Please check out LICENSE for more information. If you haven't downloaded the trial XML download on the PDF converter here and try it out before buying! Best Price of the Year: XML Viewer allows you to print your SAT invoice: This viewer automatically generates your version of the experience for your xml invoice, you can only download SAT XML and automatically generate your version with one click to print in an account-friendly format. Don't pay monthly, no fees. -Send to PDF -Send to print -Send to PDF and print at the same time -Take command line -Calls from other programs from VB .NET plus data and xml to PDF information converter download free demo with this module you can easily convert xml to PDF, Transformer takes data from cfdi xml file and generates your PDF file in seconds to open the s.pdf file you will only need a free reader adobe acrobat Reader Among other features when converting xml files into PDF, are: -no restrictions on RFC - there are no restrictions on the number of receipts generated - you can call from the command line to make it easier to create steps when generating, leave us a comment or access to chat support for xml for the converter Click on the chat button that will appear to you, we are happy to answer your question. If you want to convert, for example, a batch of SEVERAL FILES from a total of 50, 100 or 200 files, then this other version serves you to convert multiple xml files to PDF at once or watch a mass converter video from xml to pdf here. Soon xml version of the browsing file for MAC Share this page to access discounted prices ..! This service is free but limited if you want to handle large files, connect the system or service, customize the design, send an automated email to register now. Drag the XML\CFDI files here to be converted to PDF. According to the SAT, the original chain is understood as: A sequence of data formed with the information contained in the electronic invoice, which is contained in Section C of Annex 20 to a different budget resolution. The original line is generated by processing an XML electronic invoice (or any other DIGITAL CFD tax receipt) with the XSL or XSLT template (it's the same type of file, it's known as XSLT, but it's customary to leave file extensions with 3 letters, so XSL) that SAT provides according to the CFD version you want to receive. The original chain is a very important and delicate element of digital tax revenue, information that integrates the invoice, why it should be very careful, and for this it is preferable to use previously approved tools such as libraries (JAR or DLL). Below is an example of how to get the original line in version 3.3 using the following elements provided by the SAT: cadenaoriginal\_3\_3.xslt cfdv33.xcd Tax Administration System (SAT) provides for the change of its version from CFDI 3.3 to the new version of CFDI 3.3. At The © we confirm in The © that we are committed to serving you by preparing the scripts and submitting relevant existing documentation on the topic so that you are taken as a precaution and moving to this new billing scheme was as easy as possible for you. More information Here Note: Our Testing Environment is now available for evidence in version 3.3 We recommend testing as needed.
