Best android apk games site

on the line! Open world games are interesting. Players have the whole game world at hand. They can explore, do the story, do side quests, and generally walk around the game world as they please. Grand Theft Auto III revolutionized the genre and one of the world's most popular games, Minecraft, is also open world. You can find the open world mechanic in shooters, RPGs, adventure games, and all sorts of other genres. That means you have a lot to choose from. Here are the best open world games for Android.[Read more](#):ARK: Survival EvolvedPrice: Free to play / \$4.99 per month / \$ 39.99 per yearARK: Survival Evolved is an open world adventure game with survival and other game elements. Players try to survive a landscape full of dinosaur life. You can build a base, tame the different dinosaurs for your own use, craft things, and build things. In addition, there is a social element. You can play with (or against) other players and even join Tribes for more cooperative play. The game is free to play with any subscription. The subscription grants double experience points and connections to better servers. Honestly, you don't really need it to enjoy the game. Baldur's Gate: Enhanced EditionPrice: \$9.99 with in-app purchasesBaldur's Gate: Enhanced Edition is a gateway of the popular open world RPG from the early 2000s. It has a long, complex story line along with a massive world you can explore at your leisure. It is a faithful recreation of the original and plays just like the original sans touch screen controls. We recommend this on larger screens because the UI can be a bit messy. Otherwise, it's an outstanding RPG experience. There are in-app purchases, but the only thing you can buy is voice packages for your character. The game also contains all DLCs from the original. The game hasn't seen an update since 2018, but the developers are working on a pretty big patch when this script is. CrashlandsPrice: \$6.99Crashlands is one of the truly great open world games on mobile. It is an adventure game with RPG elements. Players end up stranded on a planet and must pick up the packages they promised to deliver. There are over 500 items to craft, a vast world to explore, and players can even build bases and tame creatures. To top it off, the game includes cloud savings and cross-platform support. This is one you can sink your teeth into and play for a very long time. It's also free if you use Google Play Games.Don't Starve (two games)Price: \$4.99 eachDon't Starve: Pocket Edition and Don't Starve: Shipwrecked are two excellent open world survival games. You are dropped on to an alien world where you have to make ends meet on your own. It has a classic survival theme with some modern twists. There are things to collect, craft, and build while exploring the game world. The game too several biomes and season. The only real drawback is the controls. The touch screen controls are a bit diffuse but it plays much better on a controller. Gangster Vegas: World of CrimePrice: Free to playGangster Vegas: World of Crime is one of the oldest open world games on Android. It's a riff off of the popular Grand Theft Auto franchise. The player is allowed into a city and can cross the city according to be will while completing the story line missions and mission page. There are also a plethora of mini-games like the casino, racing challenges, collectibles, and other things to keep the player busy. It pales in comparison to the large size and depth of a console or PC game like Grand Theft Auto 5, but it's a useful replacement and a great open world adventure game with shooter elements. Try these too:Genshin ImpactPrice: Free to playGenshin Impact is one of the newer mobile open world games. It is very similar to Zelda: Breath of the Wild. You get a huge open world to explore and you can crawl over every inch of it. The game also gives you a glider to make traversing greater distances a little easier. When it comes to games, it's an action RPG with some easy gacha elements. Extra characters unlock through missions rather than dragging them with in-game money as most gachas. We appreciate quite attention to detail in this one and it should remain popular and good for quite some time. Grand Theft Auto series (five games)(Price: \$4.99-\$6.99 each of course we put Grand Theft Auto on this list. Grant Theft Auto III modernized the open world genre and yes, it's on mobile along with Grand Theft Auto: San Andreas, Vice City, Liberty City Stories, and Chinatown Wars. Most people know how GTA works. You get full access to a massive city. There are side quests, story line missions, and various mini-games to entertain you as you progress through the game. You can also steal cars, antagonize the police, and even buy property in the newer titles. Games range from \$4.99 to \$6.99 without in-app purchases. Rockstar Games also has Bully (Google Play link), an open world game where you control a student instead of a gangster or mobster. Any of the six games make