The Garabcousk Chivei Silverado General Motors is one of the most popular products. If you need to work on your Silverado or change the tire, you will already need to lift and support the vehicle. Proper lifting and truck support your Silverado weight. The Silverlet Silverado 1500 model weighs between 4,500 and 5,700 pounds. Look at the label on your Jack and Jack stands to determine if it can support the floor jack to lift this truck to find the factory jacking point. The point is a little center and is usually designated by an arrow. Use the floor jack to lift this truck
until you safely stand under the jacking point toward the two jack spot. The side jacking point is about six inches behind the front wheel of both sides. Remove the floor jack once Jack stands in place and move The back of the car. Back lift by using the centre of the back jacking point or axis. Jack truck is picked up quite when standing in front of the wheel behind it. Updated by Christon November 07, 2017 Bill Pogalino/Getty Images News/Getty Images News/Getty Images The Chivesilverado Trucks are the very popular American-made selected trucks. They come in regular and extended taxi series and are good for heavy load transport or tie. Because of some kind of conditions these trucks are travelling on construction sites or on unstable or badly sustainable roads, it is important that the driver invests in a good set of truck tyres which will be able to carry extra weight and face travelling by road. General Is The All Weather Highway Tire Ready for Catch Truck and SUVs.
