There is a wide range of add-ons for Cody that allow users to access audiovisual content of all kinds when they want for free. Among them, we find Exodus Redux, one of the most valuable additions of those who use the popular media center. Exodus Redux movies, TV series and documentaries are an add-on that gives you access to a wide range of audiovisual content. All content is conveniently ordered by category and offers the opportunity to create your own lists and view content from year to year. You'll find releases from this year, but also movies and TV series from years ago. Also, since it has an integrated search engine, so you can easily find what you want to see. The installation process is simple: simply download the postcode from the catalog and allow the installation of add-ons from unknown sources. Once you've installed a directory, select the option to install add-ons from the catalogs, and then look for Exodus Redux. In a matter of seconds, you'll have all the content available. In this tutorial, I'll guide you through a detailed and simple process to install Exodus Redux and Exodus v8 Cody Addons. The methods outlined here work on Amazon FireStick/Fire TV/Fire TV Cube, Android and iOS mobile devices, Windows and Mac Computers, Android TV and boxes, and all other hardware and software platforms on which Cody is supported. Update: The exodus of the V8 Addon is not currently working as the Cody Bae repository does not work. Please try the Exodus Redux add-on mentioned in this guide or try other Cody Addons. Exodus Redux and Exodus V8 are two separate but very similar addons. Exodus Redux is a new Cody Addon that gives you access to tons of movies and shows. It is very similar to the very popular Exodus Cody Addon (also called V8) and even has the same logo. But, after I used as I drew some comparisons and believe The Redux Exodus is better than the Exodus Addon. The original Kodi Exodus add-on was abandoned by its original developers. However, it was revived by independent developers a few months ago and now it has started to receive regular updates. It also has a brand new set of scrapers and therefore it pulls tons of quality streaming links. In this guide, I'll cover the process of installing Redux and V8. Here's what you'll find in this guide: The main method for installing Exodus Redux is an alternative method for installing Exodus Redux using Git Browser Steps to install Cody Exodus 8 add-on (not working at this time) Cody Addons/builds to offer unlimited streaming content, but can also get you into legal trouble if caught streaming free movies/TV shows/sports. Kodi users are strongly encouraged to always connect a VPN while streaming online. A good Kodi VPN hides your bypasses government surveillance, geo-blocked content and provider regulation (which also helps in buffer streaming). I use ExpressVPN, which The fastest and safest VPN. It's very easy to install on any device including Amazon FireStick. You get 3 months free and save 49% on your annual plans. In addition, it comes with a 30-day cash protection guarantee. If you are not satisfied, you can always ask for a refund. Click here to get 3-months free and save 49% on ExpressVPN Read: How to install and use Cody VPN How to install Redux Exodus on Cody I'll be stalling the installation process in three simple steps that will help you easily follow and install the Redux Exodus add-on on Cody. Step 1: Allow unknown sources on Cody Exodus Redux Cody Addon is not part of the official Cody Superstructure Repository. That's why it's called a third-party add-on. And, when you want to install such an add-on, you must have unknown sources in Cody included. Here's how you do it: 1. Open the Settings option when you're on Cody's home screen (top left) and then go to the settings system (or just the system if you use Cody 18 Leia) on the screen that follows 2. Select/highlight add-ons in the list of options on the left sidebar. Now go right from the same window and turn on Unknown Sources 3. Click Yes for the following warning. Don't worry about the warning. Step 2: Installing Exodus Redux 1. Go back to Cody's home screen and open the settings again 2. The settings are an open file manager. In Kodi 18, you'll find the File Manager folder in the top row. 3. Open source addition 4. Now click where he speaks on the next window 5. Bring the following URL just as I provided here: Click OK 6. When you return to this window, type redux (or any other name you like) into the enter name area for this media source Click OK 7. Go to Cody's home screen again and click Add-on 8. Open the Package Installer option by clicking the open-box icon on the far top-left of the following screen 9. Select Set from Mail file 10. Click on the redux name in the list (or any other name you added earlier) 11. Click on a mail file called repository.exodusredux-0.0.6.zip, which you see on the Note screen: the file version number may be different from what you see in this guide. Open the mail file in any case d12. Wait a few seconds to confirm the Exodus Redux Repo (top right corner) Now that you've successfully installed the Kodi Exodus Redux repository, you're almost done. Just stay with me one step further and it will be done. Step 3: Set Exodus Redux Cody Addon 1. By staying on the same window, click Set from Repository 2. Open Exodus Redux Repo 3. Open