## Shimano stradic ci4 spinning reel 2500hgfb

Top positive reviews All positive reviews, Amazon Customer5.0 on 5 starsBeen use for more than a year will still be strong. Reviewed in the United States on August 26, 2018Mngm purchased in June 2017 for rigorous saltwater striped bass fishing. (4,000 sizes) this is on my light settlement setting (7' St Croix) mostly for schoolie size fish. It is extremely smooth and powerful for size. Has caught the goalkeeper size on this reel without problems. I also completely submerged it in salt water for about 5 minutes. (Long and un intentional story) The reels are perfectly fine. Can't say enough good things about this reel after much use over the past year. ❌ California Prop 65 Warning:? Nav FirearmsAmmunitionHunting & TrapFishingIce FishingWatersportsCamping & CookingOutdoor GearApparelFootwear Brands © 1999-2020 Reeds Family Outdoor Outfitters MGL rotor Magnumlite Rotor's new design creates unprecedented light rotation. The propeller configuration, which was formerly symmetrical, is now asymmetrical. The bail arm mechanism, formerly located on the same side as the road roller, was moved to the opposite side. This improves balance and combined with a lightweight line roller, titanium bail and optimal rotor thickness arrangement, a 14% saving in rotational inerency has achieved increasing sensitivity to levels not previously achieved. Order chartDescription#HookedOnTDRReviews (43)Q&A; (2)Shipping & Returns STCI42500HGFBSHM-3201356.0:16/2008/14010/12010/1 5015/1501514530/100206 S A-RB +1RB6.7 \$229.99 USDBack and updated with some of Shimano's newest technologies, the Shimano STCI42500HGFB Stradic Ci4 Plus Spinning Reel delivers top-level performance in a lighter and more durable platform than ever before. By reducing overall weight, adding the new lightweight MGL Rotor and combining G-Free Body, Shimano Stradic Ci4+ is the lightest and most comfortable Stradic ever made. Don't let this lightweight reel fool you however; the use of Hagane Gearing, CoreProtect and X-Ship cold forged technology ensures the Stradic Ci4+ can be abused for years of reliable operation. From Largemouth Bass and Walleye to Striped Bass and Snook, Shimano's Stradic Ci4+ Spinning Reels offer all the features and power needed to tame one freshwater species and coastline. Shimano Shimano Technology In Stradic Ci4 + Reels: Aero Wrap II - Using a patented deep gear design, this two-speed oscillating system places the line into the tube in an X model that reduces friction online and helps to increase the casting distance. CoreProtect - The concept of CoreProtect is simple to provide exceptional water resistance without generating any additional rotational resistance on retrieval. Rolls are treated in critical areas such as roller clutches, body and roller lines to combat water penetration. Hagane Gear - Boasting great strength and durability, Hagane Gear is a process in which gears are calculated in minute detail and cold forging instead of being cut. This application of state-of-the-art technology for smooth angler reel from the first use through years of enjoying. MGL Rotor - Magnumlight Rotor is 25% lighter and allows for better balance and requires 22% less inerency, making it easy to start and stop retrieving for a smoother feel. S A-RB bearings - These bearings undergo corrosion resistance similar to Shimano's A-RB bearings, with the addition of shields on both sides of the bearings to reduce the likelihood of salt, dirt or other foreign objects inhibiting bearings. Super Stopper - Super Stopper II anti-reverse using a one-way stainless steel bearing roller to remove back-play in the reels and give the angler with instant power when setting up the hook. X-Ship - By supporting pinion gears on both ends with bearings, pinion gears still fit exactly with the rudder and are in the same position under even the heaviest load. This eliminates friction between the tube shaft and gears which means better casting performance and increased gear strength.1557514608 I have multiple Shimano Stradic rolls. Why, because they never failed me. This new C-14 is no exception. The main reasons to do with castability. They cast like a dream and lay the line like a fine sheet w/o dug in and a great grab rate. My friends think I'm crazy to use them in saltwater but lately I've been wrestling a nice snook from mangroves as well as fishing green and Spanish manch from surfing in Florida with these reels. I have several sizes, and each size is very balanced by incredible lightness on size ratl, making it easy to cast non-stop w/o fatigue or reel/rod balance issues. Love these guys, and just give one to a friend!!! ConsUnsealed bearings. i use this roll on a 7ft. St. Croix for fluke off the surf, spooled with 15lb J Braid, throw small jigs with gulp, and small light bucktails, smooth, wonderful casting..... A little expensive but well done. I love it Proseverything is a great little tank of a little expensive Consa roll, but all my old stradics are still 100% up to par. reel is a technical achievement. ProsLightweight, the precise cast, long and smooth, consnone pulling powerful Rolls makes a strange noise when you're reeling and it doesn't smoothly feel rough. Very disappointed with reel. I've had this roll for about 3 years now combined with a shore gloomis e6x. This is a workhorse. I have 3000 series and I've caught red fish up to 10 pounds no problem at all prosVery smooth and nice pull molding system. Also really lightweight compared to the real ConsNothing competitor i have Ci4 3000 and 4000 reels. Roll large and lightweight. I was caught 40 inches plus red fish on my paddleboard with the reels. Fishing on a paddleboard all day is quite a workout and having a good light setting is key. Prosgood pull and light weight Cons cost more than Stradic I have 5 Stradic Ci4, 1 gene 1, 2 genes 2 and 2 genes 3. I'm tough on my equipment and they get a lot of use and have never let me down. Ultra-lightweight and durable. I've caught 15 pounds of bluefish and 20 pounds of striper over 3000 and used them for albies as well. I would say that I want them to keep processing foam clamps on gen 3. That's the only reason I didn't give this reel a 5-star rating. The Ci4 version is very lightweight but still packs a punch like its stradic FK siblings, I use them for fresh water applications because I baby roll this so much I don't want to put it on salt water I have 3500 series I love doing well in fresh and salty water, great for bass fishing. I have no bad thing to say about the reels. The scissors are smooth butter and the crank is so easily flowing. Also feel like a super premium product and very light By Philthy Island Staten, New York I bought this roll to pair with my light st.croix 7 sticks throwing small jigs and Gulp from the coast. Great combo. ProsKiller reel, smooth cast and grab ConsPricey for a little reel This is really nice reel. This is really nice reel. ProsFantastic light and powerful! Consprice© very light, smooth crank spinning roll.... compliment my ultralight perfectly! This reel performs great! It is very smooth and lightweight. Highly recommended. ProsLight Smooth ConsNone does this Stradic model combine hagane techniques? 1 Answer What is this Non-Incorperate Hagane Technical Roll (Japanese Steel) This series? 1 Answer Karina, Hello this roll is the latest model they made. 2016 Show your fishing gear investment.
