Martin Site Admin and Owner Member Sedan: 06 Nov 2004 Site: Hook Norton Post: 17884 Discovery 3 Workshop/Systems Manual Disclaimer: This download is for INFORMATION only. Neither DISCO3.CO.UK nor Martin Lewis are responsible for any damage caused by the application or otherwise by the information. With many thanks to PerS (pers1), the workshop manual (covering all vehicle systems) for Discovery 3 (and LR3) is now available for download in PDF format: Discovery 3 Workshop/Systems Manual (PDF) Any problems let me know, otherwise enjoy Martin Last edited by Martin on Feb 12, 2016 1:30 pm. Edited 5 times total 7th Jan 2005 03:09 Ecosse Member Sedan: 07 Jan 2005 Location: Grampian, Scotland Post: 875 USA version? + some errors Martin - excellent & very useful, but would I be right in thinking that this is an American version of at least written by someone from the US? Giveaway's tires are mislabeled as tires!!! Even for the tires advise they are available AS, AT or AT-S, no such option given by UK dealers and how accurate is it? - I see for example that it claims the TDV6 engine (which I thought was not available in the US?) has 197bhp (200PS) which is in violation of the LR website & literature. Perhaps like most literature for Disco3, is it a case of reading carefully & comparing with other sources of information to try to assess accuracy? Regardless of this, many thanks to PerS, as it has some useful info! 8th Jan 2005 9:05 AM Martin Site Admin and Owner Member Sedan: 06 Nov 2004 Location: Hook Norton Post: 17884 It seemed to me to be a bit American - as you say the reference to tires and it only contains information about the NAS instrument cluster. But it has TDV6 info (albeit slightly incorrect!), which is a bit strange. Whatever it is though, I hope it's helpful Martin 8th Jan 2005 10:23 Gurban Member Sedan: 02 Jan 2005 Location: Germany ... Not far from both the Us and hard-line German rock... Post: 1089 Whatever version it was, it is still useful to me ! Thank a lot!! 8th Jan 2005 10:49 pers1 Member Sedan: 06 Jan 2005 Location: Norway Post: 56 It's taken from LR Gobaal Technical Reference Website for Europe That's for LR's for LR's Service senter's I've taken down what was interesting to me as I wait for the arrival of my TDV6 HSE Document Details Title: Discovery 3/LR3 2005 Workshop Manual Type: LA - Discovery 3 - 2005 - Workshop Manual LA - LR3 - 2005 - Workshop Manuals Name / Part No: LRE001 Info Type: Service Information Version No: 1 Date Uploaded: 28 Jul 2004 PerS 8 T Jan 2005 9:59 PM Outrageous Sedan: 10 Jan 2005 Location: New Hampshire, USA Post: 44 It's taken from LR Gobaal Technical Reference website PerS Do they charge you for this? 10. Jan 2005 11:25 mwillems Member 06 Jan 2005 2005 Oakville, Ontario, Canada Post: 154 Oh boy who looks so cool. Now I have to decide if toget all these notes, manuals etc I want to pay \$50 for a month's access (or is it \$10, for a day's access!). ANYone wants to share? 10th Jan 2005 11:35 Outrageous Member Sedan: 10 Jan 2005 Location: New Hampshire, USA Post: 44 Sample document section shows some pages from a pretty good workshop manual describing the removal of a front airspring (not sure if it's an RR or Disco 3). But I didn't see any true workshop manual available for Disco 3 in the list – just the manual that Per kindly delivered. 10th Jan 2005 11:52 PM Gareth Site Moderator Member Since: 07 Dec 2004 Location: Bramhall Post: 25531 I have used GTR before for my Disco 2. It is especially useful because the technical service bulletins will be posted and when they become official. These are the recommended dealer actions to take in case of problems with the vehicle. I think it's going to take some time to be really useful. I have a copy of the RAVE CD for my D2 which was even more valuable, as it had the complete workshop and repair manual (1200 pages) I'm expecting one for the D3 to become available. It is not officially available to the public, but eventually one will leak out from a cooperative retailer and will appear on ebay or something! It will be worth paying for. 11 Jan 2005 12:15 am DiscoMad Member Sedan: 11 Jan 2005 Location: Warwickshire, UK Post: 190 Outrageous That manual, although I am convinced is not the final version, hundreds of pages are large covering most aspects of the vehicle. There are errors, just as it is in the owner's manual! The PDF file is a small selection. 