I love Halloween. This is my second favorite holiday just for Christmas, but holds a special place in my heart because I get back-to-back goodness from my birthday and then, 24 hours later, all the goodness Halloween brings. The people at the DualBoot game (creators of other live wallpapers like Celtic Garden HD) have whipped another for us, this time all haunted and spooky, just in time for Halloween. It's called Haunted House HD, and as far as live wallpapers go, despite being sensitive, it's probably one of the most detailed I've come across. From the moment you pop open a live wallpaper selector and choose Haunted House HD, the Halloween vibe will wash over you. The camera pans the spooky house, shrouded in mist as the light flickers on and off intermittently. Jack-o-lanterns guard the doorway and frightening messages appear above the door in blood. Everything is pretty smooth, despite the fact that so much is going on. The door opens and closes on its own, while the camera sweeps back, the lights turn on, showing a silhouette in the window, and the flag on the mailbox moving up and down on its own will. If you want to go inside the house, you'll have to go to a fully loaded menu setting and change the look of the camera. Inside the house is just as (if not more) busy than the former. The light continues to flicker, the fire is pale, ghostly blue, and pictures of the skull are superimposed on the subject's face. The ethereal steps pulse and disappear on the floor, and strange breezes sucks the chandelier around. It's a lot to take, but it's still great fun. Back to the settings menu when I said loaded, I meant it. You can choose the kind of camera, set the name for the mailbox and doorway, choose the kind of person you want for the pumpkin, and individually turn on or off every variable wallpaper has to offer. If you feel like getting into the festive spirit, Haunted House HD is \$1.99 in the Android Market. We have more photos and download links after the break. Source: Mark Legace/Android Central One of the easiest ways to add flair to your new Android phone is to install custom wallpaper. You can choose from a choice of default wallpapers that came with your phone, use a photo from your gallery, or download cool wallpaper. Immersing yourself in your phone's settings allows you to set a custom image for both the lock screen and the home screen together or separately, but the replacement process in the new home screen wallpaper is simple no matter what phone or launcher you're using. Changing wallpapers on Pixel or promotions Android Changing wallpapers are basically the same in all Android phones, but some small differences depending on the phone, making it easy to remember, and easy to do when you switch to a new Android device. Tap and hold home Click Styles and wallpaper from falling down Choose from wallpaper collections on your phone or from third-party apps. Source: Android Central Click wallpapers that you want to use. Adjust positioning and size, then click Set the wallpaper in the bottom right corner of the screen. Choose whether you want to install wallpapers for your home screen, lock screen, or home screen and lock screen. Source: Android Central Changing wallpaper on a Samsung device Changing wallpapers on a Samsung device is just a little different from the method described in detail above. This is because Samsung gives you more options than most other phones. Tap and hold on the home screen Click the wallpaper icon in the bottom left corner. Choose new wallpapers from the Samsung My wallpapers list, choose from your photo gallery, or choose other options under Explore More Wallpaper. Source: Android Central Once you choose wallpaper, choose whether you want to install wall paper for your home screen, lock screen or both home and lock screen Click set as wallpaper to confirm. Source: Android Central Note: This method works with Samsung devices running Android 10.0 with one user interface 2 and above. Change wallpapers with Nova Launcher and Action Launcher Most phones use this method to change your phone wallpaper. This makes it easy to remember, and easy to do when you upgrade to a new Android device. Tap and hold the home screen. Tap the wallpaper icon in the bottom left corner of the screen. Choose from wallpaper collections on your phone or from third-party apps. Source: Android Central Tap Set wallpaper in the top left corner of the screen. Choose whether you want to install wall paper for the home screen, lock screen, or home screen and lock screen. Source: Android Central Need help finding new wallpapers? Want to give your phone a fresh new look, but do not know where to find the best wallpaper for your smartphone? We've collected the best sources to find your next favorite phone wallpaper. Accessories in addition to your new Popsockets wallpaper are a great way to add some clutch ability and security to your great phone and bring your own talent as well. In addition, they can double