(b) Area of a segment (c) Area of common regions between circles; 2.3.4 Area of Solids (i) Specific Objectives Eleven should be able to a) find the surface of a prism; b) find the surface of a prism; b) find the surface of a prism; b) find the surface of a frozen, e) find the surface of a sphere and a hemisphere. (ii) Content area of prisms, pyramids, cones, frozen tums and spheres. 2.3.5 Volume of solid substances (i) Specific objectives Eleven should be able to a) find the volume of a prism; b) find the volume of a prism; b) find the volume of a frustum, e) find the volume of a sphere and a hemisphere. (ii) Content Volumes of prisms, pyramids, cones, frozen tums and spheres. 2.4. 0 Algebra 2.4.1 Algebraic expression (i) Specific Objectives Eleven should be able to a) use letters to represent numbers; b) write statements in algebraic form, c) simplify algebraic expression, d) factorize an algebraic expression through grouping. (e)

Substitution and evaluation g) Problem solving in real-world situations; 2.4.2 Equation of straight line; b determine a straight line gradient by known points, c determine the equation of a straight line using gradient and a known point, d)

remove brackets from algebraic expressions, f) evaluate algebraic expressions by replacing numerical values, g) apply algebraic fractions (c) Simplification of algebraic expressions (d) Factorisation by grouping e) Removal of parentheses (f)

```
express a straight line equation in the form y = mx + c, e) interpret the equation y = mx + c, e) interpret the equation of a line, g Draw the graph over a straight line using gradients of parallel lines,
(j) apply the ratio of gradients of perpendicular and parallel lines to obtain equations of straight line (b) Equation for a straight line (c) Equation of a straight line (d) X and y cutting paper for a line (e) Graphene over a straight line (f) Perpendicular lines and their
gradients (g) Parallel lines and their gradients (h) Equations for parallel and perpendicular lines. 2.4.3 Linear equations in an unknown; (b) solve simultaneous linear equations by substitution and elimination, c Linear equations in one and two
unknowns. (ii) Content (a) Linear equations in an unknown (b) Concurrent linear equations (c) Linear equations (1) (i) Specific objectives Eleven should be able to: a) expand algebraic expressions forming square
equations; (b) derive the three square identities, (c) identify and use the three square expressions of the shape aX2+b
X+c, where a; b and c are constants (b) The three square identities: (a+b)2 = a2 + 2ab+b2 (a-b)2 = a2 + 2ab+b2 (a-b) (a a+b b) = a2-b2 (c) Using the three square equations by factoring (f) Form and loose square equations. 2.4.5 Square expressions
and equations (2) (i) Specific objectives Eleven should be able to: a) factorize square expressions, b) the different b) identify perfect square. (e) derive the square formula, (f) solving square equations using the formula, (g) forming and solving
square equations from roots and given situations. h) make tables of values from a square relationship, i) draw graphene of a square equations (one linear and one square) analytically and graphically, (1) apply the knowledge of square equations to
real-world situations. (ii) Content (a) Factorisation of square expressions (b) Perfect square equations by filling in square equations of square equations and solving them (h)
Tables of values for a given square relationship (i) Graphs of square equations (j) Simultaneous equation – a linear and a square (k) Application of reality. 2.4.6 Linear inequality (1) (i) specific objectives Learners should be able to: (a) identify and use inequality symbols, b) identify and
use inequality symbols, b) to identify and use inequalities in the number row, c) solve linear inequalities in the number row inequal
simple linear inequalities from the inequality graphs. (ii) Content (a) Inequality on a number line (b) Simple and complex inequalities (f) Content (a) Inequality on a number line (b) Simple and complex inequalities (f)
Simple linear inequalities from inequalities from inequality charts. 2.5.0 Linear programming 2.5.1 Linear inequalities based on real-world situations, b) represent the linear inequalities in a graph, c) solve and interpret the optimal solution of the inequalities, d)
apply linear programming to real-life situations. (ii) Content (a) Formation of linear inequalities b) Analytical solutions of linear inequalities through diagrams (d) (d) (include lens function) (e) application of square equations to real-world situations; 2.6.0 Surds (i) Specific objectives
