## Fnaf 3 office ucn

in: Locations, Main Series Locations, Ultimate Custom Night Share FNaF1 • FNaF2 • FNaF3 • FPS • UCN Arr, so much more spacious here! I can stay a while. - Foxy complimenting about the office, Ultimate Custom Night Freddy Fazbear's Pizza (UCN) Office that appears in Ultimate Custom Night is far overthe of reality, two-door, a vent, a side vent next to the right door, and two giant hoses in the ceiling, resulting in six different entry paths for animatronics to attack the player. Added to this are two hidden hatches used by several animatronics (notably Bonnie Toy, Toy Chica, Bonnie Withered and Deep Ee), and they cannot be closed. This special desk features different items and Easter eggs found in all the games in the series, and pressing Freddy's plush nose on the desk will make a honking sound, just like all past games. Office Gameplay has six openings through which antagonists can access the camera, and the player must follow these openings both on the Monitor and in Office itself. There are two doors in the Office, one on either side of the player. Many animatronics can appear outside these doors on cameras, and the player must react accordingly to which animatronics are present. In addition, some animatronics, namely Nightmare, Nightmare Fredbear and Ballora, can only be seen or detected directly from inside the Bureau, invisible to cameras, and the player must close that door when these antagonists are detected. There are also two holes that lead into the Office, one directly in front of the player, and one on the right. Most animatronics can only be detected in the front ventilation through monitors, although some, such as Springtrap and Withered Chica, are visible from the Office itself. The lateral ventilation cannot be viewed from the Monitor and the player must supervise it from inside the Office to remove potential attackers. In addition, there are two large air hoses that lead directly into the Office from the ceiling. They may not be interacted with from within the Office itself, nor can they be seen in them within the Office. Instead, the player must check on the air pipe screen on the Monitor to determine which animatronics (Mediocre Songs) are closest to the player. Although there are two separate pipe tubes leading into the Office, only one can be closed at a time, which means that if there are animatronics crowding both pipe inputs, the player must use audio bait or heating to distract some of them, or else they can get overwhelmed. There are also several unseen trap doors leading into the Office, which cannot be interacted in any way. Withered Bonnie, Bonnie Toy, and Chica Toy enter through these doors several times a night, and the player must don Freddy Fazbear Head to remove them. Many animatronics appear directly in the Office throughout the night, either permanently in the room and occasionally becoming active or appear only on certain occasions. These include: Rockstar Freddy, Nightmare Balloon Boy, Nightmare Freddy and Music Man, while the latter includes Nightmare, Golden Freddy, Nightmare Chica, Phantom Freddy, Rockstar Foxy, Rockstar Bonnie, Scrap Baby, Helpy, Dee Dee, Trash and the Gang, Bonnet and Minireena. These antagonists all have very different ways of approaching or attacking the player, and can be driven away in different ways, depending on which animatronic poses a threat at any time. In addition, other antagonists can also indirectly harm the player, without even making any direct physical appearances in the Office, such as Funtime Chica, El Chip, Lolbit, Phone Guy, and Old Man Consequences. These antagonists can each be prevented in their own unique ways, usually involving either an interactable or pressing specific keys. Skins Unlike other games, Office in Ultimate Custom Night can be customized with skins representing various games. Each skin is unlocked by passing a certain score threshold and each skin focuses on a particular game in the franchise. Strange trivia, found in the game files, there is an office from the first game-skinned Office that appear in a smaller scale. Animatronics The wet floor sign used to remove Rockstar Chica, facing left. The wet floor sign used to remove Rockstar Chica, facing right. Bonnie's figure that appears on the desk when it's active. Candy Cadet, that's how he appears in the office, briefly activates. Fredbear's hat so appears on the desk. Add a photo to this Locations gallery in the main series Ultimate Custom Night Community Content is available under CC-BY-SA, unless otherwise stated. Share Comments Have you been looking for office since the sixth game? The main office FNaF:SL Theme FNaF 3 Theme FNaF 4 Ultimate Office theme is the office presented for Ultimate Custom Night. Appearance The structure of the office The structure of the office is mainly similar to FNaF 1, FNaF 2 and Sister Location. The main appearances are the office walls of the third game, the confetti tile floor from the sixth game bought as from a catalog, the main table from the second game with Plushie Freddy and the microphone on it and another table from the first game, two doors, two vents, and two circular holes poking down from the roof of the office. In the left corner, there is Candy Cadet being disabled, behind it is a box full of masks and props from the third game, with also a sign of output coming from the same game, oxygen tanks, a baby circus and Funtime Foxy poster, and a camera coming from the fifth game, drawings from both the first and second game. In the right corner, there is the spare Freddy costume from the third game, balloons and a Lets Party banner from the second game, drawings and a puppet poster from the sixth game, a speaker from the fifth game, an ennard mask and a warning sign can also be found behind the fan is the toy caterpillar of the fourth game. The structure laying the ventilation system that exits through the vent on the wall, is a separate system from the pipe system that exits through the two hoses hanging down the ceiling. Characters in one system have different mechanics than those that appear in the other. These two systems rely solely on sensors and have no cameras. The camera system is the third which will monitor the hallways and other rooms. Rooms. There are three skins for the office, so it does not affect other locations or cameras, the skins are: FNaF: Sister Location - FPS Theme Skin This is unlocked to a score of 2000. FNaF 3 Theme Skin This is unlocked at having a score of 5000. FNaF 4 skin themed This is unlocked at having a score of 8000.
