Silverstone cookware 10 piece

Leading reviews in the latest Martha Stewart Kitchen Store cookware cookware distiller kits by show the more show the more there was an error processing your request. Thanksgiving ready? Buy roasters for every mission. Shop now pots and pans are great, can find this item anywhere until I looked at the line and actually found what I wanted at Walmart.com Help?April 13, 2016 Very nice set. Nice, heavy construction. I got the red chili set. The red and white color is really jumping on my black range. The non-sticky ceramics are as good as advertised. I'll buy a few more sets to give as gifts. Thank you, Silverstone! Helpful? July 11, 2015 I've only used one pan and one pot so far, but they're easily cleaned. The bottom's still blue so far. The handles remain cool enough to grip while stirring. Helpful? December 24, 2014 Everything is brewing with outside such a nice glue. I enjoy the easy cleaning. And at a pretty good price. Helpful? September 19, 2015 The first time I used my new cooking utensils, I washed the little pan. I washed it with my hand and placed it in the drain. The metal insert immediately thy thy thy edict but broke back into place. Besides, the cooking utensils seem to be fine. I'll post later after I use it for about six months. I follow the instructions contained in the letter delivery. Later!! Helpful? February 15, 2016 Is for my granddaughter's inclusive shower. It came very quickly. Helpful? September 8, 2015 I've been using this set for about 2 weeks now so far I'm happy with it. I was looking for a ceramic cookware kit and chose it for the price and the beautiful color (marine blue). Its beautiful to look at and perform well. The first time I used a pan to fry eggs, the eggs stuck to the pan and I was disappointed. However, the second time I used it, the eggs weren't infected. Maybe I was supposed to season it somehow, but I didn't read the instructions. It's a little thinner stuff than I expected but it's a good weight, so it works for me. I can't talk about durability since I haven't had it in a long time. So far, I'm pleased with my purchase. Helpful? January 20, 2020A woman is happy with the color, however she thinks the white lining may stain even in a short time Help? July 16, 2019 I am a senior and purchased this cookware set about a year ago and treated it with care. The blue finish at the bottom of the pans flutters. The creamy finish on the inside itches. I used the right uddials for these pans, but it doesn't seem to matter. I'm not impressed, sorry I purchased them. I thought this would be the last set I'd ever buy. I guess not. Written by potsandpans.com client. Helpful? July 16, 2019Thust started to stick almost immediately! After two months I passed the smaller pan, because I couldn't even clean it, the food got so bad. The color at the bottom is a color not ceramic and it comes With laundry! I'm not offering this to anyone in particular with only 30 days warranty! Written by potsandpans.com client. Helpful? Client.