Eleven should be able to: a) define rational and irrational speech; b) simplify expression with soured, c rationalize denominator with soured, c rationalize denominator with soured and irrational numbers b) Simplification of the rationalisation of denominators. 2.7.0 Sequences and series (i) Specific objectives Eleven should be able to: a)
identify simple speech patterns, b) identify different sequences and sequences in sequences in the sequences in 2.00. b) define a sequence, c) identify the pattern of a given set of numbers and derive the general rule, d) determine a term in a sequence, e) recognize arithmetic and geometric sequences, f) define a
series; g) recognize arithmetic and geometric series (Progression), h) derive the formula for subtotal of an arithmetic sequence (d) Geometric sequence (a) Simple number patterns (b) Sequences (c) Arithmetic sequence (d) Geometric sequence
(e) Determining a term in a sequence f) Arithmetic progression (A.P) (g) Geometric progression (G.P) (h) The sum of a G.P (exclude the sum to infinity) (j) Application of A.P and G.P to real situations. 2.8.0 Binomial Expansions (i) Specific Objectives Eleven should be able to: a) expand binomial
expression up to the power of four through multiplication; b) Build Up - Pascal's Triangle up to the eleventh row. c Use Pascal's triangle to determine the terms coefficient of a binomial expansion up to power four (b)
Pascal's triangle (c) The ylkhetcoefficient of terms in binomial expansion (d) Calculation using binomial expansion (e) Evaluation of numerical cases using binomial expansion (d) Calculation using binomial expansion (e) Evaluation of numerical cases using binomial expansion.
inverse, partial and common variations, (c) establish constants of proportionality, (d) form and solve equations to solve everyday problems. (ii) Content (a) Change in the subject (b) Direct, inverse, partial and common
variations (c) Proportionality constant (d) Graphs over direct and reverse proportion (e) Equations of variation from real-world situations; 2.10.0 Geometry 2.10.1 Angles and Flat figures (i) Specific objectives Eleven should be able to: a) name and identify types of angles; (b) solving problems involving angles on a straight
line, (c) solving problems involving angles at a point, (d) solving problems involving angles on a transverse cutting parallel lines, (e) state angle properties to real-world situations. (ii) Content (a) types of angles (b) angles
on a straight line (c) angles at a point (d) angles on a transversal (corresponding, alternate and allied angles) (e) angle characteristics of polygons (f) application to real-world situations. 2.10.2 Geometric structures (i) Special objectives Eleven should be able to a) use a ruler and compasses only to: i) construct a
perpendicular bisector of a line; ii) construct an angle bisector; (iii) construct a perpendicular to a line from a given point, (iv) construct a perpendicular to a line through a given point on the line; (vii) split a line proportionally, b use a ruler and a set square to construct parallel lines, divide a line proportionally, and to
construct perpendicular lines, c construct a standard polygon with only ruler and compass, as well as ruler, compass and protractor. (ii) Content (a) Construction of lines and angles using a ruler and compasses only (b) Construction of perpendicular and
parallel lines using a ruler and a set square only (c) Proportional division of a line (d) Construction of regular polygons (up to a hexagon); 2.10.3 Loci (i) Specific Objectives Eleven should be able to: a) define locus; b) describe common types of loci, c) Construct, i)
loci involving inequality, ii) loci involving chords; (iii) loci comprising points under specified conditions, (iv) intersecting loci. (ii) Content a) common types of Loci (b) perpendicular bisektor loci (c) loci of a point at a certain distance from a fixed point (d) angle bisector loci (e) other loci under given condition including
intersecting loci f) loci involving inequality (g) loci involving chords (constant angle loci). 2.10.4 Scale drawing (i) Specific objectives Eleven should be able to a) interpret a particular scale, b) interpret a particular scale 
appropriate scale, c) Draw appropriate sketches of given data, d) state the bearing of a point from another, e) locate a point using bearing and distance; f) determine height and depression angles, g) Solve problems involving bearings and scale drawings. (h) apply shell drawing in simple surveying. (ii) Content (a) Types of
scales (b) Selection of scales (c) Sketching from the given information and peel drawing (d) Bearings (e) Layers, distances and location pointsf) Angles of height and depression (h) Simple surveying techniques. 2.10. 5 Common solids (i)
