And when this handbook is the Rules for Writers, you can be sure that the tips they find are practical and reliable – by using to compile and review, write arguments, analyze texts, use grammar and punctuation correctly, and work with sources. Reviewing the eighth edition, Nancy Sommers placed a new emphasis on reading critically throughout the first chapter of the manual, presented advice on analyzing multimodal texts and added help for public speaking. New practical writing manuals support students who work through college assignments in different genres. And new peer review tips help students effectively comment on drafts and apply feedback to edits of their own work. All these improvements help student writers – but they also save you time and effort. You can take from the Rules for Writers to plan class discussion, hold class seminars, and provide feedback on student work that they can easily apply. The rules for writers even come with a full instructor's guide, teaching with hacker manuals, with burnt lesson plans for customization and sample assignments, syllabi and rubrics from your peers. As college teachers, we have an important mission. We prepare students to write for different purposes and for different audiences. We show students how to read and write effectively, preparing them for constant research conversations as participants (not just consumers) of ideas. In college, students learn to write, and they learn through writing. Effective writing is fundamental to academic success - in all disciplines. When you accept the rules for writers for your students, you send an important message: Writing is worth learning and learning. And you give students a resource to answer their questions and learn from the answers. College writing high stakes: Students learn to become teachers, biologists and criminal justice professionals by writing. They may focus on psychology or economics, but they are more likely to write in every college class they take. The rules for writers are one text that students will need for all their college work. When students have a reliable guide to answer their questions, they become more confident writers. Confident college writers are more flexible students; they are more willing to try new approaches and they feel comfortable thinking critically. I recently interviewed 700 first-year writers about the relationship between using a handbook and a writer's confidence. When students were asked about this relationship, 79% of the survey participants, many of whom use the Rules for Writers, reported that using the handbook made them more confident academic writers. Students reported that using rules for writers helped them become more effective and effective writers than if they were simply looking online for answers to their comma questions, such as quoting and documenting sources. A Google search can trigger 46 million results on your comma-usage question, but these results are more confusing than lighting, and never as simple and authoritative as the trust-building instruction they get by relying on rules for writers. Each new feature in the eighth edition is designed to answer students' written questions and address the specific challenges faced by students as college writers. And every new feature of the rules for writers is designed to support your learning handbook. One such special feature is the emphasis on the relationship between critical reading and writing effectively. The eighth edition shows students how to read carefully to understand the author's ideas, how to read with skepticism, to question these ideas, and how to present their own ideas in response. The entire section of academic writing focuses on important reading and writing relationships, because more and more students learn to take from their reading, the more they should give as writers. My goal in reviewing the rules for writers was to create an even more useful class resource to save time and increase student learning. The eighth edition informs the teachers and students who use it and who have helped me to look at the writing problems faced by students and the practical solutions they need to become confident academic writers. You will find new instructions for effective peer review, successful rephrase, accurate citation of online sources and meaningful research — turning topics into questions, finding entry points to the debate, assessment, integration and citing sources. And you will find step-by-step tutorials on that will help students write common tasks, such as an annotated bibliography. Teaching with rules for writers has become easier. Never. The eighth edition is now available with LaunchPad Solo for Rules for Writers, an online product with assigned exercises, sample student writing, and other resources. I have included Writing Practice offers to help students apply handbook advice to their own projects and disable practice with basic academic skills – dissertations, research questions, peer review and more. You and your students will also find the video; practical exercises for grammar, style and citation; and LearningCurve, game adaptive quizzes. As the author of the Rules for Writers, I bring in this guide the belief that writing is worth studying and learning – that all students who use this book will learn to read deeply and write clearly what they will find in their reading ideas that they care about, and that they will write about these ideas with care and depth. I want to share this guide with you, knowing that in the eighth edition you will find everything you and your students trust and appreciate the rules for writers. Writers.
