Gold Ore Kits \$39.99 \$79.99 for details visit www.detecting.COM • 1-800-413-4131 MLON \$39.95 \$10.95 \$14.95 \$149.99 REV.2 Your Lone Star Metal Detector is an advanced microprocessor control machine. This motion detection system requires movement over an object to allow the object detector to emit sound. Lone star has two types of working modes: 1. 2.Disc, notch, and auto-welded mode completely eliminate iron items and trash from detection in DISC mode, with the use of disc/notch knob of the most pulled tab removal and trash item automatically from detection in AUTO NOTCH mode for outdoor use only. • If demonstrated in the house, beware of the interference field. •In case of interference, the detector will speak or beep abnormally. Most layers have metal, which interferes with the signal of the target. Manual 082312 owner does not test on the floor
