The divisions under the Department of Public Utilities are: Wastewater Production Water Management Wastewater Treatment Wastewater Collections Solid Waste Services Maintenance Services The Public Utilities Management division provides oversight management for the Water/SewerAge Fund, Solid Waste Fund and Equipment Services Fund. Water production overview The water treatment plant is a 30 million gallon lime softening plant per day with filtration and disinfection. The plant is manned 24 hours a day, 7 days a week, with a minimum of two operators per shift. The water service area extends beyond the city's corporate boundaries serving approximately 18,000 water bills and an estimated population of 62,000. Water distribution overview The distribution is responsible for the maintenance and repair of the system division distribution of drinking water and the raw water network of both wells. The water distribution system consists of approximately 358 miles of main water ranging in size from 2 to 30 inches, inches, valves and 1,928 fire hydrants. The main raw water consists of 30 main miles ranging in size from 20 to 36 inches. Overview of the wastewater treatment plant The Naples City Wastewater Treatment Plant (WWTP) is a 10 million gallon per day advanced waste treatment (AWT) facility. An AWT facility produces an effluent that is lower in nutrients such as nitrogen and phosphorus. THE CITY WWTP produces a high quality effluent called Recovered Water that is mainly used for irrigation of golf courses, residential landscapes, parks and median roads. The recovered water system includes more than 30 miles of distribution pipes, Golden Gate channel supplemental water, and aquifer storage and recovery wells (ASRs) located at the facility site. The wastewater service area has approximately 9000 accounts with an estimated population of 45,000. Summary of Wastewater Collections Wastewater Collections are responsible for the maintenance and repair of the sanitary sewer system and the recovered water distribution system. The sanitary sewer system consists of 122 miles of main gravity sewerage, 2,924 sewers and 52.3 miles of main force. The recovered water system consists of 30 miles of main distribution, 637 electronic meters and 63 fire hydrants. Utility Maintenance Summary Utility maintenance is responsible for the repair and maintenance of 120 pumping stations throughout the city's sewer service area, 54 public water supply wells within two well fields, and four remote drinking water storage/pump facilities within the water service area. This division also provides maintenance assistance with larger projects for both plants. Equipment Services Overview The Equipment Services Division is responsible for the maintenance and repair of 608 equipment. Vehicles include service vehicles, emergency response vehicles, garbage trucks, dump trucks and vacuum trucks, to name a few. Auxiliary vehicles include trailers, tractors, mowers and baseball field equipment. Solid Waste Overview The Solid Waste Division offers residential backdoor trash, single-stream residential recycling, residential horticulture collection, commercial trash and non-residential (commercial) recycling throughout the city. City.
