Cospet Trousersuit 24-inch / 61 cm backlength Black Top reviews The latest Reviews Best Reviews The latest reviews For some people waterproof dog coat still won't do the trick as it still leaves too much skin and fur to get wet. For these owners and dogs there is a solution and it is the solution to rain suits that help cover almost all dogs including the legs and belly. This article takes a look at these rain costumes to help you work out the pros and cons of using one and what the ones out there are worth considering for your dog. What are dog rain suits with leg protection? These costumes are made to cover all the dogs except the tail, head and legs, so that during a rainy walk they are not wet and muddy - this allows the owner to relax while enjoying a rainy walk with them without worrying about the carnage that will be delivered home after it. What they are made of varies, but overall it is vinyl/PVC/polyester because they are waterproof and water wicking - which is the key to their use. The benefits of using a rain suit for dogs The immediate benefits of using all the costume cover is clear, most of your dog will be completely covered and dry in the rain and won't be wet or dirty if they don't have to be fully submerged. These amazing costumes cover areas that get messy as well as the hardest to wash - underbelly and feet. You won't need a rain suit and waterproof coat. Secondly, these costumes help keep your dog warm as it traps their body heat so they can also be effective in winter. If your dog is used to regular walks and get antsy, if they don't get their exercise, then one of these costumes will allow you to be able to walk them all year round without any worries about wet and cold. Finally, and this should not be underestimated, the dog rain suit will reduce the rage and anger of every owner who is sick to the stomach of having their car or home (or both) completely destroyed by a smelly wet dog to the point where they can't even take them for a walk at all. It's priceless. The disadvantages of full-body waterproof dog fit benefits certainly outweigh the disadvantages with the costumes, but they are not without their flaws. The biggest obstacle to their usefulness is whether your dog is happy to wear them at all - some dogs just can't wrap their head around it and hate it to the point where they are obsessed with getting it. These kinds of dogs will need some training to get used to them. Getting a coat on is pretty simple, but some dogs can be a little wriggling and make it a problem. The size should be almost perfect for a coat to work; if it's too loose then it's annoying to wear, and if it's too tight then it restricts movement and causes a bad experience. Dog sizes are hard so be prepared to bring the tape to a measure. What is the best dog dog Foot suits here are a few examples of decent waterproof dog jumpsuits. Cospet Trousersuit Cospet pants a stylish little gear that makes the happy dog look like they wear trackies. It is easy to put a zipper on your back to close, it should not cause any inconvenience or hassle for dogs not used to wearing these things. Made from water braided polyester, the water just washes off and as it is not porous your dog will be warm and dry on the inside. It is not a machine washed or fall dry, so it will be wiping to be clean again. The elastic cuffs make the suit stay on comfortable and stop the water going into your feet. The size of the guide is excellent with an incredible range of 20 cm to 76 cm, so that almost every dog is served. It's a quality rain suit, covering everything you need, made with quality materials here in the UK. Available in black, red and navy colours. The Cospet Trousersuit Is a complete protection against the elements of the Hurta Downpour suit for something that really pushes the boat in terms of quality you can't go wrong with the Hurta brand, which are also well known in the waterproof coat department. With a little more style and a better neck covering The Hurta rain suit can be a good product to consider. The outer fabric is laminated, breathable and dirt proof, making it not only great in the rain, but snow and strong winds as well. The fabric is not cheap and won't make a cheap noise of a tracksuit as they run around in it, instead of just being elastic, the neck, ankle and collar are adjustable to suit your particular dog. It is a top quality product that will go to serious dog walkers and tourists who live in areas that often get rough weather. It's a bit expensive but you get what you pay for here. Hurta Downpour Suit NO TWO DOGS ARE SAME - Don't guess the size. Use a size chart along with a guide to the size of Your Dog's Dimension. The length of the back is most important for Kerbl Raincoat clothing with a belly and foot protection Kerbl cloak with belly and foot protection nest of all professions and offers decent protection from rain at a price that will make the wearer happy. It is easy to get on and uses drawstring to tighten so it can be somewhat customized to your dog but it takes a little longer to sort over elastic cuffs. The coat feels cheap, but it's waterproof and the rain slips off easily as it's made of 100% polyester. Neck and throat treads are removable if your dog finds them annoying, which we find a neat function. The reflective stripes make it a little more obvious at night. The cost is super low and there are many sizes for each breed. Conclusion If you already have waterproof But your dog still comes home too wet and dirty, then your only option is to rain suit like above, whole body up to the ankles. If you regularly go hiking, rambling or exploring in the desert and often encounter extreme weather, then a rain suit for your dog is essential. They work a treat and you will only have your head and paws to fight with afterwards. Staying dry you and your dog can enjoy time in the rain almost as much as a sunny summer day. The quality varies from one to the other, so pay attention to how often you will actually use it and when it is in use, how strong and intense it must be to keep up with the elements. The Cospet Trousersuit also has a zipper along the back and elastic cuffs around the pants' legs to ensure a comfortable shape while keeping your dog clean, tidy and looking smart. The very back of the pants suit is exposed, allowing your poo to do its thing without any hassle. Measuring your dog's best to use soft tailor measuring tape for accurate measurements. This will help you order the most comfortable, most suitable costume for your dog. When measuring your dog, it is important that you measure from the base of the neck to the beginning of the tail - this is where the head attaches to the body and where the tail joins the body. Make sure your dog stands upright on all four legs and looks straight ahead for an accurate measurement. This will give you a back length measurement, which is the length of the zipper that runs down the back of the coat. If you have a back length, then you need to refer to the sizes below to choose the most suitable size for your dog. If your dog's size doesn't match the size we have, then you should round up for dogs with descending tails and round down for dogs with up tails. Please note that if you need to return this item, please make sure it is in the state in it arrived complete with tags and original packaging to be eligible for a full and immediate refund/exchange.
