The hadiths included in the app are only in Arabic and English. Although we would like to add more languages, we do not have the necessary hadith databases for other languages. Hadiths are available in this app as a resource for research, personal study and understanding. The text of one or more hadiths alone is not accepted as a ruling by itself; Scientists have a complex process using the principles of fiqh to come up with ordinances. We are not in favour of making fiqh itself by using these hadiths for those who are not trained in these principles. If you have a question on a specific ordinance, please ask your local scientist. Access to thousands of hadiths from a collection of four authentic hadith books: Sahih Bukhari Sahih Muslim by Sunan Abi Daawood Al Muwatta Sahih Bukhari Is seen as the most authentic collection of Ahadith, it covers all aspects of life. Iman Buhari took 16 years of compiling hadeeth. Sahih Muslim, a Muslim ibn al-Hajaj (204 AD to 261 AD) traveled extensively and collected 300,000 hadith, of which about 4,000 were extracted for inclusion in his collection on the basis of the strict accepted criteria of Noonan Abi DaawoodAbu Dawud collected 500,000 hadiths, but included in this collection only a few thousand. It took him 20 years to collect the hadith. Al-Muwatta al-Muwatta is a complete account of the legal and social parameters of the original Muslim community. The imam, Malik ibn Anas made up Muwatta for forty years, he chose only about 1% of the authentic Ahadith for inclusion in Muwatta, of the corps of 100,000 narrations available to him. The app closes it yourself often makes you your position 2. secondly, the font cannot be adjusted.
