She was known for her sexual independence, which emerged with several fake news stories - often created and disseminated by her many jealous and misogynistic rivals. The targeted smear campaign was so successful that to this day Catherine the Great is surrounded by urban legends about her sex life, such as her death. Although she died of a stroke at the age of 67, her enemies believed in the story that the queen died after having sex with a horse. Many say that the farm that kept the animal would have broken down, causing Catherine to be crushed. While many of the accusations are unfounded, it is true that she cultivated several lovers during her time as Empress and used sex as a tool to gain and expand her political power. After a successful coup against her husband Peter III in 1762, Catherine realized that marrying would mean giving up power. Instead, she joined generals and military admirals and relied heavily on her beloved nobles, who became her lovers and people she could trust to help consolidate her power. In turn, she filled them with gifts, titles and wealth. Catherine the Great's relationship with Grigory Potemkin, perhaps

the most famous of all his lovers, was Lieutenant Grigory Potemkin, who attracted the attention of Catherine when he was still a member of the elite regime of the Horse Guards. He influenced many of the queen's decisions and was one of the only men she really loved. In Prince of Princes: Potemkin, the British writer and historian Sebag Montefiore describes their relationship: Catherine and Potemkin suddenly found themselves inseparable. When they weren't together, or even when they were in their apartments, a few yards away, they wrote to each other in a crazy way. Catherine called him the Golden Pheasant or relative of the soul on which she became so devout. Just like he said: I love you all the time with all my heart. Spite the great complicity of both and the great trust of Catherine, Potemkin shared his views in the imperial court. Some marveled at his impressive list of achievements and academic intelligence, others were repulsed by his crude manner, selfish character and reputation for debauchery. Catherine was willing to share her power with Potemkin, and although some historians cannot confirm exactly, many believe they were married. Although it was impossible to determine his official position, the ruthless and ambitious Potemkin became the king in everything but his name. However, not everything was easy for the couple in love, jealousy crises made the relationship unstable and, in the end, the relationship lasted only two years. However, they remained close for the rest of their lives, allowing Potemkin's political influence to remain unchanged even after the queens became connected to other men. He filled it with titles and honors, including the prince of the Holy Roman Empire and the prince of the Russian Empire. When he died of a fever in 1791, at the age of 52, his last words to his lover were: I'm sorry, merciful sovereign hand. The Empress was alarmed by everything and even wrote to a friend: A terrible fatal blow just fell on my head... my pupil, my friend, almost my idol, Prince Potemkin of Taurida, died... You can't imagine how I'm destroyed. Learn more about Catherine the Great's life:1. Katarina, The Great: Portrait of a Woman (2012) Link - .
