## The maze runner book review

In recent years, the post-apocalyptic book genre has taken over the world with a storm-filling bookshelves and the enthusiasm of readers around the world. But with the growing popularity of this market, an influx of new books has followed, and as such it is increasingly difficult for readers to find good postapocalyptic novels. For example, The Maze Runner, one of the most popular novels in the genre, James Dashner managed to transcend the status quo and produce unique reading. The story is set to a distant future, where a group of teenagers mysteriously teleports into a gigantic, stone maze. Not only was their memory obvious, but they also have no indication of why they ended up in this situation and what means they should take to escape. Their situation gets even more complicated, given that the labyrinth doors close every night. At night, evil monsters are free to run and devour all people in their own way. The teenage girls, who have declared their name groverse, are trying to map the maze, but this poses obvious threats to their safety. Enter Thomas, the new Grover, coming into the maze. When he learns about this new reality, the story follows his point of view in the perspective of the first man. Thomas eventually hates himself with life like Grover, but one night, as he crosses into the interior of the labyrinth, his world turns cross. With time, Thomas must face these imminent struggles while trying to solve the great mystery of the labyrinth. Throughout the novel, readers feed on the edge, with hidden twists and turns on every turn of the chapter. I would definitely recommend this reading for teenagers and adults. While it is true that the novel is aimed at a young demographic, his conspiracy also deals with some of the most mature readers. The end simply cannot be predicted, so readers themselves speculate about the mysterious origins of the labyrinth. One complaint I can make is that there is a slight lack of character development. The plot is so action-packed that he could see that Dašner decided to release some of the more subtle threads of a good novel. If you choose not to read this novel, I would suggest an alternative to Lord of the Fly William Golding. The plot has some parallels with that of the Labyrinth Runner, but it makes up most of its imperfections. Overall, The Maze Runner is a top-notch post-apocalyptic teenage novel, making it an attractive read. The story illuminates the natural instincts of teenagers under true solitude. This echoes a number of topics that leave readers with meaningful questions about the life, nature and purpose of humanity. Reviewers Grade: 10 The Maze Runner Trilogy Review by Sarah Curtis The Maze Runner Trilogy was written by James Dashner and is now a popular film series. Here is a brief summary The first book in the trilogy, The Maze Runner: Thomas wakes up in a dark box. He doesn't remember anything, as long as his name is Thomas. The box rises and opens to reveal another 50 teenage boys in their home, The Glade. Like Thomas, boys don't remember their life before Glade. Every boy plays a role in Glade and in two years of life here, they built buildings and harvested plants and food from their necessities, which are shipped once a month with a new boy from The Box. We'd probably find a way out by now - if there was a way. Glade is surrounded by a labyrinth. Some people in Glade are Runners. Every day at sunrise, the labyrinth door opens. Runners search the maze every day, hoping to find a way out. But every night, when the doors to the Labyrinth close, the paths change, making it impossible to escape. Runners must return to The Glade before the gates of the Labyrinth close and let them spend the night in the Labyrinth, and no one spends the night in the Labyrinth. Want to know more? Read James Dashner's 'The Maze Runner' trilogy, I really enjoyed 'The Maze Runner' and although it's often compared to the 'The Hunger Games' and 'Divergent' trilogy, this series was more interesting to me than the other two. In my opinion, the Hunger Games and Divergent can be quite boring after the first book. I think it's because they're very repetitive. For example, in the Hunger Games, they constantly kill characters that are important to the main character, Katniss. This reinforces her hatred of President Snow as he takes away her loved ones and gives her more reasons why she should kill him. The same looks in the Divergent series between Tris and Jeanine. There are some similarities in the 'Maze Runner' series, but there are mysteries and huge complications that can completely change your opinion of the character. The Maze Runner trilogy is certainly one of the best book series I've read and I recommend you read it. It really upset me when I faced the reality of how I feel about this book, but I have to say it. I don't like Maze Runner nearly as much as I used