

## Open source android apps projects

 I'm not robot  reCAPTCHA

**Continue**

Not every job is done at the table, so why should your project management tools link you to one? Android and iOS project management apps help you keep track of your tasks, yours, and team communication from anywhere in the world. We looked at apps that cost no more than \$80 a month and chose the top seven. Top 7 applications for project management (Android/iOS) (Best in general) Professional project managers wanting modern formats such as Lean, Agile, ScrumStartups tweaking the workflow of each project to meet the unique needs of customers or customersCompos with a remote workforce and those who collaborate with freelancers and clients Marketing and design firms that need social media integration and customers entering online businesses needing virtual project management software for any kind of projectTech team want an intuitive Kanban-council project management application for Android and iOSBlue-collar business, administrators, How we evaluated applications for project management (Android and iOS) for busy entrepreneurs, sellers and project managers, it is important to have a program that helps to track tasks and deadlines, review documents and project plans, and communicate with team members whether in the office or at the airport. That's why most modern project management tools offer apps for Android and iOS. Not all applications are designed to be equal, and sometimes the best desktop project management tools don't have the same quality applications. That's why we've evaluated more than a dozen project management tools using the following criteria: Price: Normally, iOS or Android project management apps can be downloaded for free, but you need a cloud-based desktop plan. We have considered prices versus tools for these plans. Task Lists/Timeline: The most useful feature of a mobile app is the ability to track personal tasks with reminders and use tools to drill information. Communication: We've looked at chat and file-sharing tools that provide applications for managing mobile projects. Some allow users to comment on attachments. Other project management tools: We've looked at whether it's possible to manipulate boards of directors, add tasks, change deadlines, and perform common project management tasks. Customer Ratings: Great features and prices mean nothing if the software app is buggy. We have only included mobile apps that have 4 or more stars, more likely to be accepted by your users. Integration: While this applies to desktop-level software, it is nevertheless important to know if you can use with other business applications such as G-Suite or MS Office. Another: Does it work offline? Does it offer timekeeping, billing to customers or customer signatures? What makes it different from the crowd? Many powerful project management tools have not made this list because their mobile apps are not as highly rated as top-rated cloud or desktop software. If your mobile phone isn't your first concern, check out our articles on the best project management software. For better project management software for both mobile and desktop use, Asana tops the pack. Asana: Best Overall Project Management App Asana is the best project management program for small businesses that use Agile and Scrum workflows. Its iOS and Android apps allow you to access everything from task assignments to boards and communication with teammates. The app has one of the highest user ratings we have seen and works with different project sizes. The Asana Pricing Asana mobile app is free and you can get a free cloud program with basic project management tools and tasks for up to 15 users. You need a paid plan to get the most useful ones, including settings and forms. They work from \$11 to \$25 per month per user, which is an average subscription-based project management software. It also offers a business plan for large firms. Asana also offers a business plan for large firms. Asana's web pricing plans and features board, list and calendar ViewsAdvanced Search/ReportingCustom Fields and Asana Patterns Features Asana goes beyond task lists and Kanban tips. It's a full-scale project management software with useful integrations and an excellent mobile app. You can use the iOS or Android project management app with a free program when you don't need advanced features such as forms or settings, or you can subscribe to one of the paid software plans for even more flexibility. Asana offers list and views in an attractive, mobile format. Asana Standout Feature: Workload This web feature, Workload, is in Asana's paid plans, but offers a great tool for project managers. The workload allows you to see how the project's tasks are distributed among the team members and how their commitments grow and fall. This way you can see at a glance who may be overloaded or has extra bandwidth. You can move tasks in the workload view to reassign them. Asana project management apps for iOS and Android offer task lists, reminders, boards, deadlines, and more. If you want to know what's on your plate, use My Tasks. And if you can't remember which project you dropped this file in, you can use the Asana search tool in all projects to quickly get the information you need. If you get access to Through the tablet, you'll have all the functionality of the cloud version. Asana