Share website was always tempting to turn the most mediocre monsters into powerful beings. This Magic Circle, being the essence of Magic Engineering, is capable of doing so, but was banned for ethical reasons. 75000 Fusion Hexagram is a special type of summoning circle that allows players to summon 4-star and 5-star monsters by merging or sacrificing lower-rated monsters. Merging a 4-star monster requires sacrificing three 3-star natural monsters and a 2-star natural monster that have evolved into 4 stars, awakened and leveled at the highest level (30). Merging a 5-star monster requires sacrificing three 4-star natural monsters and a 3-star natural monster that must all be evolved to 5 stars, awakened and leveled to the highest level (35). The three 4-star natural monsters are available from the Hexagram itself. Mana Stones are required for any merger. Not all monsters are available to summon in this way. Players are required to follow a set of Recipes to summon certain monsters, and they also dictate which monsters are needed as ingredients for fusion. The monsters needed for fusion can normally be found in the stage areas or secret dungeons, although some require summoning through mystical scrolls, unknown scrolls or summoning pieces from the Guild Store. It should be noted that enclosed monsters cannot be used as material monsters. And because material monsters are lost after melting, the attached debris will also be lost. The Fusion Hexagram is available in all countries, although the system has been modified in Japan. For Japanese fusion, see here: Recipejedit [ 1 Edition] The following are the monster recipes currently available. Players can only summon the recipe monsters below, and should use the monster ingredients also listed below. Ingredients image recipe