Specific objectives should be able to a) identify and sketch common solids, b) to identify and sketch common solids, b) to determine their design in the form of common solids, b) identify and sketch common solids, b) identify and define common solids, b) identify and sketch common solids, b) ident
solids, b) identify and define common solids, (b) to establish and establish and establish common (b) sketch and precisely draw networks; (d) calculate the surface area of solids from netting; (e) find distance between two points on a solid. (ii) Content (a) Common solids, e.g. 2.10.6
Three-dimensional geometry (i) Specific objectives The learner should be able to: (a) indicate the geometrical characteristics of ordinary solids; b) identify skewed lines, d) Calculate the length between two points in three-dimensional geometry, e) identify and calculate the angle
between (i) two lines, (ii) a line and a plane. (ii) two planes. (ii) Content (a) Geometrical properties of common solids (b) Shear line in 3-dimensional geometry (d) The angle between (i) a line and a line (ii) a line (a) plane iii) a plane and a plane iv) angles between
oblique bands. 2.10.7 Angle characteristics of a circle (i) Specific objectives Eleven should be able to: (a) identify an arc, chord and segment; (b) relate and computational angle that is closed by an arc in the centre and at the circumference; (i)
Content (a) Arc, chord and segment b) Angle subtended by the same arc at the circumference (c) The ratio of angle below the centre to angle underlit on the perimeter by the same arc (d) Angle in a semicircle (e) Angular characteristics of a cyclic quadruple f) finding angles of a cyclic quadruprate; 2.10.8 Circles: Chords
and Tangents (i) Specific goals Eleven shall be able to: (a) calculate the length of an arc and a chord; (b) Calculate lengths of keys and intersecting chords and tangents. d) Construct key to a circle, e) construct direct and transverse common keys to two circles, f) relate
angles in alternate segments, g) construct circumscribed, inscribed and attributed circles, h) locate the centroid and orthocentre of a triangle, (i) Apply knowledge of circles, tangents and thords to real-world situations. (ii) Content (a) Arcs, chords and tangents (b) Lengths of tangent and intersecting chords (c)
Characteristics of chords and keys (d) Key construction of keys to a circle (e) Direct and transverse common tangents of two circles (h) Centroid and orthocentre (i) Application of knowledge of keys and chords to real-world situations. 2.1 1.0
Chart 2.1 1.1 Coordinates and Diagrams (i) Specific Objectives Eleven be able to: a) draw and label the complete Cartesian plane, c) Select and use the appropriate scale for a given data (d) make a table of values for a given linear relationship, e) use values to draw a
linear graph, (t) solve simultaneous linear equations graphically: (g) draw, read and interpret graphs. (ii) Content (a) Cartesian plane (d) Selection of the appropriate scale (e) Table of values for a given linear relationship (f) Linear graphs (g) Graphic solutions of
simultaneous linear equations (h) Interpretation of graphs. 2.11.2 Graphical methods i) Specific objectives Learn should be able to: a) make a table with values from given relationships; b) use the table of values to draw the diagrams of the connections, c) determine and interpret instantaneous rates of change from a
graph, d) interpret information from graphs, e) draw and interpret graphs from empirical data, f) solve cubic equation of a circle with regard to the center and radius, j determine the center and radius of a circle and draw the
circle on a cartesian plane. (ii) Content (a) Tables and graphs of given relationships (b) Graphs of cubic equations (c) Graphs of cubic equations (d) Average rate of change (e) Instantaneous rate of change for a circle that finds the equation of a
circle (j) that determines the middle and radius of a circle. 2.12.0 Trigonometry 2.12.1 Trigonometry (1) (i) Specific objectives Eleven should be able to: (a) define key, sine and cosine ratios from a correct angled triangle; (b) reading and using tables of trigonometric conditions; (c) use sine, cosine and tangent in calculating
lengths and angles, (d) determine and use the sine and cosine ratio with free angles, (e) relate the three trigonometric ratios, f determine the trigonometric ratios, f determine and use tables of logarities of the sinus, cosine and tangent. (h) apply the knowledge of
trigonometry to real-world situations. (ii) Contents (a) Tangent, sine and cosine of angles (b) Trigonometric tables (c) Angles and sides of a right triangle (d) Sine and cosine of free angles (e) The relationship between tangents; sinus and cosine (f) Trigonometric conditions of special angles 30°, 45°, 60° and 90° (g)