collaboration tools offer notifications in the mailbox and comment streams in each project or task list. You can download, download and view documents and images, commenting on them as needed. If you need editing features, you can link documents to Google Drive and work from there. Or if you just need to make a quick comment or change, you can click Like. Asana Mobile/Web Connectivity You can access the Asana web version using a mobile device, just like any cloud program. If you don't have a connection, you can work with the mobile app offline - a feature some other project management apps for Android and iOS don't offer. It will update the web version as soon as you reconnect. Of course, changes to the web version are automatically updated in the mobile version. The Cloud Solution Integrations Asana offers more than 100 integrations. Items and information can be synchronized with programs such as Microsoft Office, Google Drive, Adobe, Salesforce, and Okta. You can integrate with applications to improve communication like Slack, newsletter programs such as Mailchimp, and file sharing like Dropbox. To work with customers and billing, Asana integrates with time-tracking and reporting software. The mobile app works well with the G Suite. With Asana missing users in the mobile app say Asana lacks a special chat area and the ability to set views by default, such as listing tasks by the deadline. In Monday.com, Asana automation is also limited, although this is a future focus point, the company said. What users think of Asana with nearly 33,000 reviews on Apple and Google Play stores, the fact that Asana earns a steady 4.7 out of 5 stars says a lot about the quality of this mobile project management app. People appreciate the balance of powerful tools and map interface, which one user called more advanced than Trello and easier than JIRA. The most consistent complaint was that submitting tasks would not accept new default settings. Reviews of Asana's cloud web plans are also good overall. Getting started with Asana Asana is one of the most rated and most useful project management apps for Android or iOS. It works online and offline, which makes it great if your team uses multiple platforms. The app is free and offers the most important features for up to 15 users. Cloud web plans have even more functionality. Download the app and sign up for a free account or a 30-day trial. Visit Asana Monday.com: The best project management app (Android/iOS) for startups That says a lot about the company that its product development roadmap includes improvements in its already highly rated app. Monday.com customizable project management software that prides itself on ease of use, making it ideal for startups. It has drag features that you can to personalize the display along with templates that you can change to treat your needs. It also offers a bright, clean interface. The mobile app is free, but cloud plans start with a subscription that costs \$39-\$79 per month. Monday.com prices While you can download the mobile app for free, you will need to pay for the price Plan to use it with. These plans run from \$39 to \$79 per month to five users. Prices Monday.com vary depending on the user, and the price in user groups (1-5, 6-10, and so on), making it expensive for those at the low end of the pricing level but competitive as you max out each level of pricing. It also charges one seat per four guest users (freelancers, contractors, clients). If you run a non-profit or educational institution, you are entitled to a discount. Monday.com web pricing plan for 1-5 users Unlimited viewers and boardsCustomizable Automated Alert4 guests billed as 1 user Monday.com Features Monday.com in automation function and easy-to-understand interface make it an excellent choice for startups with quick landings, which nonetheless can grow with them. It's also great for small firms and service industries that will appreciate the forms that feed directly on Monday to create tasks, as well as tools to automate repetitive tasks. Monday.com has a clean spreadsheet-style interface that looks good on a mobile phone, and Monday.com Standout Feature: Automations Monday.com project management apps (for iOS and Android) offer eight different types of automation, including notifications, status changes, elements creation, repetitive actions, reminders, and more. Simple automation allows you to set trigger actions, the resulting action and the time or face to action, if applicable. It's a great way to cut some of the hard work of project management and is one of the many features that makes Monday such a popular program, even for those who have never used project management software before. Monday.com project management tools, whether you have a cloud or mobile app, you can use Monday.com to complete tasks and deadlines, add individual data fields with color coding, assign owners to tasks and projects, and more. With color coding and a familiar list of tasks in the style of a spreadsheet, you can find information at a glance. Users can drag and fall items to organize their work. Monday.com has customizable templates to get you started. Graphic diagrams show progress in the project. Collaborative Monday.com offers real-time updates and automated notifications that you can program. You can call or @mention people directly in the program in addition to commenting