This engine, like that of the E-Tec series, can be considered unique in terms of performance, reliability, consumption and pollution. E-Tec technology makes these outboard engines the cleanest in the world, along with exceptional torque and power values. No scheduled maintenance for three years and no running-ins to do. Minimal consumption thanks to the layered combustion of the mixture, all managed electronically, and up to 5 hours of oil-free navigation (without engine damage) thanks to the S.A.F.E. system and emergency manual start-up. The 25DTE model is 2-cylinder in-line (578 cc), aluminum propeller, weight 72 Kg, power 19 Kw (25 Hp) at 5500 rpm, maximum speed 5000/6000 rpm, 75 amp controller controlled by computer and variable voltage with 1100 Watts output power.
