The note sheet is the format in which the songs are recorded down. The note sheet begins with an empty staff music paper consisting of graphs that have five lines and four spaces, each of which is a note. Songwriters who compose songs in standard musical notation use regular paper to create notes that can then be passed on to musicians who interpret notes for musical performance. Today, making your own notes easier than ever. With notation software such as finale, or free web service Noteflight, everyone can turn their musical ideas into professional music sheets. Use Noteflight to get started (see Resources). Noteflight is a free music note service that lets you write, print, and even save notes as music files to play. Noteflight has a clean, easy-to-use interface that allows even a beginner to create a song in notes. Since Noteflight allows you to listen to what you've written, you can experiment with different notes until you create something that sounds good, even if you're not familiar with the music. Create a Noteflight account and log in to start creating your own note. You can start writing your song immediately. At the top of the page on the toolbar, click the New Account button to create a blank sheet note document. Choose whether you want your note to be private or collaborative. Noteflight presents you with a clean music sheet in Key C with 4/4 signature time. Click the Name Change button at the top of the music sheet and enter the title of your song, then click Edit Composer and give your name. Make any changes required for your key signature or signature time on the Score menu either with Change The Signature Time or Change key signature command. Add notes and rests on your notes by clicking on the empty music staff. A note appears and you can drag and click where you want the note to appear. You can also use a floating palette to select different note durations. When you insert notes, Noteflight automatically re-formulates the notes to save the right number of strokes on the bar. To listen to what you've written at any given moment, go to the Play menu and choose the playback option you want. Print the notes when you're done composing your song. The result will be a professional score of your song composition. You can also use Noteflight to make an audio file of your composition. Noteflight allows you to assign the actual sounds of the instrument to the respective parts. Go to file and select Export to save the finished note as an MP3 or a file of a shuffle. This allows you to take an example of a record for Group. Find the perfect Christmas soundtrack for any occasion with everything from soft piano and soulful classics to K-pop and metal.
