Heng Long RC Tank Operating Guide, Posting Chart, Information, Model names and technical data CLARK chain board manufacturer website: clark-model.com Heng Long RC Tank Model-designation: No 3818-1: Tiger I German Tiger No 3819-1: German Panther No 3838-1: M26 Pershing Snow Leopard No. 3839-1: M41 A3 Walker Bulldog Light Tank No 3848-1: Kampfswagen III No 3849-1: Tauhpanzer III No 3858-1: Panzerkampfwagen IV (F1) No 3859-1: Panzerkampfwagen IV (F2) No 3868-1: Sturmgeschutz III (StuG 3) No. 3869-1: Jagdpanther No 3878-1: KB-1 Эжранами No 3879-1: Пантера Аусфюринг G No 3888-1: Кёнигстигер / Король Тигр No 3888A-1: Кёнигстигер Хеншельтурм No 3889-1: Леопард 2 А6 No, 3898-1: М4А3 Шерман No 3899-1: ЗТЗ-99 МБТ No 3908-1: Британский Challenger 2 No 3909-1: Т-34/85 No 3918-1: М1А2 Абрамс No 3938-1 : Российский Т-90 No 3939-1: Российская коробка передач Т-72 с длинным выходным валом: Леопард 2 А6, М1А2 Abrams, М41 А3 Walker Bulldog, М26 Pershing, KV-1/KV-2, ЗТЗ-99, Кёнигстигер, Джиглантер, Jagdtiger, Panther G, Panther F, Challenger 2, Т-90 Gearbox с короткой выходной вал: Tiger 1, Sturmtiger, Panther, Panzer III, Panzer IV, Stug III, Т34-85 Информация по RC танки Модели: Разница между 3-го и 4-го поколения Heng Длинные танки: в 4-м поколении, теперь вы можете поднять или опустить пушку previously went only the elevator and then below. The switch in the tower to turn off the shot function is no longer in the new generation, which now takes over the remote control. The sound quality has improved and there is no shot simulation, so don't shoot without firing a bullet anymore. In addition, you can now switch between two sounds of a tank with a dual sound system. What does a proportional remote mean? Proportional means continuously or evenly. The proportional remote uses an analog stepless signal to keep the acceleration smooth and smooth. If the same app is using a digital signal that controls the steps, jerks may occur. A PWM signal can also be used as an alternative to an analog signal. RC Tanks with infrared combat system :: Modern remotely controlled tanks are partially equipped with infrared combat system to simulate combat with multiple tanks. If the tank ended up it put out the action for some time. This can lead to a realistic battle with multiple rc tanks. Impact: 1st-4th Hits: Hit tank reeling and off for 3 seconds. 5. Hits: Hit tank reeling strongly on and off. The tank must be restarted. In order to convert the Heng Long models with the BB airsoft function into an infrared system, additional Video transformation measures are needed. The infrared transmitter requires a 940nm high power 5mm LED. The receiver needs an infrared receiver. Circuit Rx-18 Board Circuit Chart Heng Long TK-6.0 Board Circuit Chart Chart Spare parts / Tuning Supply of spare parts and upgrade parts well. Wear parts such as gears, chains and engines available in each case for each model. Opportunities in Tuning terms and updates are almost limitless and limited only to your own wallet. There are attachments from the series and individual accessories outside the series. Many parts, such as the commander's hatch or shovels and axes, are available in metal. The noise of the tank can be improved with a different sound module and speakers. The gearboxes can be replaced, metal underpans or metal towers can be selected. What exactly do you get? Remotely controlled Heng Long RC Tanks have excellent value for money and a large fan base around the world. The handling of the chassis and attachments is very good. The weak sides of Heng Long tanks are gearboxes in plastic design, they are simply not designed for off-road use and can be replaced by metal gears or steel gears. For use in the living room, however, plastic gear is enough. All Heng Long tanks are ready to launch, after charging the battery tanks are ready for use immediately. Only decals (stickers) and small details such as tools and canisters still need to be installed to give the model a tank a touch. Smoke Smoke Function allows smoke smoke from muffled. This feature can be controlled on a 2.4 GHz remote, on standard models without 2.4 GHz technology on the underside of the tank. The supplied smoke oil (aerosol) is heated by a smoke module/smoke generator and caused by evaporation. Contained 25 ml bottle is enough for about 6 fillings that produce smoke for 2 hours each. Smoke oil is available as an accessory for rc tanks. The sound of all RC tank commands is supported by a sound function. These include engine start, driving, turning the tower, raising and lowering the cannon, shooting, machine gun fire and turning off the engine. The sound is generated by a small speaker in the tank. In addition, the sound function can be updated with the best speakers and other boards. Many companies specialize in 1/16 scale upgrades to tank equipment. Background noise can, for example, be improved and personalized by the Bendini and Clark Pattine sound module. Here is a video showing the capabilities of Soundtunnings: 2.4 GHz technology remotely controlled tanks with 2.4 GHz technology are more reliable to operate, have a longer range and it can drive up to 50 identical tanks at the same time. Another advantage of the 2.4 Ghz version is the lack of an antenna for the tank and the remote control. This makes the remote control more controllable, and the tank is closer to its larger original without an antenna. How to connect a remote 2.4 GHz with RC tank to bind 2.4GHz remote control with Heng Long Tank press and hold a small button in the battery battery from the rc tank and simultaneously hold the start button on the remote control, then release the button in the battery compartment. Now the tank has to start. Heng Long 2.4 Ghz Remote Control chassis 5th generation / Tracks Heng Long remotely controlled tanks are suitable for off-road use use the outside at your own risk! thanks to tank tracks and can master slopes up to 35 degrees. However, the manufacturer warns of moisture and sand or dirt that can get stuck in electronics or gearbox and damage them. Therefore, the use of outdoors should be treated with caution. Heng Long models are available in the standard version with plastic communication tracks associated with steel pins or a pro version with metal tracks. For all tank models metal tracks are available for upgrade in a variety of qualities. Replacing tracks is simple and feasible for those who can hold Allen's key. The recoil simulation of all the Heng Long remotely operated tanks offered in this store has a recoil simulation. The tank makes a small offer in the rear when shooting, this is a realized short snap of the back of the chain drive. Who wants his model tank to be perfectly true the original can replace the recoil simulation of a real barrel gun recoil. This conversion, however, is a little more expensive since the barrel of the gun must be replaced. Infrared combat systems Modern remotely controlled tanks are partially equipped with infrared combat system to simulate combat with multiple tanks. The tank sends completely safe infrared rays. If the tank is hit it reduces the gun to put out the action for some time, so not being able to maneuver. All Heng Long tanks can be upgraded with relatively little force to the infrared system, but the BB shot function is lost. Or so. Although it is also possible to build a hybrid system (infrared and BB), but this larger intervention in remote control and tank circuitry are necessary. Conversion kits with a transmitter and receiver for the tank are available for about 16 euros to buy. BB-Airsoft shot features All tanks offered in our store have a shooting feature and therefore no children's toys! The manufacturer's age recommendation is from 14 years, and then only under the supervision of an adult. The 6mm BB plastic shells have a range of about 25 meters. The firing function can be launched with two switches to the remote control. Please follow the manufacturer's safety instructions! Ferngesteuerte Panzer mit Schussfunktion Remote Control Tanks are not toys! Recommended age: from 14 years and then only under the supervision of adults! Read the operating instructions before commissioning! © copyright rc-panzer-shop.de and the Word If you make changes, the settings of these Uncategorized April 4, 2020 April 4, 2020 Ladengesch'ft und Onlineshop haben ge'ffnet.
