Mazzy star fade into you lyrics meaning

In this series, we dive into an important song from the past and get into the heart of what makes it so great. Today, we review Mazzy Star's biggest single, a wistful national anthem of love that unilaterally pulls you into its elegant world and lingers in your mind long after the fire has faded. For a song that has obsessive beauty and pensive languor capturing the hearts of thousands of hopeless romantics around the world, there's not much to say about Mazzy Star's 'Fade into You'. Not because everything was said, necessarily, but because the 1993 single of the dream pop group isn't really the kind of song you're talking about. You just sink into its elegant world, allowing reverb-drenched vocals and hypnotic slide guitars to speak directly to your soul. So much about music is over-defined by television and what people write and say about it, co-founder David Roback, who died earlier this year at the age of 61, told The Times back in 1993. You have to leave something to people's imaginations, so they feel they can get involved. Music is music. We don't want to be part of that great determination. We feel you will be able to close your eyes and listen to it. This is a good rule of thumb to listen to any number of songs, but 'Fade into You' captures the depth of feeling so intimate that it becomes impossible not only to close your eyes and let the music wash through you. And while the irony of writing a piece about a song you're not really supposed to write about doesn't get rid of me, part of the magic of the song is what it makes people want to say; not the kind of Roback people probably mentioned - critics and the media in general - but fans have their own memories that are closely tied to the song. Scrolling through YouTube comments on the song's official video, you'll see people telling stories when they first hear it, or simply what it reminds them of: first love, dusty afternoon, star-filled night. People relate not only to the feel of the song - to how it somehow sounds both melancholy and hopeful, languid but enchanting - but to each other. Which, in itself, is quite strange – who knows that a song of and about inland people can foster a meaningful sense of human connection? 'Fade into You' is often remembered as a song about love - in fact, it may be one of the greatest songs about love, or rather consumed by it - but it can also be read as about longing for that deeper kind of human connection, only to realize others simply don't experience emotions in the same way. The sayings I look at you and I don't see anything/ I look to see the truth may be just about unilateral love, about not seeing those romantic feelings reflected in the eyes of others; but comes after the iconic opening couplet want to hold your hand / I want to take a real breath, maybe this emptiness stems from recognizing the inability to become part of the inner world of others, there are your own personal urges that exist outside yourself. Rhymes true to the truth may appear lazy, but in this case it serves to highlight the disparity between the truth she craves and the world truth that hands her: truth as love, and truth as harsh reality. And yet, she can't help but marvel at the ignorance of others with a kind of youthful oneness: I think it's strange that you never know, singer Hope Sandoval coos in the chorus. Strange that such immense emotions can go unheeded. Even stranger, perhaps, by the fact that the person being tackled seems similarly reclusive: You live your life / You go in the dark. Sandoval is also notoriously shy, prefers to perform in close darkness and is sometimes clearly uncomfortable playing in daylight. Once you're on stage, you're expected to perform, Sandoval once said. I didn't do that. I always find it awkward to just stand there and not talk to the audience. It's hard for me. But in 'Fade into You', other people's tendency to go in the dark is less about being reticent than it is about suffering from some form of depression, one that colors your eyes with what's not there. The truth then becomes much less complicated, but just as bitter: she sees nothing when she looks at him because he is obsessed with a kind of emptiness that is just as all-consuming as her love. 