By focusing on simple customization procedures, easy opening of shared devices and simplified ways to transfer files at unlimited speeds on all currently supported wireless transmission protocols, Zapya for PC has managed to attract a global audience of more than 300 million users. And it managed to achieve all this success by promoting the service that many of us want - sharing files between devices without file type restrictions, severe bandwidth limits, and most importantly, without cables! There are two ways to install and use the DesktopZapya on Windows. Use a special setup program that supports all modern versions of Windows (Windows XP), Vista, 7, 8, and Windows 10, both in 32-bit and 64-bit mode) and through the Windows Store in Windows 10. No matter which version you choose when you run the app, you'll be welcomed with an easy and easy-to-use interface that can help you identify local devices and start transferring files at any time. Since this program was made by Chinese developers, for some users the application may first start in Chinese-language mode. To return to the language, all you need is to go to the Settings area and switch the current active language mode. The functional user interface facilitates easy file sharing. To start uploading files, you do not need authentication, authentication. If you don't already have an app installed on your mobile phone, Windows will provide you with QR codes to simplify the installation process. File sharing is done with simple drag and drop, and to make your life easier, the app will also log previously uploaded files so you can track what was shared with which device. The Options pane contains only the most basic options, such as default file paths, language settings, and startup configuration. Features and highlights of easy file sharing - Windows, macOS, Android, iPhone, iPad and Windows Phone Are present in numerous top50 app lists - used by more than 300 million users worldwide.