as a stand as a last resort. Spigen makes some of the most stylish and durable phone cases around. Choose from options for Samsung, Google, LG and more. We can earn commissions for purchases using our links. Learn more. szefei/123RFLive wallpapers, an Android feature that lets you set animated or interactive scenes as your phone's background, are a great way to decorate an otherwise static home screen. While the first crop tends to suffer from technical deficiencies such as excessive Battery and poor performance, live wallpapers have come a long way in that time since then. The newest offerings are attractive and lush, providing fluid and attractive backgrounds that show the show From simple textures to quirky spaceships that are quietly puffing through the emptiness of space. Here are our picks for the best free live wallpapers for Android, so you can spice up your smartphone or tablet background without having to dip into your wallet. Installing live wallpaper Before you see what beautiful android community developer backgrounds the developer has to offer, you need to know how to apply them. Fortunately, this process is not complicated. The first step is to install live wallpaper (or more) from the Google Play Store. Once this is done, you are almost home for free. Step 1: Tap and hold on any home screen. Step 2: Click the wallpaper in the resulting menu. Step 3: Click Live wallpaper. Step 4: Choose live wallpaper from the list. Step 5: Tap the gear icon in the top left corner to customize live wallpaper settings. Step 6: Click Set wallpaper to set live wallpaper as a background. Great live wallpaper For many people, there is nothing more soothing than coniferous countryside. Forest Live Wallpaper depicts a dense forest set against the backdrop of majestic mountains, and boasts many dynamic features. The intuitive cycle of day and night gradually brightens and disappears the colors of the wallpaper to correspond to the time of day, and the starry sky appears after dusk. Trees also move as if they are experiencing wind. The weather conditions of the landscape even simulate your local forecast - customizable wind, rain, snow and clouds are all present and taken into account. Google Play There's something mesmerizing about water droplets dribbling down the glass, and this sense of Raindrops Live Wallpapers captures perfectly. But live wallpaper, which has high-definition video footage of raindrops on window panes, has more to offer than just rain and grey skies. The subtle blur effect prevents drops from obscuring shortcuts and widgets, and wallpaper is optimized to consume low resources and save the phone's battery. These are the best parts of a rainy day... Without water. Google Play If you've ever wanted a cat without the hassle of changing litter or stocking your living room with squeaky toys, Stalker Cat Live

Wallpaper might be the best choice. The live wallpaper depicts a mischievous, silhouetted cat that moves around the edges of the screen. It pops up from random places along the edge of the screen and becomes smug if he thinks you haven't noticed it. Anna Pyatzke - the wallpaper artist - describes the little creature as subtle and charming, and we couldn't agree more. Google Play It may not be on par with the beautiful work of Naohiko Aoyama in Paper Mario, but, nevertheless, Paperland is a beautiful realization of the two-dimensional world of parchment. The free version includes five themes - Beach, Silent Night, Desert Migration, and Grass - each of which with the same customizable aesthetic. You can choose a fixed time of day, or let the sun rise and set according to the current time zone. Additional options allow you to change specific scenic elements, such as tree leaves and the height of different hills, not to mention kinetics, such as the speed of scrolling. The Google Play Galaxy Collection is a pretty reliable proposition if you consider some of the threadbare wallpapers in the Google Play Store. You are given the choice of issuing Ice, Inferno or Vortex Galaxy, although we prefer the Version of Shadow, given that it functions as a dark, thin background. The wallpaper essentially places your device in the middle of a stellar galaxy, just like a spaceship shooting the universe. Changing options include the number of stars and the speed of the sky's animation, but we were happy by default. It's mind blowing. Google Play Is a Cooler Live Wallpaper There's a cheaper way to travel than by plane or ship, and it's called City Night Live Wallpaper. The wallpapers have a curated collection of animated metropolises that will take your breath away, including brilliant Tokyo, shiny New York, cold Toronto, and dozens of other places. Each feature moving landscapes and flashing lights that reflect the changing time of day, a selection of several different background themes, and a social button that allows you to share particularly picturesque backgrounds with friends. It supports horizontal orientation