Change the color scheme to Facebook™. Facebook Color SwitchrFacebook Color Change is a program that allows you to change Facebook theme. Especially for those who are tired of the banal term Facebook, we have created Facebook Color Change. Facebook Theme Color is too boring for bright and creative people. Interesting to know that the background color also affects our attitude. Of course it will be more pleasant to open Facebook and see there are themes of color collected by you. Facebook Color Change has more than 50 themes, but we don't stop having and creating more. Also, you can always create your own Facebook theme to your tastes, collecting color combinations that are beautiful for your eyes. In creating a theme is also possible to change header color, header text color, theme color, color button. There is Facebook insane, and it is not some scary theme. It's just a theme to people who carry on their health. If you want to protect your eyes with the help of dark mode, you must change your background color to that! Facebook DC gives you 5 built-in dark themes and a possibility to create a clean one. How to use changes of color? Firstly you click Text Color, Background Color or Link Color button. A box will appear around the button indicating that it is active. After that you get a color on the color wheel to change the color of what you like. Now if you want to change the colors of the site, just click the Change Color button. You can also change the color of the context menu with the right mouse button. Note that all changes in the pop-up toolbar are automatically saved in memory. The main advantages of Facebook Theme Color: 60 Facebook Theme, Change Header > Background color, change each text color, Change Border & Color buttons, simple and clear interface to apply your themes, share your Facebook theme with other users, create your own themes and sync them to each computer. Find with millions of people who use that and you wouldn't be sorry. Changes to this theme help you transform your Facebook page.
