Gienza Gowaraldi Junior doesn't want his father to take care of himself so hard, it's the white teacher's own wishful thinking, it can only make the white teacher's own heart look as if it's a bit, but others are very uncomfortable. The death walk begins with the death brothers performing, one of which appears spooky and heads the border police. There's no hand here to kill the death brothers who keep the apple, I think it's a metaphor for forbidden fruit, two people killing unbedded sooner or later to be reprehensible, the result of this image above let me understand the meaning of this arrangement, because the cut at the same time someone else is just biting the apple, clicking crisps, so-called storm formation to make the first level look like cutting vegetables. In general. The death brothers found this temporary residence, killed the landlord and provided the holy God of death at home. So this statue must be one of their own, or a very pious believer, who has worked very hard to find it. In one detail, the border police car killed by the Death Brothers is pictured above with four Indians having steel guns in their hands, and the words Fighting terrorism since 1492 written below. Since Columbus discovered the continental United States in 1492, colonialism has not stopped, and the various situations of Indians are also a history of blood and tears, so there is such a photograph. The border police officer in the film Deadly Drug Lord looks like an Indian and has no problems in this image, but it seems that after 9/11, many whites also found the image to express the enthusiasm of the countryman, and they made many T-shirts with this pattern. This may not be appropriate, because the ancestors of these people wounded indian T-shirts as terrorists in 1492. Testing tube coffee machine this collection appeared this set of coffee making machine is very clear, look now feels strong force. The issue features the great Starbucks coffee industry DMC (Starbucks Regional Coffee Master) Thomas_dalong (Micro Signal), and knowledge of coffee-related thanks to him. First of all, I want to tell you a very sad fact, that, this set of forced blasting machines, is actually bluffing. The device, which is viewed from the outside alone, should be a modified version of the Soho extractor, which Gale says can control the water temperature at a constant temperature of 92 degrees C, and can increase the amount of coffee extraction to 48%, all the way in vacuum mode (which should be the principle of siphoning), to achieve the complete extraction of the coffee state. In particular, this set of things is only used in the game to bluff the machine, this set of equipment shapes too, too lazy to explain, I can only say that this coffee, even if the constant temperature is placed there, is also quite good to drink. Of the total weight of coffee beans, only 30% of the ingredients are soluble in water, and the remaining 70% are insoluble fiber and carbohydrates. Basically, the longer the water is in contact with the coffee cells, the more soluble materials are extracted. The official American Fine Coffee Association (SCAA) has an ideal extraction rate of 18 to 22%, meaning that the total weight of soluble substances dissolved in water must be 18 to 22% of the original bean weight. If the amount is below or above this amount, it will be difficult to reach the taste of coffee to achieve the desired amount. The change in dissolving concentration at the unit time is that the dissolution rate is directly related to the contactable surface, the diffring coefficient and the dissolved concentration difference, and inversely related to the thickness of the diffractive layer and the volume of the dissolved environment. Put simply: ground coffee, so that water comes into contact with more coffee cells, determines the particle size of the extraction rate, extraction is to find a balance between the time and degree of the mill. In a minimalist way, good coffee must now be made. The play doesn't show the composition and details of this coffee machine, we think a lot, huh. Can Hank escape the chase in this episode???