on tasks to achieve You can also download files through the chat feature. The difference between us Monday.com Asana is that with Monday.com you can build a workflow that includes these communication updates to save time. Monday.com Mobile/Web Connectivity Like Asana, your data syncs with the web version in real time, so you have the latest information at your fingertips. Access to the cloud version can be accessed through a browser on a tablet or smartphone. Integration Monday.com interfaces with 20 other popular programs, many of which will be synchronized with the online version as well. You can use Monday.com with file management software such as Google and Dropbox, email programs such as Gmail and Mailchimp, and chat tools like Slack. Your sales team can estimate that it integrates with Salesforce and Shopify. And the web version allows you to translate projects from project management tools like Basecamp or Trello to make updating Monday.com simple. The Monday.com that Monday.com is missing, does not offer many editing documents or collaborating tools away from the chat. It also does not have a canban board view in its mobile version. Monday.com also doesn't work offline. According to some customer support comments left on community forums, Monday.com tracks requests for this feature, but this is not a big priority among users. What users think of Monday.com Those who don't like Monday.com often complain that there is no free app, and that if the number of users you have puts you at the low end of the price level, it's expensive. However, users in the Apple Store give the mobile app 4.5 stars; those ranking it in The Google Play store give it 4.6 out of 5 stars. Our business reviewers Monday.com love it. Monday.com it makes it easy to gain control over your team's processes and workflows. Getting started with Monday.com Monday.com updated its mobile app just recently and promised even more improvements in its upcoming roadmap. If you're a small business needing great, handy software to get your teams organized, download the app and then subscribe to the free trial Monday.com today. Visit Monday.com Basecamp: The best project management app (Android/iOS) for a remote Basecamp workforce lacks a flash Monday.com and Kanban-style board views of Asana, but its simplicity makes it a great project management Android or iOS app for companies that have many casual users, like remote freelancers, and don't need flexible processes. Basecamp works as a general workspace project that helps users see what needs to be done and access the information they need to do. The flat Basecamp rate means you don't have to worry about the cost of adding a random or one-time user, and its familiar list and commenting interfaces make it immediately common. The Basecamp Pricing Basecamp mobile app is free. You can use the free plan for 20 users and three active projects. However, its \$99-a-month web plan allows you to invite unlimited users, manage as many projects as you want, and up to 500GB of data. It has a free program for education as well as discounts for non-profit organizations. Basecamp Features Basecamp, like its name, focuses on the basics of collecting people and materials. It does not include features for Agile project management, although it integrates with project management programs to ensure that Native tools, though basic, are nonetheless enough to keep most business projects organized and teams in sync. Here are the main Tools Basecamp in its project management apps for iOS and Android: To-do lists schedules and milestones of Campfire's Chat Room for fast casual document chats and file attachments Automatic Basecamp registration in a no-frills style list makes it easy to recognize and use Basecamp Standout Feature: Headquarters While Other Project Management Apps focus on specific projects, Basecamp You can store documents there, open general chat rooms and check regularly where people list their achievements or note common problems. It's a handy project management app to have on the road. For example, if you can't remember how to access the Uber discount code for your company, you can find instructions posted at headquarters. Basecamp project management tools work primarily as lists within project boards. You can add tasks and sub-tasks, checklists, dates, attachments, tags, and more on each board. There are calendars that can be used not only for the values, but also for tracking the time of employees or the publication of the company's holidays and events. You can also add a chatbox to individual projects. The mobile project management app (Android and iOS) allows you to record ideas, view projects and update on time. Basecamp Collaboration Tools You can customize chats, message people, comment on a project, or publish an ad using Basecamp as your team's project management and communication center. You can download documents from your smartphone, do and share screenshots, and get reminders about what should be. Basecamp also allows you to re-negotiate emails directly to projects or tasks. Once you rewind your email, all subsequent responses will land in your Basecamp platform as well. Mobile/Web Connectivity Basecamp updates the web version of its app. Access to the cloud version can be accessed through the browser on your smartphone or tablet. Basecamp integration is fascinated by the lack of