Here are the tips for installing cydia without jailbreak 2015 on iOS 5, iOS 6, iOS 7, iOS 7.1.2, iOS 8. iPhone is the most used phone in the world and cydia is a cracked app used in the jailbreak iPhone. If you want to install cydia you need to jailbreak your iPhone can cause a harmful effect if no network iPhone can't start a thing like this if you do this yourself. How to install Cydia without Jailbreak But today I went to show how to install cydia without jailbreak an iPhone that have an iOS version like iOS 5, iOS 6, iOS 7, iOS 7.1.2, iOS 8, every iPhone you install cydia in every iPhone like iPhone 4, iPhone 4s, iPhone 5, iPhone 5C, iPhone 5S, iPhone 6, iPhone 6plus one on them easily. You don't need to connect your iPhone to a computer, yes you install cydia without having your iPhone connected to the computer, you need to follow this method one that match you just follow me what I ask you to do you will definitely install cydia Download in your iPhone without jail break. follow the steps. I will show you all the method of installing cydia in your iPhone. Install Cydia without jailbreak on iOS 5, iOS 6, iOS 7, iOS 7.1.2, iOS 8. #1 method First of all, download an app from the App Store provided by Apple, open the App Store and find a vSSH client app. Full download after opening this app shows you quick connect network click there. Then you should know that your wifi IP address you find this address Go to setting up &gt; wifi &gt; open connected network, just as shown in the photo. Copy that IP address and go back to the SSH client app and enter those IP addresses in the IP Host option. Then go down don't change the port address and enter the username is root. Then click on the connect option in the top there. An option pop-up there ask to click Yes once or yes permanently on the only once. Then wantk you ask for the password and the password is alpine . Then click on return will process and click on the back option shown near keyboard option in the top. Just copy this codewget -q -O /tmp/cyinstall.sh &amp;&amp; chmod 755 /tmp/cyinstall.sh &amp;&amp; /tmp/cyinstall.sh just stick this code there. then click return The download will start it will take up to 1 to 2 min. When you complete download, it will be automatically restarted. then you see cydia icon on the screen click there. it will take some time to download and then you will run cydia in your iPhone without jail-breaking your iPhone. These are just simple steps how to install cydia. next method. #2 method you just have to click on the download cydia link. Then you click the page with optin there free on the free. It will pop up an option to install cydia click on install. Wait for cydia load icon click on add. add. on your phone click on cydia it will take a process and there go you cydia worked without jailbreak. #3 Method These are the two of the method to how to install your cydia in your iPhone without jailbreaking your device. with very simple methods. there are many method given in the internet, but all are fake or not working, but both work well controlled by myself in my friend's iPhone because I don't have my own. How to install Cydia without Jailbreak Here's the tips to install cydia without jailbreak on iOS 6, iOS 7, iOS 7.1.2, iOS 8.Do Some good comments go down and let our user know that these tricks work or didn't if had a problem let me know I'll help you quickly tweet a cydia related problem like the post to your friends and share where where. Cydia is a custom app store designed for all types of iPhone iPad it provides more control over the IOS devices you can install custom apps that are not available in the app store. You fully customize your iPhone as never installing cydia apps 100% secure you can even install paid apps without external sources. Cydia is not available in the app store that you need to jailbreak your device and then only you can install Cydia, but don't worry there is a trick using that you install Cydia without Jailbreak in an iPhone or iPad. What is Cydia It is an alternative to the app store with more customization option and app packages that are not available in a native IOS app store. Cydia app uses Advanced Packing Tool (APT) repositories to help you install such apps on their device. It supports all IOS versions of IOS 10 to 12. Install Cydia without Jailbreak I've searched the internet and found so many methods with the help of you to get Cydia in IOS versions like IOS 7,8,9,10,11 and even IOS 12 and these methods works in an iPhone of iPhone 5,6,7, 7plus, 8plus, iPhone X and newly launched iPhone XS XR and XR. #1 method Start with the easiest method in the world to install Cydia without Jailbreak. First you need to open safari browser and open the link or (Available for all IOS)You'll see a doll with add to the screen and click on it. Go to the Start screen and you'll see and click the Cydia app. The app downloads data for the first time. Install apps and try packages and enjoy them. #2 method If the above method will not work for you for a number of reasons, you do not have to worry that this method will definitely work after installing this app called flekstore. you even install paid apps and more. Go to your Safari browser and open the link download and install this app. Go to the Start screen and open it. From left to right you'll see a menu click Tweaks.In the top bar search for Cydia.Open Cydia app and click install to get it on the device. It will be the icon on the home screen after the app instals. First, it checks the configuration of your device and installs files for the first time. You will see multiple pop-ups while installing data just ignore all messages and click cydia. Restart your iPhone after, all the process finishes. Open Cydia app and you're good to go install packages and have fun. #3 method For some reason if the above methods don't work on your phoneer is the latter method, even if it doesn't work at last, you need to jailbreak your device to get Cydia. Download Termius – SSH client. Open this app from the Start screen and click quickly connect. Go to Set&gt;Open Connected Wi-Fi Network and copy IP address. Now open the SSH app from the recent app and enter your copied IP here. Scroll down and enter your device's user id. Now click the connect button at the top. It will ask you to enter the password and the password is alpine. Click the return cup paste the code -q -R /tmp/cyinstall.sh 20&amp;&amp; chmod 755 /tmp/cyinstall.sh &amp;&amp; &amp; &amp; &amp; /tmp/cyinstall.shGo to the start screen and see your Cydia app downloaded. Open the app and wait for the file to download and restart your device. #4 method if one of the above methods does not work for you, you will get the best alternative to Cydia. Open the Safari browser and click the link sees a page with two apps to install. Try installing both apps afterwards and choose which one is best for you. These apps work on all iPhones and iPad. At the end hope you install Cydia without Jailbreak and face it as a problem while installing comments down to get the help. Read more: View Private Instagram profile» If you upgrade iOS with iTunes, your device won't be in jail and Cydia packages will be removed. Before upgrading iOS, make sure a jailbreak is available for the new version. As of September 8, 2015N jailbreak for 8.4.1 Currently there is no jailbreak for iOS 8.4.1. Avoid upgrading or restoring if you want a jailbroken device.