and battery-saving function packs, too, which darkens the screen automatically when your phone is inactive. Google Play Whether you are a novice meteorologist or an atmospheric fan, there is an advantage in keeping with the weather. Enter Weather Live, a dynamic backdrop that provides up-to-date collection of climate statistics from around the world. Want to tighten the current temperature in Los Angeles? It's perfectly possible. You can also assign effects such as raindrops, light bands, and faded colors, allowing your phone to better reflect current conditions. You can even check the forecast in real time with satellite data, and the built-in algorithms extend the battery life. Google Play These days, emojis are everywhere. They have keyboards. They are the main subject of the upcoming blockbuster. Enter Emoji Live Wallpaper, a high-definition background that boasts cute, enjoyable and shiny emojis. Every time you swipe or tap the screen, they smile back or show their love with cute little streams of animated red hearts. The wallpaper is even customizable - you can increase the speed, size and density of the items - which means you can quickly adapt it to your liking. The efficiency of the wallpaper battery is only a plus. Google Play Ocean Wave Rental Can Cure All Trouble... or at least you feel like a little better on melancholy afternoon. Fortunately, Ocean Live Wallpaper has a beautiful sunset over an undisclosed Florida beach, along with the sound of waves and various visual effects designed to suit your current mood. The wallpaper is also optimized for phones and tablets and features a battery-friendly feature that extends the life of your device outside the charger. Apparently, there's a reason it remains one of the best wallpapers in the Google Play Store. Google Play Nebula can take the crown when it comes to distracting wallpaper, but does it with such artistic flair that you can't help but ogle. With Nebulander, your Android background becomes a space, crowding screen with an array of attractive clouds, planets and a steampunk-inspired Digger airship. You'll have to fork out a few bucks to access all the features, but the free version doesn't save you any money. You have the freedom to adjust the airship's altitude, size and speed, as well as the ability to throw debris into space, take the astronaut out of the spaceship upon landing or launch a scanning probe. It's easily one of the most creative - and addictive - live wallpapers we've seen. Google Play More live wallpapers Sometimes you just want to get lost in space, and when the time comes, Vortex wallpaper can help. It essentially sends your Android device on a whirlwind tour of distant galaxies, bringing a real rainbow of bright nebulae that come spotted with distant planets, constellations and other gas phenomena. This one is replete with controls that accelerate the camera angle and switch stars on and off. Google Play If you envy that your friends with broken smartphone screens get all the condolences, or are just desperate to convince their parents or other significant that your phone is in dire need of a replacement, you could do worse than Broken Glass Live Wallpaper. True to the name of live wallpaper, it mimics the glass that was through the squeeze. You are given four designs to choose from and have the freedom to choose the background, crack type, and the size of the crack from the menu of detailed settings. The cracks in question are also triggered by a simple tap. Pressing once cracks on the screen and reproduces the sound of broken glass, while tapping twice clears the cracks. Google Play If you are an indecisive type, Muzei is a good option. The wallpaper app updates your home screen every day with famous artworks that recede in the background, blurring and blacking out to keep your icons and widgets in the spotlight. If you prefer a more personal touch, it can pull your own artwork and set it up as wallpaper. It can also import galleries from other apps that you happen to have installed. Google Play Prefers Something A Little Geeky? Take Device Info Ex Ex Back. Live wallpaper shows real-time information about the device taken from your modest smartphone. You'll see the time and date, the phone processor and memory usage, the latest known Wi-Fi network and even the current compass. Almost every setting is exposed, including background color, background brightness, text color, animation speed, and layout. The aesthetic, which takes a cue from the IBM-era byte code, completes the package. Google Play Not all wallpapers have to sparkle and shine to stand out - just take Minima Live Wallpaper as an example. Wallpaper channels Material Design, a minimalist design language presented in Android Lollipop, and has over 35 handmade themes that respond to shifts and tilts. You can change colors if you like, and the app's premium colleague boasts a theme creator that lets you create a custom background. Google Play Editors' Recommendations
