Download Five Nights on Freddie 4 v1.1 Halloween Edition The full version is the best horror game for PC box, and the Halloween edition is released on October 30, 2015. Five nights on Freddie 4 v1.1 Halloween Edition Full Cracked by SKIDROW so scary! You have to play this for scares! and the suspense that there is animontronic in the door kills me! PLAY THIS GAME!!!! The game is in some ways harder for most people to play because of its breath mechanics, an interesting twist on the formula that has been with the five-night series to begin with. In five nights at Freddie's 4, your flashlight is not only your savior, but your fall. One flash of light at the wrong time can cause animatronics to feast on you, guaranteeing the GAME OVER screen and the need to change your pants. The only mechanic to get your robot friends out of your room is the Door mechanics, similar to the first game. Except here, you are not limited to power, but by time. If you spend too long on one door, chances are another animatronic entered your room through another door. At times the door mechanic is a bit cruel for some people, you have to listen to the door and decide to hide in the dark behind the door or shine a flashlight down the hallway. While the breathing mechanics were frustrating to deal with for some, I felt it was a good gameplay change. Does it add should I really use my light? The element that the other Freddie game missed, since the flashlight always kept you safe. I felt that the mechanics used in the gameplay were solid, and I rarely encountered any errors. However, some people have had trouble breathing the sound of not playing at either the right time, or during the door closes. Fortunately, I didn't have this problem. It's debatable if it was a mistake or if people just don't listen. The FNAF 4 Halloween version and its features The new game was created as a standalone gaming event and does not reveal new secrets of the entire series about the Fazber pizzeria and its animatronics. This is just a terrible game in which the mechanism itself completely repeats the principle of playing in FNAF 4. Events occur as always at night. A little boy wakes up from prying noises. As it turned out, this animatronics came to life and for some reason want to attack the child. You have to avoid this by playing as the main character, which is a given boy. Designing a room of FNAF 4 The version saves the same as it was in the original. Both doors on the sides lead to the corridors through which animatronics can sneak up, on the bed behind your back and in the closet in front of you, too, lurks danger. But only now a little other characters will frighten you with their appearance and unexpected screeners. Jack-o-Bonnie will replace the Nightmare Bonnie Jack-o-Chica will replace The Nightmare Chick Nightmare Mangle will appear in the closet instead of The Nightmare Foxy Nightmare Baloon Boy will try to attack you instead of Plushtrap Nightmare will replace Nightmare Halloween pumpkin will be in the hands of Cheeky instead of Cupcake Left unchanged only Nightmare Fredber and Nightmare Freddie. Cheeky and Bonnie had their bone color changed, and there was a blazing fire with bright, bright eyes. At night it looks very effective and causes certain emotions. Between night events, the player is invited to play an analogue test game with Plushtrap, but now these actions are committed with Balun Boy. The boy with the balls has pointed fingers and sharp teeth, and his actions are similar to Plushtrap. Catching him in the area marked with a cross, the player begins the next night with two hours. The 8-bit mini-games in FNAF 4 Halloween edition are also slightly modified with new features and a lot of orange shades. There are some other differences that the FNF 4 Halloween version makes.
