Classifying plants worksheet

Cloze Plant Classification: This cloze activity can be used to review how plants are classified into groups such as vascular, no vascular, sperm, seeds, angiosperms, and gymnosperms. Crossword Classification Plants I: This crossword activity can be used to review how plants are classified into groups. Crossword Classification Plant II: This crossword is similar to the crossword above to classify plants. These resources were created by Chris Gunn. Scientists look for different properties in plants when classifying them. To make this classification easy to understand, it was explained in the table. Fourth graders can use this printable scientific worksheet to practice collecting information from tables, and learn more about plant classification. The questions on the worksheet look at how well they understood the table. Note that resources were published to the Web site in the form that they were originally provided.
