Here are two things for you: 10 Essential Fluency Phrases – Get Phrases for Simple Conversations NEW: Join The English Fluency Club – Get my 2 fluency programs + weekly challenges and group lessons Do you feel nervous and forgetful when talking to English speakers? When I was studying Spanish, basic conversational skills were the hardest thing for me to learn. When someone asked me a question, I would freeze up and forget how to speak. When it came time to hold a Spanish conversation, I would suddenly forget everything I studied. That's when I realized I hadn't practiced my talking skills. I spent six years studying language in high school and college, but I never got the opportunity to chat with actual Hispanics. The mistake that many students, myself included, make when learning a foreign language is to forget about practicing real conversational skills. Instead, we spend our time memorizing vocabulary words and doing workbook activities. And while these exercises are also important, they don't teach us how to speak naturally. What you need to keep a basic English ConversationBeing able to have a basic English conversation is not difficult—you just need to know how to express yourself and start with short, simple conversations. To have a basic conversation, you need to be able to:Introduce yourself and share some personal information. Talk about your needs and expectations. Talk about your career and your educational background. Keep simple conversations with people you meet in daily activities, like shopping, going to the bank or going to the doctor's office. Unless the only reason you learn English is to read literature, you will need to communicate with English speakers at some point. Whether you are travelling abroad, working for an international company or attending an English-speaking university. Before you become a master English conversationalist, you will need to develop some basic English conversational skills to help you speak confidently and not forget your vocabulary in the moment—as I used to do with Spanish.The best way to build these skills is to take basic English conversation courses. Great for preparing for an upcoming trip to London or New York, these courses can teach you how to talk about yourself, ask for help and hold simple conversations with people you will encounter during a normal day. Here are some courses that will get you to chat in English in no time. The podcast is run by three English teachers named Lindsay, Michelle and Jessica, who talk about a number of exciting topics, which important study habits every student should have and how to respond to a funny joke. One of my favorite episodes is How to Respond to What Are You Up To? in English, who will teach you to respond to this usual greeting by talking about how you have been. What makes all ears English different from other conversation courses is that the podcast usually covers how to become a better English student.