advanced features, offering over 60 integrations so you can make offers, run customer service, do marketing design, work in software development, generate reports and track time. This allows you to choose how complex you are making the software by adding only the tools you need. Some of the tools you'll find include Harvest, TimeDoctor, Sapir, Gantify, MangoBoard, ScrumDo, and Proposify. That Basecamp is missing Basecamp built for everyday users, must have their own information and to-do lists in one place. Thus, there are not enough advanced features such as Gantt diagrams, Kanban boards, time-tracking software and resource calculations. However, you can add many of them with integrations. In addition, we found no mention of offline or that the integration of your business's software is carried over to the mobile version of Basecamp. What users think of Basecamp Project Management Software for iOS earns 4.7 out of 5 stars (15,900 ratings). The Android version has 4.4 stars with a rating of 3360. Customers who rate it highly as Basecamp users review on our site, say it's easy to use and great for communicating with employees as well as seeing tasks. Those who gave it low reviews basically said they had trouble getting the app to work on their phone. Start working with Basecamp you can try the full version of Basecamp for free for 30 days and then pay a \$99 per month fee if you have over 20 users. In fact, if you don't have many projects or users, the free version may be enough. Educators can receive free accounts and nonprofits can subscribe to Basecamp at a discount. In any case, iOS and Android software management apps are free. Sign up online for a free trial today; then download the app. Visit Basecamp Airtable: Best Project Management App (Android/iOS) for Marketing Airtable is one of the best project management software for businesses, especially those that do a lot of collaboration or creative work. Its customizable shapes and blocks (page designer and 3D modeler) features make the web version the first bet. The mobile app, however, is simpler and focuses on the basics of organization and collaboration on tasks. It complements, rather than surpasses, its desktop version. Airtable Airtable Pricing costs between \$0 and \$20 per month per user. The free plan has ample scope for teams in need of basic project management. Paid plans give you great tools to create and collaborate, custom brand forms, and stock restrictions. If you have managers or clients who only need to review the project, they can do it for free. For large firms, there is a corporate plan with an unlimited number of users - it includes more extensive features and support. Airtable Web-Plan Pricing by Features Kanban, Calendar, Gantt and other ViewsWeb, Desktop, iOS, Android AppBlocks (3D Fashion Designer, Maps, Design Documents) Airtable Features Airtable Smartphone App has a gallery presentation where you can see your designs or search for templates and information. Tasks are displayed in a spreadsheet format where you can set up data fields to see what you need at a glance. There are also comments and attachment tools so you can keep everything in one place. Airtable offers customizable templates for any project Standout Feature: Airtable's database quality has several outstanding features, such as social connectivity and feature blocks, which includes a page designer and a 3D modeler to view project data. However, these interesting features are not available through the smartphone. The feature that most mobile users value is the quality of the Airtable database. This allows them to do and search for any information you need, from data to images. The web version of Project Management Tools Airtable offers several views, including Gantt charts. But the mobile version sticks to the task lists. You can create flexible checklists, collect ideas, and manage customers or contacts. It has templates that you can adapt with your smartphone to capture the information you need. The interface resembles a spreadsheet, and records are tapped cards, making it easy to work. The images will be kneaded as sketches and you can color-code tags, making it easier to take information at a glance. Airtable Collaboration Tools collaborations on Airtable for iOS and Android are so basic that they don't require much mention from the company or users. You can attach files, make comments and call people with @mention. Airtable delivers alerts via push notifications to your smartphone. Mobile/web connection You can access Airtable through your browser. If you are often in an area without an internet connection or data, you may struggle a bit with this app. Airtable integration integrates with more than 30 third-party applications. This allows you to pull project data from project management marketing tools such as Asana and Basecamp, and works with file management tools such as Box, Evernote and Google Drive. It integrates with social media from Facebook and Twitter to Tumblr and YouTube. With Airtable missing the mobile version is missing kanban board and calendar views that are standard in Monday.com and Asana. The desktop version has more flexibility. However, it lacks billing features, issuing trackers, and other advanced features used in more complex project management tools, such as Monday.com. In addition, Airtable does not have a standalone mode, as