for excellent open world experiences. MadOut2 BigCityOnlinePrice: Free to playMadOut2 BigCityOnline is another adventure game with elements similar to Grand Theft Auto. You can steal cars, fight people, shoot things, and cruise around the open world. But this one also borrows some elements from racing games and lets you do things like customize your cars, race people, and do other things. The game also has over 40 cars, different missions, and there can be up to 100 players on a map at once. It's a stylish experience overall, but not quite as polished as Gangster Vegas or GTA. \$6.99 with in-app Minecraft purchases is one of the most popular open world games world games any platform. Survival mode is a pure open world experience. You can my resources, craft things, build things, kill bad guys, fish, and even cross to alternative worlds. There is a creative mode that is open world, but it is more of a sandbox experience than an open world one. You can play solo or with friends and build some really ridiculous things with a little patience. The game is \$6.99 with some in-app purchases for character skins if you like. They're totally optional. There is also Minecraft Earth (Google Play link) if you want to play the game in the real world. OceanhornPrice: Free / \$5.49Oceanhorn is an adventure game similar to the Legend of Zelda series in terms of mechanics. The player gets a series of islands to explore and each is his own little open world. There are various puzzles, mini-games, and things to collect along with a story. It is technically not the open world of the truest definition of the word because there are several areas. However, you can explore those you choose so that you have the same effect. It's not nearly as good as a Legend of Zelda game, but the spirit is there and the soundtrack is by the famous Nobuo Uematsu, composer for most of the previous Final Fantasy games. More Android games here:15 best Android survival games15 best Android games available right nowPokemon GoPrice: Free to playPokemon Go may be the most open world game ever. Players explore the actual, real world and use augmented reality features in the game to actually play. There are gyms and Poke Stops all over the actual world and you travel there in real life to either fight or collect items. The game evolved a lot from its early days. You can fight trainers, take over the gym, collect items, walk around to hatch eggs, and complete missions within the game. The game has the occasional bug and long time players get a little burnt out, but the game is fun and family friendly. Old School RuneScapePrice: Free/\$10.99 per month/\$99.99 per yearRuneScape is one of the most popular MMORPGs of all time. It has also been around for almost 20 years. It's an open world MMORPG with both solo and cooperative play. There are lots of missions and missions to play through, items to collect, gear to equip, and more. The game also has one of the deepest player-driven economies in any game. The free version contains most of the game. You'll get additional skills, a bigger world, more missions, and 400 extra bank slots if you join the subscription service. It is also one of the few MMORPGs with a subscription and not microtransactions. Most MMORPGs are open world and you can check out other excellent Android MMORPGs here. Portal KnightsPrice: \$4.99Portal Knights is an open world action RPG with some sandbox elements. It has all the usual RPG stuff like level progression, a story line, boss and lots of things to However, the game includes a crativ mode where you can build your own island and the world is randomly generated a lot like Minecraft. You can also play multiplayer with other people as well. It's a seriously underrated game and it's surprisingly cheap for how big it is. You can also play it for free with Google Play Pass.Sky: Children of LightPrice: Free to playSky: Children of Light is something a little different in this genre. It's an open world game, but it doesn't feel like a GTA or Minecraft experience. Instead, players are pushing around the world to explore all its oddities. It's a bit like portal knights where there are seven different areas to explore but you're free to explore them at your leisure. So purists may not identify it as a really open game. In any case, it's really fun and we like quite the art style and atmosphere of this one. It's much more relaxed than most others in the genre. TerrariaPrice: \$4.99 Terraria is one of Minecraft's biggest competitors. It takes place in a 2D world instead of a 3D world, but you still have plenty of freedom to explore as you choose. The game includes building, crafting, mining, boss fights, and all sorts of other activities. You'll also get customizable controls and varying sizes around the world just in case you want something massive or smaller. The game was completely redone not too long ago and it is now basically on par with the PC version of the game. It's definitely one of the greats of the genre. Thanks for reading.
