What is edpuzzle live

EdPuzzle is a free Grade Center tool that enables teachers and students to create interactive videos online by embedding either open or multiple choice questions, audio notes, audio tracks, or comments on a video. Edpuzzle interactive videos can be made with videos from a variety of websites including YouTube, TED, Vimeo and National Geographic. Tool Snapshot EdPuzzle is a great formative assessment tool for teachers who run a flipped classroom, assign videos for homework, or want to encourage asynchronous communication. The teacher can also have students use EdPuzzle to show if they achieved their goals at the end of the semester. Example of a video with a built-in question on EdPuzzle [Screenshot]. Retrieved from EdPuzzle teachers can create online classes and upload original videos or select online videos, add interactive features, assign these videos to students, and send video assignments to students' email addresses by providing either an access code or a link. EdPuzzle allows teachers to keep track of how many students watched the video, what percentage of videos students watched, when they saw it, what questions in the video students answered right or wrong. Sign up for the EdPuzzle Video Transcript EdPuzzle Tutorial Video Transcript EdPuzzle & SAMR Model Dr. Ruben Puentedura's SAMR model offers a lens to investigate how technology is adopted in a classroom. As you strive to incorporate online tools into your classroom, we encourage you to use this model as an analytics tool. Here's an example of how EdPuzzle can fit into the SAMR model: Replacement: Students answer questions on a video instead of on paper. Expansion: Teachers can improve the videos they're showing in class by adding their own narration to the video to clarify concepts or highlight key points. Change: Students use EdPuzzle to add more choices and open questions to a video from the teacher. Once they've created their own interactive videos, students can exchange their videos with classmates, complete classmates' video tests, and provide feedback on the quality of classmates' interactive videos. Redefining: Students and teachers can share their interactive EdPuzzle videos with people around the world, collect data from the people who answer their questions, and analyze the data. Too often, technology is used as a direct substitute for other low-tech tools (e.g. pencil and paper). While substitution has some advantages (e.g. students develop their technology skills and knowledge), we encourage you to think about how you can use EdPuzzle to change or redefine learning. Learning Activities Mathematics After covering the subject slope, go to EdPuzzle and search for a video (e.g. how to slope on a line) using Khan Academy, which is a tool containing tons of mathematical videos. Embed your own voice and questions in the video, add it to your online class on EdPuzzle, and share it with your students via online class at EdPuzzle. You can then invite students to answer the questions in the video and track their answers and progress. Provide instant feedback to scaffolding student learning. Science To create awareness of climate change, each student finds a climate-related video. They adapt it by embedding their own voice and adding some questions to it. Then students collect all the videos, visualize them into one video in a meaningful way, and create a video gallery to present it in the upcoming showcase at school. Biology By using the National Geographic Channel on EdPuzzle, find a cheetah video and share it with your students. Give it as a task for them and ask them to see it before they get to school. When they get to school, invite them to discuss the video in groups. Social studies Students see a video about the different types of government structures. They develop a list of questions on this topic and embed their questions directly in the video via EdPuzzle. They can share their EdPuzzle video with a teacher or expert (via social media) to ask for answers to their questions. Resources How to use EdPuzzle Go to EdPuzzle Select teacher account Click on Sign up and sign up for an account Go back to EdPuzzle and log in Go to my classes option at the top Click on the Add class option to create a class name class Your Invite students to class Click the search button at the top Search for a video on the channels offered on the left side (eg. EdPuzzle, YouTube, Vimeo) Select the video you want to edit and click on use it button Edit your video using features at the top of the video Click the Save button and go to my content at the top of the homepage Select your video that you just edited and assign it to your students in your class by clicking the Assign/Share button at the top. And then, assign it for your class at EdPuzzle. Image sources EdPuzzle, (i.d.). EdPuzzle support from EdPuzzle. Retrieved from EdPuzzle, (n.d.). EdPuzzle teacher resources by EdPuzzle. It's very viciously easy to useGradebook making teachers life easy!It's super interactive and my kids love this. Children can't jump through the videos. They have to answer the questions!! Easily enter Google Classroom With Edpuzzle's Live Mode feature, you can project your video directly in front of the entire class while students respond in real time to their own devices! To start a live task, select a video from your content and assign it to a class. Then, from the task screen, click on the blue Go Live! button. To enter the live assignment, students just need to log into their Edpuzzle accounts and go to your class. This will automatically take them to your live task. When all your students are ready, click the blue Start! button and video play on the projector screen. The questions appear on students' screens as well as on the projector screen. You'll see how many students have answered the question so you can decide when to move forward. When you click Continue, students will see any feedback you've included for the on-screen questions and the right answer to multiple choice questions. On the main screen, click View Responses to view the results in percentages for the entire class. Names aren't shared so your students won't be embarrassed if they're wrong about a question. You decide when the time is right and when to go to the next question. Click Exit directly to complete the task. You can also finish the task at any time. (You will automatically exit from live mode after 3 hours if you forget to click Exit Live.) You can access students' grades by clicking on the assignment or from the gradebook. Note: Currently, live mode is not compatible with the Android app. If students use smartphones or tablets, they should use the web version on their devices instead of the mobile app. Contact us at support@edpuzzle.com. EDpuzzle has been my go-to tool for creating video-based lessons and quizzes for many years. Just in time for the new school year EDpuzzle has released new feature called Live Mode. With EDpuzzle's live mode, you can take your existing EDpuzzle lessons or any new lessons you create and turn them into group activities. When using EDpuzzles Live Mode, project a video onto a screen at the front of the classroom. Students watch the video on the projected screen while they have laptops or tablets open. When a question appears in the video, the video pauses and the question automatically appears on students' screen so they can answer. As a teacher, you can immediately see which students have responded and how they responded. Watch my short video below to see how EDpuzzles Live Mode works. And if you have never tried EDpuzzle in any capacity, see my complete EDpuzzle tutorial below. Nefertiti Dukes | 08.05.2020 We are pleased to officially announce our most requested integration (by FAR). You can now easily upload your Screencastify recordings to Edpuzzle! To learn how to use this new feature, see our step-by-step guide. Wondering how to get the most out of both Screencastify and Edpuzzle? Keep reading! 📺 Monitor Engagement If you've been looking for a way to see who interacted with your videos, this integration is changing! Edpuzzle's analytics make it easy to track how students interact with your instructional videos, including who's seen your videos and how long. 🗳️ consider understanding Need a quick assessment? Edpuzzle has you covered! You can add multiple choice questions or even card answer questions to see how well your students have mastered the material. 🗣️ create robust video lessons While we know your screencastify recording will be the star of your video lesson, it doesn't have to be the only component. Supercharge your tasks by requiring students to pause and listen to a quick voiceover. Or add some written notes to reinforce complex concepts. 🗣️ share your lessons Once you've made the perfect video, sometimes you need to share it! With Edpuzzle, you're instantly connected to other teachers in your school community. This integration makes it easier than ever to share content across classrooms and teachers. 🚀 go live! It's no secret that Screencastify gives teachers the power to clone themselves. With Edpuzzle's live mode, your powers will grow even stronger! Enable this mode to make the Screencastify recording appear in front of the room as you walk around to monitor and answer questions. Ready to get started? Check out this step-by-step guide. Guide.