Asana does. Customers on their forums asked for it. What users think of Airtable's project management app for Android only rated 3.8 out of 5 stars (984 reviews), but its project management app for iOS earned an astonishing 4.8 out of 5 stars among iPhone and iPad users (7600 ratings). Apple users praise the addition of Siri shortcuts as well as its powerful database functionality. Our readers who reviewed the desktop version of Airtable also appreciated the customization and form function. Starting with Airtable, you can download the Airtable (Android/iOS) project management app for free to use with any plan. While paid plans include support, data storage and other features such as blocks, there is a free desktop plan. Start by downloading the app and subscribing to a free plan (only necessary) Visit Airtable Projectplace: The best project management app (Android/iOS) for international English companies may be the language of business, but there is no reason international businesses should not have project management software that caters to its employees no matter where they live and work. Projectplace comes in eight languages and offers the most important project and collaboration tools for desktop, portable, or mobile devices. Projectplace Project Management App for iOS and Android is free to download. However, the web software it works with costs \$29 per month per person, which is slightly higher than the average for project management apps for Android/iOS that we reviewed when comparing on a feature set. In addition, prices vary depending on the user's country of origin. Projectplace offers a free 30-day trial. There is also a corporate plan with big features for large organizations. Projectplace web-priced software Gantt Chart, Kanban Tips, Calendar Projectplace Features Projectplace is one of the simple application project management software. Its regular plan has all the standard tools for collaboration and organization, and the Enterprise plan offers reports, portfolios and templates. Its language functions help manage projects around the world because each user can choose the one that relates to them. Projectplace is available in several languages, making it a good choice for international firms Projectplace Outstanding Features: Language Options and Screensharing If you have an international business with factories or offices in Europe, Projectplace can help your people stay organized as well. Projectplace is available in English, German, Dutch, Swedish, Norwegian, Spanish, Danish and French. Need to have a meeting? The Enterprise plan offers screen sharing with up to 100 members for online meetings. Project Management Tools You need to have a desktop account with Projectplace to use the mobile version. However, it offers Kanban boards, Gantt charts, and to-do lists. In fact, it has personal to-do lists and the ability to add checklists to maps for more details. You can sync the timelines with the calendar and view the performance with the charts. For greater utility, enterprise offers document management, project dashboards, resource management tools, and workload management, and reports. Projectplace Collaboration Tools With a basic plan, you can receive updates notifications through the iOS/Android project management mobile app, as well as via email. You can keep conversations in one place and use @mention to call specific people. The basic plan allows you to share files, images, and links, while enterprise has advanced document management features such as Review. Projectplace Mobile/Web Connectivity Web and mobile apps remain in sync so your smartphone can receive notifications about changes made to the desktop version. Documents can be stored in Projectplace for offline reading. You can also access the web version via your browser on your tablet or smartphone. Projectplace integration includes Google Drive, Evernote, Box, Slack, HipChat and Harvest. These integrations are also available in the mobile version. It integrates with several Microsoft programs, including PowerBI data analysis and Microsoft Project to import project plans to create Gantt charts in Projectplace. That Projectplace lacks a basic plan lacking many of the features that other project management software applications (such as Monday.com) include at a similar price, such as customizable templates and resources/workflow management tools. To do this, you need to switch to an expensive corporate plan. Projectplace also lacks time to track and bill, making it less useful for companies that bill customers by the hour rather than projects. In addition, this software also lacks a customer portal like Asana and Basecamp offer- another reason it is not good for companies that work with customers. And if you need to work offline, you won't be able to because it doesn't have offline mode. What users think of Projectplace Projectplace earns a solid 4 out of 5 stars from its mobile users. Comments include good for travel, polished and responsive, and a good way to get updated. Those who don't like the app mention the difficulty of accessing specific information. The desktop version also receives strong positive reviews. In fact, we are working to add our own review of Projectplace. Starting with Projectplace Projectplace is a solid project management software for international companies in manufacturing, IT, government and other