Logaritmes of sines, cosinins and keys (h) Application of trigonometry to real-world situations. 2.12.2 Trigonometry (2) (i) Specific objectives Learners should be able to a) define and draw the unit circle, b Use the unit circle to find trigonometric conditions in the form of coordinates of points under < 0 &lt; 360, c) find find
key ratios of negative angles; d) find trigonometric ratios of angles larger than the unit circle, e) use mathematical tables and Whits to find trigonometric ratios of angles in the range 0 < 0 60 (f) define the radian measurement, g) Draw graphs of trigonometric functions, y = sin x, y = cos x and y = tan x using degrees and
radians; (h) derive the sine rule, (i) derive the cosine rule, (j) apply the sine and cosine rule to solve triangles (sides, angles are and cosine rules in real-world situations. (ii) Content a) Device circles (b) Trigonometric rations from the unit circle (c) Trigonometric ratios of angles greater
than 360° and negative angles (d) Use of trigonometric tables and calculations (e) Radian action (f) Simple trigonometric graphs (g) Derivation of sinus and cosine rule to real situation. 2.12.3 Trigonometry (3) (i) Specific objectives Learn should be able to: (a)
recall and define trigonometric conditions; b) derive trigonometric identity sin2x+cos2x = 1, c) Draw graphs of trigonometric functions, d) solve simple trigonometric functions; b) derive trigonometric dentity sin2x+cos2x = 1, c) Draw graphs of trigonometric functions, d) solve simple trigonometric functions, d) solve simple trigonometric functions, d) solve simple trigonometric functions analytically, e) deduce graphamplitude, period, wavelength and phase angles. (ii) Content (a) Trigonometric conditions (b) Derive
the ratio \sin 2x + \cos 2x = 1 (c) Graphs of trigonometric functions in the form y = a \cos(bx \pm 0) y = 
2.13.0 Commercial arithmetic 2.13.1 Commercial arithmetic (1) (i) Specific objectives Eleven should be able to a) disclose the currency from one form to another given the exchange rates, c) Calculate profit and loss, d) Express profit and
loss as a percentage. e) Calculate discount and commission, f) express discount and commission as a percentage result (f) Discounts and commissions (g) Percentage discounts and commissions. 2.13.2
Commercial arithmetic (2) (i) Specific objectives Eleven should be able to a) define the principal, tax rate and time in relation to interest, (b) that it should be a matter of establishing such a thing as to be 2) (i) specific objectives. b) calculate simple interest rate using simple interest formula, c) calculate compound interest
rate with step-by-step method, d) derive the formula for compound interest, e) apply the compound interest formula for calculate revaluation and depreciation, h) Calculate (i) calculate income tax in the light of income tax bands.
(ii) Content (a) Principal interest rate and time (b) (b) interest (c) Compound interest (c) Compound interest formula (f) Estimate and depreciation (g) Calculation of estimate and depreciation using compound interest formula (h) Hire
purchase (i) Income tax. 2.14.0 Statistics and probability 2.14.1 Statistics (1) (i) Specific objectives The learner shall be able to: (a) define statistics; (b) collecting and organising data, (c) drawing a frequency distribution table, (d) group data into reasonable classes; (e) calculate measures of central trend; (f) represent data
in the form of line graphs, bargraphs, bargraphs, pie charts, pictograms and frequency polygons, g) interpret data from real-world situations. (ii) Content (a) Definition of statistics (b) Collection and organization of data (c) Frequency distribution tables (for grouped and ungrouped data) (d) Grouping data (e) Mean, location
and median of ungrouped and grouped data f) Representation of data: Line graph, Bar chart, Pie char
assumed mean method, (c) make cumulative frequency table, (d) estimate the median and quartile by (i) calculation and (ii) using ogive, (e) define and calculate the measures of dispersion: range, quartile, interquary jam interval, quartile deviation, variance and standard deviation (f) interpretive measure of dispersion. (ii)
Content (a) Average from presumed average; (b) Cumulative frequency table (c) Ogive (d) Meadian (e) Quartile (f) Range (g) Interquartile range (h) Quartile deviation 2.14.3 Probability (i) Specific objectives Eleven should be able to: (a) define probability; (b) determine probability from
