For immediate assistance please call us. Previous page Back to previous home page return to home page Grainger 1-800-GRAINGER (1-800-472-4643) (1-800-472-4643) you don't count your existing coverage. Note: Length (L) is always expressed first, followed by height dimension (H). Many of our ventilation grilles include directional patterns so it is vital to provide both dimensions in their respective order. Note: This is the aperture measurement (inside). The total (outer) size of your cover will be larger than the opening size-- this accompanies the outer border section of the cover where the screw holes are placed. The actual dimension of the inner cover flange will be slightly smaller than your rough opening size--this is to ensure that the flange or damper fits comfortably inside the duct opening. If a duct opening has limitations in terms of external dimensions because it has to fit within the limited space of a toe kick, or is too close to the adjacent wall/ceiling you may require an external custom dimension. Most of our laser cut metal covers (in addition to fast boat items), as well as our wood covers can be customized to fit the right border size you need--if you need a custom external dimension please leave us a note during purchase completion. There is no need for accurate measurements, you can round the measurement to the nearest size 1/2. e.g. If opening your duct measures 9-3/4 x 9-3/4 a 10x10 cover will work. If your duct opening is rounded to the nearest 1/2 size and you still can't find your duct opening size listed don't worry. Many of our covers are available in custom sizes. Click here to fill out the custom size request form. Don't worry, we can adjust the size of your cover to fit! In many cases you will need to size down the cover to ensure its cover and accompanying borders will install your pipeline. This is done by subtracting the border size (usually 1-1.5) from the opening size. e.g. a 10x4 duct opening that butts onto a wall can be covered by a 10 x3 cover. Please call us if you are not sure about your measurements. Measurements.