industries. You have to buy \$29 a month on a custom plan in order to use the app. You can subscribe to this or corporate plan on the website. Sign up for the 30-day free trial today. Visit Projectplace Trello: The best application for managing flexible projects for iOS/Android Sometimes, the simpler, the easier it is. If you have an IT company or other business that uses Agile workflows with Kanban-style maps, Trello can provide you with clean and attractive project management software that gives you only the tools you need to organize and communicate. The project management app for iOS and Android is also highly rated and visually appealing. Best of all, it's one of the most affordable tools. Trello Prices Trello ranges in price from free to just over \$20 per user per month. You can download the Trello app for free or connect it to a web collaboration plan. Trello has a free web plan that includes the most important features. Paid plans start at \$9.99/month per year annually. Paid plans offer more opportunities for collaboration, automation, and security. Trello Web Prices - Features Comparison Power Ups (Calendars, Custom Fields, Notifications)Storage for file attachments Unmarked boards, maps, ListsUser resolutions, Google Apps Login on Trello Features Trello uses uses tools with ease of dragging. Each card contains your data, including files, checklists, appointees, tags, and links. The mobile version is as customizable as its desktop app and even better, it works offline, too. The Trello interface is a neat and visually appealing Trello Standout feature: The attractive Trello interface is basic, and it loves it that way. But the basic doesn't have to mean simple. Trello offers beautiful backgrounds for project tips. Not only do they look good on your smartphone or tablet, but make it easy to identify different designs at a glance. If you attach the images, they will show in large sketches on maps and comments. Combined with a neat interface, you have handy software that is easy on the eyes in addition to well organized. Kanban's Board of Directors, Project Management Tools Trello, contains all the information you need to complete the task. Cards can include to-do lists with subtasks. You can mark them, add illustrations, make color tags, and include files and links. Trello offers advanced

features called Power Ups that add other Agile tools, maps, analytics, calendars and more. The number of bonuses in the project depends on the plan you choose. The free plan limits you to one meal per board. Trello Collaboration Tools Like all project management applications we've reviewed, people can comment on maps and use @mention to call someone in particular (as a result of an email notification). There is file sharing and commenting. For extended communication, such as with Slack or with GIFs, you need to install power. Mobile/Web Connectivity Trello is one of the few project management apps for iOS and Android that works offline, as Asana does. You can add information to your boards and maps at any time, even if your smartphone is in airplane mode or you are not in the data range. Trello saves information and syncs as soon as you reconnect. Naturally, if you use a browser, you can access the web version from any device. Trello's Power Ups integration is essentially an integration. They make the software versatile and can add a lot more project management features to suit the complexity of your project. Integrations carry in the mobile app as well. Trello offers over a hundred integrations for almost nothing. Here are examples of integration for Trello mobile apps: Document Management: Box, Google Drive, OneDrive Analytics: Flexible Metric by Screenful, Harvest, Burn Down Communications List: Join.me, Slack, Miro Activities and Social Media: Mailchimp, Twitter, SurveyMonkey Sales and Support: zoho CRM, zendesk, Salesforce What Trello is missing It doesn't have a gantt chart or resource/workflow management tools like Monday.com or Asana is. If you don't In managing add-ons and additional accounts for these features, check out our other cloud project management apps. What users think of Trello Trello users who have left reviews on our site say they enjoy its uncomplicated user interface. The card system is a hit for task management. Mobile users value offline and simplicity. However, they asked for a better reminder system and some tutorials when first launched from a mobile app. Getting started with Trello Trello is an easy-to-use project management app for iOS, Android or desktop. You can get a mobile app for yourself, but if you sign up for an online account, you can add a lot more. Visit the website and sign up for a free account today. Visit Trello Todoist: Best Project Management App (Android/iOS) for blue-collar companies. With its purpose setting and habits of creating functions, the interface of natural language, and Karma points to achievement, it motivates people to do things while keeping them organized. The simple format, simple exchange and repetitive reminders make it a great choice for blue-collar and service industries, which are more focused on tasks rather than project-oriented. Todoist Pricing App itself is free and many consider it sufficient for their needs. There is a free plan on the internet as well. Paid plans start at \$3 per month per user, making Todoist the most cost-effective