experiments and real-life situations, (c) construct a probability space, (d) determine theoretical probability, (e) differentiate mutually exclusive and independent events, (g) state and apply probability laws, h use a tree diagram to determine probabilities. (ii)
Content (a) Probability (b) Experimental probability (c) Range of probability measure 0 P (x) < 1 (d) Probability (nly simple cases) (g) Combined events (mutually exclusive and independent events) (h) Laws of probability (i) Tree diagrams. 2.15.0
Vectors 2.15.1 Vectors (1) (i) Special objectives Eleven should be able to: a) define vector and scalar; (b) use vector tedation. (c) represent vectors, (e) Add vectors, f Multiply vectors by scalar, (g) define position vector and column vector, (h) the
magnitude of a vector, (i) find the center of a vector, (j) define transformation as a transformation as a transformation as a transformation on the Cartesian plane; (b) determine the matrix of a transformation; (c) perform
successive transformations. (d) determine and identify a single matrix for successive transformation, (e) relate identity matrix and transformation, (g) determine and use the ratio of the scale factor and the determining factor of a matrix, (j) determine transformations of shear
and stretching, (i) define and distinguish isometric and non-isometric transformation, (j) apply transformation on the Cartesian plane (b) identification of the transformation matrix (c) successive transformations (d) single transformation matrix for successive
transformations (e) identity matrix and transformation f) inverse of a transformation (g) area scale factor and determinant of a matrix (h) shear and stretching (include their matrices) (i) isometric and non-isometric transformation of transformation to real life situations. 2.18.0 Navigation 2.18.1 Longitude and
Latitude (i) Special Objectives Eleven should be able to: a) define the large and small circles in relation to a sphere (including earth); (b) determine the relationship between the radii of small and large circles, (c) locate a place on the earth's surface in terms of latitude and longitude, (d) calculate the distance between two
points along the large circles and small circles (longitude and latitude) in nautical miles (nm) one kilometres per hour. (ii) Content (a) Latitude and longitude (large and small circles) (b) The Equator and Greenwich Meridian en c)
Radiiin in small and large circles (d) Place on the surface of the earth (e) Distance between two points along the small and kilometers (f) Distance in nautical miles and kilometers along a circle of latitude (g) Time and longitude (h) Speed in knots and kilometers per hour. 2.19.0 Area
approximation i) Specific objectives The learner should be able to a) approximate areas with irregular shapes through counting techniques; b) derive the trapezium rule to approximate areas of irregular shape, d) apply trapezium rule to estimate areas under curves, e) derive the middle-ordinate
rule, f) apply the middle-ordinate rule to the approximate area under curves. (ii) Content (a) Area by counting of techniques (b) Trapezium rule (c) Area through the middle-ordinate rule. 2.20 0 Elementary Calculus 2.20.1 Differentiation (i) Target The student should be able
to a) find average rate of change and instantaneous rate of change, b) find average rate of change, b) find a curve gradient at a point using tangent, c) relate the deltaation to the rate of change, d) find the gradient function of a function of form y = xn (n is a positive integer), e) Define derivatives of
a function, derived function of a polynomial and differentiation, (j) apply differentiation in the calculation of distance, speed and acceleration, (j) apply differentiation in finding maxima and minima of a
function. (ii) Content (a) Average and instantaneous rate of change (b) Gradient of a curve at a point (c) Gradient of y= x (where n is a positive integer) (d) Delta notation (A) or 8 (e) Derivatives of a polynomial (f) Equations of tangents and normals to the curve (g) Stationery points (h) Curve sketching (i) Application of
differentiation when calculating distance, speed and acceleration (i) Maxima and minima. 2.20.2 Integration to the sum of areas of trapezia
under a curve, d) integrate a polynomial, (e) Apply integration when it comes to finding the area under a curve, f) apply integration taktation and sum of areas with trapezia (d) Indefinite and definite integrals e) Area under a curve through
integration (f) Application in kinematics. agriculture form 2 notes pdf athetic history notes atika school biology form 3 notes pdf download history notes form an evolving world history book 1 pdf evolving world history book 4 notes develop world history
