken chord in an ascending or ascending order. Each arpeggio is a broken chord, but not every broken chord is arpeggio. The ordered series of chords is called chords or harmonic progression. Chords are the basis of harmony in American music and classical tradition. Guitar chords for You and I on Ultimate Guitar Let's prepare you through an example of finding guitar chords and lyrics on Ultimate Guitar. Start searching for the song you want to know. In this example, we were looking for You and I on One Direction. Filter search results with the Chords button and then link them to a high rating. If there are several different versions for your song, start with the highest rating. When you click on the version you want, you should see a combination of guitar chords, tabs and Sometimes there is also an explanation of how to play a song. In the version of You and I, which we chose, there was a link to the performance on YouTube as well. Hover over each chord name to see a diagram showing how to play it. You can hear how it should sound and even use the arrow button to see alternative fingerings. If you want to sing along, transfer the song to a key that is convenient for you. When you're ready to play, click the Automatic Scroll button at the bottom of the screen. 2. Chordify: Play along with the recording Sometimes, you want to learn a specific song, even if you don't know how it goes, which is good. Chordify is perfect for these situations. This website has a super clean interface with large chord charts that are updated as the song plays in real time. Hit the play button and grab the guitar. Chordify uploads a YouTube video in a corner and starts playing the actual recording. The display in the center of the screen shows a square box for each bar and tells you when to switch to the next chord. Anyway, it's all a little too simple. There's no information on strumming patterns and Chordify doesn't offer alternative chords even if the song needs them. There are no lyrics either. But it's a great place to get started. Also, if you sign up for a monthly subscription, you can unlock the instruments to change the tempo, volume and pitch of the song as you play along with it. Guitar chords for Can't You See on Chordify Let's find guitar chords for Marshall Tucker Band's Can't You See. Search for the song or artist you want to play and then click on the song from the results list. There's only one version available for each song, which is nice and simple. But not all songs are Chordified, which means you might not be able to play together. On the next screen, take a look at the chords you need for the song. When you're familiar with them, click Play and Chordify starts playing the song via YouTube and scrolling through the chords in time. 3. Songsterr: Interactive tabs or clean chords There are two versions of the Songsterr website. The new version has an interactive player with tabs for more than 500,000 songs. Many of the songs here even allow you to choose from multiple parts of the instrument to play. However, if you're looking for guitar chords and lyrics for popular songs rather than tabs, click to visit Old Songsterr instead. Hence, enter the name of the song or artist you want to search for and then click on the song you want to know from the results. Each song on Songsterr has one of three different icons to show that is available: The Play button means an interactive tab that uses Flash Player. T points to a tab written in text form, which is often Read. And the chord icon shows songs with lyrics and chords. Tap the chord icon to show a clean interface with runs down the page and all the chords you need to know on the right. Click on each chord to see the alternative with your fingers. Guitar chords for Just what I need on Songsterr For this example, we'll play Just What I Need on Cars.