'Fade into You' will forever be seen as a heartbreaking romantic song, but there's a shadow with it often unheeded - the spiral of losing yourself altogether to someone who is lost in a completely different way. There is no indication that the nature of the singer's desire is completely romantic; Her pain stems not only from the fact that her love is not - or cannot be - reciprocal, but from this inability to reach out to others and pull them out of that dark place. In the song's confusing second verse, she imagines herself from her perspective, viewing her love as the light of a stranger that comes in slowly, a heart of strangers without a house. But she quickly realized her love could never be enough – You put your hand on your head/ And then its smile covered your heart. Like truth and truth, the line of hand to your head links back to the first verse, where she sings that she wants to hold hands inside you, to prevent him from continuing to sink into his depression - only for her to fade into some version of what she described earlier as a night into your darkness. None of that, of course, explains why a very mysterious has left a lasting impact on a lot. And although, to this day, no one really knows exactly how 'Fade into You' became an unlikely hit - it was Mazzy Star's only song to make it to the Billboard Hot 100, reaching number 44 - for many, it boiled down to this : it's a great makeout song, probably one of the best of all time. A Capitol executive puts it like this: All the kids have boyfriends and girlfriends, and they like her, and I don't think they listen to Barry White. A lot of films and TV shows have taken advantage of that, too. But it's not so much because of lyrics like the overall vibe of the song, which is ironic, considering it's one of the few Mazzy Star songs that does more to capture a specific feeling than just a mood. It's also one of their more polished compositions: comparing it to something like 'Be My Angel' from She Hangs Brightly in 1990, a track that uses nearly identical cho chorus processes and some bluesy slide guitars that, but have a rougher feel, are almost improvisational to it. Here, that choy progression provides a solid foundation for all the haziness that envelops it - of course, it helps it's also one of the most popular out there, bringing to mind Bob Dylan's 'Knocking on Heaven's Door'. Perhaps it's the quality that makes the song so nostalgic – there's a kind of familiarity with it, but it dilutes just enough to let your mind wander, in the same way that the lyrics tell a particular story while also being vague enough for the listener to project their own experiences into them. But evoked as the song may be, it's not nostalgia that the band went for: it was never intended to be a nostalgic song, Roback once explained. Unless you are meant to think about nostalgia for the present, because it really is about the present. That makes sense, when you think about it: it's written in current stress, for one thing, and the intensity of emotions gives it a certain immediacy. But the production tells a different story - soaked in reverb enough to make it feel like the past is part of the present, unfolding right in front of you. And then sandoval's voice. There is a characteristic softness to it that makes it feel strikingly intimate, but what makes it so effective is that it externalises an entire internal world without underselling nor overdramatizing the passion that lies beneath. Fade into you she sings, stretching every symym. Strange you never knew. Unlike many of his time in the alternative rock scene, Mazzy Star is capable of expressing teen emotions with a kind of quiet wistfulness that is entirely foreign to genres like grunge. Even if Kurt Cobain tapped into a similar kind of inner MTV Unplugged Nirvana concert, Nirvana, there's almost no sense of hope behind the pain – while 'Fade into You' offers solace right from its first lines, as if Sandoval were singing directly to you. There was a whole lot of music in the 90s that channelled angst teenagers more than ever, music you can identify with - but that song offers at least some comfort, whether you involve one who goes in the dark or the singer chasing him. Even if you don't pay attention to the lyrics, the song's gorgeous instrument, accentuated by soothing piano details and king drums, is enough to make you feel like you're being wrapped in a warm hug. Despite all the mystery surrounding it, though, 'Fade into You' is actually a simple song at its core. We didn't try to write a hit song - we just wrote one song, Roback said in a 2018 interview, explaining that it started as an acoustic song. I think we had a tone and a feeling and we just followed that feeling. Although naturally opposed to any kind of orthodox success, Mazzy Star is not the kind of band that has grown to hate their most famous singles. And yet, they always seem to highlight that simplicity when it comes to their song writing process, as if the song only came together naturally. When asked about it in a 2013 interview, Sandoval simply said: I think it's a good song. But although they refused to mythologize themselves or their profession, Roback himself described it in the most eloquent way: We were not so interested in the outside world, he told Uncut in 2013. It's a very internal process that we're involved in. The outside world really isn't on our minds, in so far as music is concerned [...] It's the world itself for itself. When you hear 'Fade into You', it's impossible not to lose yourself in that world; a world, as Sandoval wrote in a poem posted a few days after Roback's death, is filled with comforting sadness that holds us together. together.