12th Jan 2005 10:37 Outrageous Member Sedan: 10 Jan 2005 Location: New Hampshire, USA Post: 44 Outrageous to 'manual'... is hundreds of pages large covering most aspects of the vehicle. The PDF file is a small selection. Thank you for clarifying that. I now see that pdf as Per provided is Systems part of the workshop manual. I wonder how many episodes there are altogether? Does a \$10 fee allow for downloading the whole thing? Per, would you consider making any more of the manual available to the forum if Martin were to host it? 14th Jan 2005 01:30 DiscoMad Member Sedan: 11 Jan 2005 Location: Warwickshire, UK Post: 190 Manual is arranged in several sections, in web page format. You can't download it all easily (although I'm sure there must be tools to do so). 14th Jan 2005 08:30 PM Gareth Site Moderator Member Then: 07 Dec 2004 Location: Bramhall Post: 25531 Why not just wait for a copy of the RAVE CD? I'm sure they'll hit the black market soon. 14. Jan 2005 4:30 Outrageous Member Sedan: 10 Jan 2005 Location: New USA Post: 44 I guess the CD would be What does RAVE stand for? 14th Jan 2005 5:26 Mwillems Member Sedan: 06 Jan 2005 Location: Oakville, Ontario, Canada Post: 154 Manual is arranged in several sections, in web page format. You can't download it all easily (although I'm sure there must be tools to do so). I'm sure, as PerS did it – but I've been trying for hours and I can't get the web content in html reliably (the images aren't all getting included). Very annoying - it is designed to be useless it appears. Wasting my US\$11... 14th Jan 2005 5:47 PM NEXT PAGE & LR3/ Disco 3 General Service Information General Service Information Introduction This manual has been written in a format that is designed to meet the needs of Land Rover technicians worldwide and to assist them in the efficient repair and maintenance of Land Rover vehicles. This manual provides descriptions and methods to achieve adjustment, service and repair work using tested and effective procedures. Following these procedures will help to ensure product reliability. Special tools The special tool table (-er) table provided at the beginning of each procedure lists the special tool(s) required to carry out repair operations under this particular procedure. Where possible, illustrations are provided that will help technicians identify the required special tool(s) and also show such tools in use. Special tools can be obtained from the manufacturer, SPX Tools, the addresses of their branches will be available in the Special Tools Glossary located within this section. Important Safety instructions Appropriate service methods and correct repair procedures are essential for the safe and reliable operation of all motor vehicles and ensuring the personal safety of the individual carrying out the work. This manual cannot possibly anticipate any such variations and give advice or caution as to each. Any person who deviates from the instructions set out in this manual must first establish that they do not compromise their personal safety or the integrity of the vehicle by choosing their methods, tools or parts. Individuals carrying out their own repairs should have some skill or training and limit repairs to components that could not affect the safety of the vehicle or its passengers. All repairs required for safety-critical objects such as steering, brakes, suspension or additional restraint systems should be carried out by a Land Rover dealer. Repairs of such objects should NEVER be attempted by untrained individuals. Warnings, Warnings, and Notes that appear in this manual When you read through this manual, you will review warnings, warnings, and Notes. A Warning, Caution, or Note is placed the beginning of a series of steps. If the warning, caution or note applies only to one step, it is placed at the beginning of the specific step after the step number. Warnings, Warnings and Notes have the following meanings: Warning: Procedures that must be followed to avoid the risk of injury. Caution: Draws attention to procedures that must be followed in order to avoid damage to components. Note: Provides helpful information. References to the left hand (LH) or RH side (Right Hand) specified in this manual are made when you look at the vehicle or device from behind. Fault Diagnostic equipment The vehicle is equipped with a number of electronic control systems to provide optimal performance of the vehicle's systems. Diagnostic Equipment (T4) is available and must be used where specified. The use of this equipment will help with the dealer workshop's fault diagnostic abilities. In particular, the equipment may be used to interrogate the electronic fault diagnosis systems which may become apparent during the life of the vehicle. NEXT PAGE & &
