Microsoft Office Imaging's Associated Programs developed by Microsoft MIME type image/vnd.ms-modi Useful links More information about Microsoft Office Document Imaging format and program Convert MDI file extension .doc Category Document Description Doc file (document abbreviation) is an extension of the file for word processing documents; this is mainly due to Microsoft and their Microsoft Word app. Historically, it has been used for simple text documentation, such as software or computer equipment, on a wide range of operating systems. Almost everyone would use the doc file format, whenever you write a letter, do some work, or usually write on your computer, you'll use the doc file format. It was in the 1990s that Microsoft chose a doc extension for its own Microsoft Word processing formats. As PC technology grew the original uses for advancement were less important and largely disappeared from the PC world. The actions of convert DOC fileView other file formats of documents Technical details Early versions of the doc file format contained mostly formatted text, however the development of the format allowed the docking files to contain a wide range of built-in objects such as diagrams and tables from other applications, as well as media such as videos, images, sounds and diagrams. documents can also contain information about the email merger, allowing you to use a word-processed template in with a spreadsheet or database.