when considering the price of the tools. Nonprofits can get a 50% discount on a business plan, while educational institutions receive a 70% discount. Todoist Pricing and Features Reminders and Calendar Synchronization Todoist Features Todoist provides project and task management tools using a natural language interface. You can customize repetitive tasks, karmic dots, and personal progress diagrams. Although it's not a full-blown project management app Monday.com or Asana, Todoist takes list management to the next level. The free plan allows you to manage up to 80 projects, but if you want to add features such as role-playing security, that will require you to purchase a paid plan. Todoist offers several features to motivate its Todoist users with outstanding features: The natural language interface and the Natural Language Interface Gamification Todoist makes it easy to set repetitive tasks. Instead of using the drop out menu, you can just give it options like every Monday at 5pm. Software even understands the acronyms as ev for everyone. Hashtags signal to the software to add a task to the project. In addition, Todoist allows you to set daily and weekly goals and gamifies achieve with rewards for achievements and good habits as well as that fun and motivational. However, todostic project management tools do not look to Todoist for traditional or flexible process management. This is task management, based on a list of Application. You can set projects, tasks and sub-tasks. This allows you to make timelines and reminders and will track your progress. The mobile version of Todoist works on smartwatches as well as smartphones and tablets. Todoist Collaboration Tools As with other project management software, you can comment on tasks and share files. However, its communications tools are not as strong as other applications that we have considered as Monday.com which provides workflows and notifications. You can use integrations like Slack to connect more. Todoist Mobile/Web Connectivity For all its simplicity, Todoist apps are the most highly rated project management apps for both Android and iOS, with 4.7 and 4.8 out of 5 stars, respectively. Because mobile apps are so easy to use and use, people use Todoist to organize homes and families in addition to their business. Users praise the priority-setting feature and tracker habits in the app. Many consider the free version sufficient for their needs. Todoist Integration Software integrates with more than 60 programs including Gmail, Google Calendar, and Slack. You can download projects from Trello and Asana, which is useful if you want non-project managers to jump on board. Todoist has an app that allows you to access it from MS Outlook as well. It should be noted that it integrates with Amazon Alexa. Now you can ask Alexa to add the next task. That Todoist lacks to cooperate with Todoist and reporting tools are rare and rely on integration. There are no Canban boards, Gantt charts, or other performance charts aside from personal progress charts. This makes Todoist great for simple projects, but for complex ones, you're better off with software like Monday.com that's very customizable. What do users think of Todoist Who, outside project managers, will describe the project management software as fun? However, that's how many users see Todoist. They find system scores and motivational problems and as a chance to compete with friends and colleagues. Users who have left a Todoist review on our site and who rated it on third-party review sites give a special note to the list format and natural language interface. One thing people didn't like was the lack of a free trial to check out the more advanced Start-up feature with Todoist Free version Ofoist is adequate for simpler needs, but premium accounts offer options such as comments and file downloads. However, it only costs \$4 to try it for one month. Todoist is surprisingly affordable Sign up for a free account or splurge for a one month trial today. Visit Todoist Alternatives to Mobile Project Management Apps (Android/iOS) Marketing Firms that depend on collaborations with vendors, freelancers and clientsbudget-conscious startups who want cloud-sharing documents, tasks and calendars and design teams that need Place to store wikis or style guidesfinance and accounting firms that prefer to use spreadsheets to manage projectsGlobal sales teams customized projects through multiple currency Adjustable firms in need of built-in forms and knowledge baseSmall manufacturers, wanting a simple tool to manage customer projects Bottom Line Best project management applications for Android / iOS have tools for smartphones that are convenient for users like their desktop versions. They allow users to manage projects, tasks, and deadlines, and collaborate with team members. These seven are the best according to features, ratings, and usability. They are also available for small businesses. While each has its strengths, the best multi-app application for project management for iOS and Android is Asana. It offers Kanban boards for agile processes, with plenty of features to add data, manage files, and communicate with teammates. It's reasonably priced and has excellent integration. Sign up for the free Asana trial today and get productive in the office and on the go. Visit Asana Asana open source android app projects
