Minor improvements to the App's user interface drops quite often when I try to change tools. Otherwise a great app. But no response from technical support sound quality is good, as other reviewers have stated. But the app is too expensive for what it offers. There are other versions of this application made by the same developer, on which the developer continues to insist, completely different products. Lehrastudio, Lehrastudio Pro, Lehrastudio Sarangi. They contain different content, of course, but when it comes to the user, they are the same app. These apps are overpriced too. Especially when you consider the minor UX problems that even the \$2 apps on AppStore don't have. Taking the same thing, dividing it into 4, branding each one a little differently with a slightly different look and then selling each one for having all four stand together - it's pretty antisocial behavior. I'm just waiting for someone more user-oriented to enter the market. Until then, I suppose iLehra will have to do. Also, someone can start KickStarter to feed Aman Kalyan because he must be very poor to do so aggressively greedy. There is no doubt the audio and musical quality is good. But the choice is limited. 7 tal? Are you kidding me. You Are You The videos do not show how the user can make a choice. Maybe it's because there are limited choices to start with. Sound quality is really promising, but in the end it's like a video game pong Visit the site External Package Download: au.com.lehrastudio.lehrastudio.lehrastudioultimate Author: Aman Kalyan Version: 1.1.8 Update on: 2017-08-11 Facebook Browser DO NOT support download.