to. It's out there, it's out there! In all fairness, this was only the second young-adult dystopian novel I had read at that time (the first is the Hunger Games). I was young. I was naïve. At the time, I wouldn't have the author's writing style or his character development. I didn't care about, much less the notice, the complications and the amateur writing. It really interrogates me that I didn't realise how two-dimensional Thomas was or how the writing was barely tolerated when I first read it. I know I feel like I hate it now, but I still like the book. Originally published as It's tense and has more I always liked the concept of Lord of the Flies, which the author states was his inspiration for Labyrinth Runner, but he generally left me dissatisfied. The premise for The Maze Runner, however, is incredibly interesting: a group of teenage boys with no memories trapped in a maze. At first I thought it sounded interesting enough, but something stopped me from reading it right away. I assumed it was too unusual to start reading right away. I'm sure my initial thought of Maze Runner before reading synopsis was something like that. The reader has no idea what's going on from the beginning, and I immediately tell you to get frustrated. No soul will answer Thomas' questions. I'm stuck with you, and I want to know WHY! But, be it annoying, it's also one of my favorite aspects of the book. I had to know what was going on, just like Thomas, and I didn't put the book down until I found out, even though it took a little too long to pull, if you ask me. I also imagine that it would be quite funny if I were a teenage boy and I don't remember seeing a girl until Theresa appeared...-The Characters-According to psychological studies, the average person prefers to have bad news before the good news. Hmph, very good. Let's start with our special snowflakes. When I first read Maze Runner, I thought it was okay, but now... I'm not going to wear it. Thomas is one of the most underdeveloped two-dimensional protagonists ever. Dashner doesn't realize there's a good line between courage and stupidity. Almost every heroic, self-sacrificative act that Thomas sings in the book is simply silly, unrealistic and frankly suicidal. I've always hated Teresa. Nothing serves the plan except for Thomas's interest. For??? Why must there always be a love interest in each of these teenage dystopian novels! If you were a useful person, I wouldn't bother her so much, but she didn't. Character development? I don't remember anyone. Nothing. Zip. Nada, I'm sorry. He's got a personality... But it's a complete softening. I love a female heroine, but she's just a right-handed fool. Ah, my knight in shining armor. What, you don't think I can resist on my own? Who does she think she is? Chuck was great! If you ask me, Thomas didn't give Chuck time (another reason to hate him), but every time Chuck showed up, he'd just complain and listen. It doesn't have to be Chuck's funniest character ever, but he's so likable. And the actor who orders him in the film is perfect. I thought I'd point that out. Oh, Minho. What can I say? I love him! The sarcastic, snip-ass boys are mine. His comments were the best. Actually, I liked it when Minho made this less noble decision in the Labyrinth. That was real! I don't quite agree with him, but it's proven that he's not a perfect little angel (like a certain other person... Thank you to James Dashner for not calling him Kai. Is it just me, or why does it seem that every Asian named Kai or Ky?! Newt was amazing, too. He was the voice of reason in this book, whenever Thomas suggested anything, well... As Newt would say, stupid, he's the one who hit some sense into him. I think I liked Minho a little bit more than Newt, but I liked them both a lot. As for the other characters, I wish they'd developed more, but they were all so boring, I didn't care less. Gally was interesting, but he wasn't so much in the book - really a shame, because the last part of the book would have been so much more emotional.-The Writing-I wasn't paying attention to writing until I actually tried to write the book last year. In doing so, I realised that it was surprisingly quite difficult to write a full-time novel. I have a beginning and the end of what to accomplish in between... The first rule of writing is to show you don't tell. Dashner tells the reader what's going on and how Thomas feels. I know that probably didn't bother a lot of people, but it's just a big pet of mine. But I like slang. It was fun.-Final Thoughts-I think it really makes me feel in this book, it has had so much potential. If another author wrote that, he could be amazing. I really liked the concept, a few characters, and the setting, but it's generally very shable reading. Despite the mistakes, The Maze Runner was still a fun read, which I would recommend to newer YA fans of dystopias. dytophya.
