damage to the seals and mitigate the risk of staining the soft furniture inside your van. Make sure you use specially designed toilet paper that is made to break down easily in your cassette toilet. This will prevent blockages and make it easy to clean the tank. There are environmentally conscious and green versions of these products on the market that are septic safe because, unlike the standard products on the market, they do not kill the bacteria that are inside the septic tanks. Bacteria found in septic tanks are crucial for them to function and break waste. These supplements are most important in terms of function because they are responsible for reducing the gas build up, preventing unpleasant odors and destroying solids and tissues that would otherwise cause blockages. Because of their work is to liquify solids, the cassette toilet is much more likely to become blocked if these chemicals are not used. Even with the right chemicals and the right doses, your holding tank can become blocked due to excessive use of toilet paper! You need to exercise caution when un-blocking it as there is a thin float mechanism inside that is used to show how full the tank is. Don't be tempted to fill with water and Shake the tank as it is a common way to damage the float! Instead, use gentle swirling technique to try to dislodge any lock. Most modern waste storage tanks have a large removable area on top that can be removed, making it very easy to check for damage and remove stubborn debris. If you have an old tank it may be harder to resolve the lock, please refer to your toilet guide for advice. At the end of the season or when you do not plan to use your van for an extended period it is recommended to clean the tank with the tank clean. Thetford suggest using a tank cleaner 2-3 times a year in order to prolong the life of the tanks, keep it look new and, importantly, to keep it smelling fresh! Flash chemicals In recent years flash chemicals such as Thetford aqua rinse have developed to leave a pleasant smell and satisfying glitter cassette bowl. However, these chemicals are not as important as those used in the waste storage tank as their only function is to leave the bowl clean and smelling fresh after a flush. Toilet bowl chemicals Specific bleaches and spices used to keep the toilet clean and hygienic should be plastic safe to avoid damaging plastic toilets, pipes and seals. Thetford have released several products that are specifically designed for cassette toilets, and they are pictured below. Top tips! Always remove the tank from your van and add chemicals outside so you don't spill and stain your van! Be careful where you place the lid when emptying the waste carrying the tank... You don't want to lose it down the drain too! Use olive oil as a seal grease and keep your seals at the top of the tip state... It will help prevent leakage! Always use an easily decomposing toilet paper and use it sparingly! Below is a handy diagram from Thetford that helps give a visual view of what's going on where! Tetford, (2020), 201811015_Thetford_Afbeeldingen_Website_EN ONLINE. Available on: Access January 6, 2020. Please sing or create a new account to leave a response! With a replacement seal or two and a pump change it's not uncommon for Thetford Toilet to still be in operation after 10 years, but this kind of long life doesn't just happen without a bit of TLC... Its use is far and wide and can be used for periodic care, protection and maintenance of seals, locks, loops, awning rails, bikes and more - too bad it doesn't work on lazy bowls! Thetford Seal Lubricant is different from household silicone sprays, it has been specially designed for safe use with Thetford Cassettes and Porta Potti Chemical Toilets. Supplied in 200 ml can, End creak, creak and leak and keeps Grandpa's knees from gripping (I did that last bit up). Benefits: Protects toilet seals from drying out provides Working Thetford toilet valve blade spray on almost nothing to prevent creaking, creaking or leaking Safe for use on plastics and rubber lids in one, light coat Available in 200 ml spray can 1.5 liter tank Freshener 1.5L Tank Freshener is a strong effective odour control liquid for waste-holding tank and waste piping system. It is designed to eliminate unpleasant odors in caravans, motorhomes, folding campers and boats, etc. and can be used as often as required. Thetford Tank Freshener cleaning agent kills bacteria and deodorants, breaking stubborn dirt and lubricant that is deposited inside tanks and pipes overtime. Specially designed to protect plastic surfaces, eliminate odors and remove sediment and contaminate fat in pipes. Use on shower trays, washbasins and sinks, etc. to ensure the water supply. Benefits: Reduces sediment and reduces fat content stimulates waste-free discharge tank For fresh smelling tank for sewage, shower, washcloth and sink Available in 1.5 liter bottle Tips for cleaning storage before storing your caravan or motorhome, always clean the waste-holding tank with Tank Cleaner cassette. With regular cleaning of the tank, the moving parts will continue to function properly, resulting in a longer life of the product. Pour 300ml Tank Cleaner cassettes into the rinse tank and fill it with at least 5 liters of warm water. Shake the tank several times back and forth, then set it down and leave for at least 16 hours. Once emptied, your trash can will be as good as the new one. Allow the tank to dry, leaving the blade open. Driving with a Cassette Tank Cleaner in a waste storage tank will improve cleaning performance. Using Thetford Cassette Tank Cleaner before storing a camper or caravan for longer periods gives you a fresh start at the start of the new camping/adventure season. During storage, we recommend leaving the toilet blade open. By leaving the blade open, you prevent the blade from drying out. Next to this, we would advise you to unscrew the lid to pour out the spout to keep the waste holding the tank ventilated. Maintenance To prevent the leak of the waste tank, always keep the rubber seals smooth and smeared regularly using Thetford Seal Lubricant. Spray seals and valves liberally with Thetford Silicon spray. Please note: Unlike household silicon sprays, this spray is specially designed for Thetford toilets and plastic parts, and is therefore absolutely safe to use. Does your toilet have its own water rinse tank? Completely rinse it so that no more deposits are left behind. Then it's completely in front of a camper or caravan in storage. Depending on the type of toilet you have, you can easily let it run empty. For more questions and advice, please contact your guide or call us at 01255-830-229. 01255-830-229. 01255-830-229.
