While you don't have the fate to spend on sound magnifying, it's easy to set your sights higher from the ground up. Introducing the new SP-FS52 Level Standing Speaker rather than the Pioneers. Designed with attention that doesn't spell out in detail, this speaker is suitable for home theater systems, offering exceptional audio quality from CDs, videos, games and any other audio source. Using three 5-1/4 inch woofers with large magnets for powerful bass, this speaker conveys the kind of high achievement and exceptional quality that makes for an amazing music and home theater experience. Over 7 Decades of Excitement for Audio-splfs52 A Taller Speaker The Inside Story Although you have no fate to spend on sound magnifying, it's easy to set your scene higher from the ground up. Introducing the new SP-FS52 Level Standing Speaker rather than the Pioneers. Designed with attention that doesn't spell out in detail, this speaker is suitable for home theater systems, offering exceptional audio quality from CDs, videos, games and any other audio source. Using three 5-1/4 inch woofers with large magnets for powerful bass, this speaker conveys the kind of high achievement and exceptional quality that makes for an amazing music and home theater experience. Over 7 Decades of Excitement for Audio-splfs52 A Taller Speaker The Inside Story Overview Videos docs Pioneer has been the industry leader in audio and engineering design for over 70 years. Designed by The Chief Speaker of the Pioneer, Andrew Jones, this speaker encompasses all his expertise and lavish enthusiasm for pure audio breeding. And during audio Happily paying as much as \$80,000 for some of Andrew's designs, you'll find this new SP-FS52 speaker far more affordable. When we designed SP-FS52s, we listened carefully to what users said they wanted. As a result, we increased the height of the speaker by 3 inches. The result is better sound quality because the speakers are closer to the ear level. Whatever your system, or your audio source, the Sp-FS52 Floor Standing Speaker is ready to bring your listening experience to the next level. Crossover: The crossover work in the speaker is to break the audio signal into low, tall and sometimes middle frequency. It's an important job, and it uses circuits like cutters and capacities to achieve it. Most competitions use very simple crossover and low cost consisting of single capacity and inductor. Pioneer SP-FS52 uses 8 sophisticated components of high-quality crossover. The reasoning is simple: we do it because it is one way to insure high-quality sounds that make its presence known. Woofer: There are many challenges designing and manufacturing feathers capable of delivering true bass performance. In SP-FS52, we have added structured surfaces to the feathers 5-1/4 inches. In doing so, not only does the thickness improve, as is the accuracy of the bass. Engineers have also created a piece of pole, again increasing the bass response from the same size woofer in the previous model. Tweeter: To widen the sweet spot of the 1-inch High Efficiency Soft Dome tweeter, we have engineered a custom wave guide. Increasing the efficiency of tweeters, along with newly designed crossovers, allows for stronger SP-FS52 games to use less power. Even if you don't have the luck to spend on speakers, it's easy to set your sights higher starting from the ground up. Introducing speakers standing the new SP-FS52 Floor from The Pioneer. Designed with uncompromising attention in detail, this speaker is suitable for home theater systems, offering incredible audio quality from CDs, videos, games and any other audio sources. Using three 5-1/4-inch woofers with a huge magnet for powerful bass, this speaker delivers a kind of high performance and incredible quality that makes for amazing music and home theater experience. Experience.