supplement video 4. Select Exodus Redux 5. Click on the bottom 6. Kodi 18 users will also see a new window where the Cody app will show that all the files that the add-on is going to install on their system. Click OK 7. Now wait about a minute. Confirmation of the add-on installation or notification you have successfully installed Exodus Redux Cody Addon. Before you start streaming from Exodus Redux to Cody, I would like to warn you that everything you stream with Cody will be visible to your provider and government. This means that streaming copyrighted content (free movies, TV shows, sports) can lead you to legal problems. Cody users are strongly encouraged to connect a VPN while streaming. I always connect ExpressVPN on all my streaming devices, and I suggest you do the same. A VPN for Cody will bypass isp regulation providers, government oversight and geo restrictions on popular add-ons. So before you start streaming, here's how to get VPN protection in 3 simple steps. Step 1: Get an ExpressVPN EHA subscription. Step 2: Click here to download and install the ExpressVPN app on your device. Step 3: Tap the power icon to connect to a VPN server. That's all. Your link is now safe with the fastest and best VPN for Cody. We never encourage or encourage copyright infringement. But, we don't want you to end up in legal trouble either. In addition, we believe in the right to privacy and its strong supporter. Install Exodus Redux Cody Addon Using Git Browser (alternative method) For this method, you should have a Git Browser installed. Follow this link to install Git Browser on Cody using the popular Indigo Cody Addon. If you have a Git browser, follow the steps below: #1. Go to Cody's home screen #2. Open additions from the menu to the left of the #3. Click on the supplement program and open the indigo Cody Addon #4. Now open add-on #5. Click git Browser #6. Get rid of the next hint (if it appears) by pressing the key, esc key, or OK button depending on the device you're using Cody on the #7. Now click GitHub's username search #8. Click the New #9 button. Enter the username I-A-C Click OK #10. Click on the mail file repository.exodusredux-0.0.1.zip If you see another version of the zip file, click on it in any #11. When you request, confirm your intention by clicking on the #12 button. When the Exodus Redux repository is installed, click Continue #13. Return to Cody's home screen and press the add-ons on the left #14. Tap the open drawer icon or the package installation icon on the top left #15. Click Set from the #16 repository. Click Exodus Redux Repo #17. Open video additions #18. Click on the add-on #19. Click Set #20. Wait for Kodi Exodus Redux Addon installation notifications appear on top right That's it! This is how you install Exodus Redux Cody Addon using Git Browser Study Exodus Redux Addon on Cody Let's take a quick look at the add-on. I am screenshot of the main window Exodus Redux. Go ahead and open from the add-ons of the zgt; video supplement section (navigating from Cody's home screen) Below is the main window of the Regular category as movies movies The TV show is all there. All you have to do is choose one of the categories and find your favorite movies and shows to play. Now all you have to do is open the right category and move on to the content you want to see. The features of Exodus Redu Cody Addon Both Kodi Exodus Addons have similar features. However, Redux is more reliable. Here are some of its features: As I said, it uses the best scrapers collectively called Open Scrapers Its scrapers consistently fetched high-quality streams for me That's Fast. I haven't seen many addons scraping these many streams so fast the Content Library is also huge. You'll find every movie and TV show you could ask for a library updated frequently. I've seen episodes get added to it for hours of broadcasting It's Free How to Install Exodus V8 Cody Addon Now that you know how to install and use Redux, let's get along with the process of installing the original Kodi Exodus add-on. These steps are for Cody 18 Leia. If you're working in a lower version, you can follow this guide to update Cody to the latest version. Note: If you are the first to install a third-party Kodi Addon, I'm sure the Unknown Sources option is disabled in your Kodi app. We need to turn it on ON in order to download and install Kodi add-ons that don't come from official Cody developers. You can do it by: Cody Leia: Settings of the System of the System of the System of The System of The Unknown Sources of Cody Krypton: Settings of the Settings of the Sett; Settings System of Settings of the Qgt; Unknown Sources of Attention to KODI Users: Read before you continue to Cody Addons/builds to offer unlimited streaming content, but can also get you into legal trouble if caught on free tv movies/ Kodi users are strongly encouraged to always connect a VPN while streaming online. A good Kodi VPN hides your identity, bypasses government surveillance, geo-blocked content and a regulatory provider (which also helps in buffer streaming). I use ExpressVPN, which is the fastest and safest VPN. It's very easy to install on any device including Amazon FireStick. You get 3 months free and save 49% on your annual plans. In addition, it comes with a 30-day cash protection guarantee. If you are not satisfied, you can always ask for a refund.
