In the next logical step of the evolution of Google Play Music, Google has added podcasts to the concoction. Now, from the Google Play Music app, you can search and stream all your favorite podcasts. There's no longer a need for third-party apps and jump between music and podcasts, since now you have a one stop shop. Google Play Music podcasts lack multiple features like the ability to queue multiple episodes from different podcasts, but features such as that are likely to be forthcoming. We've put together a quick guide to get you up and running. Read more: [Subscribe to Android Central Podcast!
